**COMMENTS:** I have lived in my home in Arlington for 23 years. I have raised my children here. It is a good neighborhood with good neighbors. Now that I am retired, I enjoy spending my time outdoors reading and gardening. For the last year there has been a foul smell in the air. It is especially bad in the evenings and morning hours. I used to leave my windows open at night to let the night air in, but no more. I used to sit on my patio with neighbors and friends and look at the stars at night, but no more. I used to go for walks at sunrise and

MSW

begin my gardening in the cool morning air, but no more. The foul smell is coming from the IESI Fort Worth C and D Landfill located at 4144 Dick Price Rd. in Fort Worth. At best it smells like garbage, often smells like natural gas or rotten eggs, and sometimes smells like something died. Sometimes it makes me gag. On cool evenings, even with my windows closed, the smell creeps into my home. It wakes me up at night. Air freshener doesn't help. I have to light incenses and pull the blankets over my head to escape the smell. I don't think the landfill was there when I bought my home 23 years ago. It seems to have really increased in size the last year or so. You can see it sticking up over the trees from the corner of my neighborhood (Bowman Springs Dr. @ I-20). And now I understand that they want to make it EVEN BIGGER!!!!!! It has already been a major impact to the quality of life in our neighborhood. I can't imagine what will happen if it is expanded. Besides the stench, what kind of health problems might it be causing? It should be covered and closed, not EXPANDED! I originally planned to live here for many years. I have planted gardens and made improvements to my home to make it just the way I wanted it. There is a growth chart on the wall showing where my three children grew up here. I had hoped to have their children here for vacations and big turkey dinners at Thanksgiving. But lately I have been considering selling my family home and moving elsewhere because of the horrible smell. If the landfill is expanded and allowed to get even taller, what will that smell like? Will I even be able to sell my house? There needs to be a public hearing so that people can find out what is going on and can voice their concerns. The landfill shouldn't be allowed to come in here and impact the quality of life and home values in established neighborhoods.

**To:** ac <[ac@tceq.texas.gov](mailto:ac@tceq.texas.gov)>  
**Subject:** Public comment on application for modification of permit

The IESI Fort Worth C&D Landfill on Dick Price Road has applied for a permit to increase the volume and types of waste and by vertically expanding the elevation and site operations. This landfill is 2.6 miles from our neighborhood, and has had three moderate violations in the past year. Residents in the area are submitting comments to request a public hearing. The public has a clear interest in this matter due to environmental impact in the surrounding area. We will have a mountain of stinking garbage in our back yards. We have already reported bad odors to the City of Arlington and were informed that they were coming from this Land Fill. With higher elevation of waste, our water table and nature preserve may be polluted with runoff. This will adversely impact property values, wildlife, and the quality of life in our Arlington and Kennedale neighborhoods surrounding Potomac Pointe and Georgetown.

Please convey my request for a formal public hearing on this matter to allow input of residents who oppose the modification of this permit.

Joan Cauley

**COMMENTS:** Would like to request a community meeting to discuss the request of permit# 1983c,the expansion of the landfill on Dick Price Rd., Fort Worth, TX. Landfill expansion stinking up my back yard? The IESI Fort Worth C&D Landfill on Dick Price Road has applied for a permit to increase the volume and types of waste and by vertically expanding the elevation and site operations. This landfill is 2.6 miles from our neighborhood, and has had three moderate violations in the past year. Residents have the option of submitting

MSW

comments to request a public hearing. The Texas Commission on Environment quality already drafted a permit that will be issued by the Director. Unless there is public interest shown and a legislator requests a hearing contesting this case, we will have a mountain of stinking garbage in our back yards. You may have noticed bad odors. With higher elevation of waste, our water table and nature preserve may be polluted with runoff. This will adversely impact property values, wildlife, and the quality of life in our Arlington and Kennedale neighborhoods surrounding Potomac Pointe and Georgetown. Sincerely, Joan Cauley

**COMMENTS:** My husband Russ and I request a public hearing regarding the IESI Fort Worth C&D Landfill on Dick Price Road. They have applied for a permit to increase the volume and types of waste and to vertically expand the elevation and site operations. We had our house built in 1995 and have never had a problem with odors until this past year. We believe increasing the volume and types of waste would only make this new problem, which should be addressed and corrected, even worse. Therefore this request for a public hearing is

MSW

being submitted on April 14, 2016. Your attention to this matter is greatly appreciated. Keep the Faith and Love Always, Rev. Sheila Fiorella

**COMMENTS:** I am concerned about the proposed permit to expand the IESI FORT WORTH C AND D LANDFILL on Dick Price Road in Fort Worth, Texas in the elevation and types of trash it accepts. This landfill is close to Kennedale Middle School and residential areas. It is within one mile of the Southwest Arlington Nature Preserve. I would request that the TCEQ conduct a public hearing on this matter to consider the objections of residents of Tarrant County to this permit application.

**COMMENTS:** I am a homeowner just a few miles east of the landfill, and strongly oppose any efforts to provide the landfill the ability to add more garbage to their site. Frequently in the morning hours I am walking several hours for exercise and the stench is, at times, overwhelmingly appalling. Allowing the landfill to grow higher will clearly make the odor worse, adversely affecting the quality of life in our area and harming property

MSW

values. Please consider this my request for a hearing to contest the landfill's request to expand the volume and types of waste they may store.

**COMMENTS:** I would like to request a hearing contesting this case 1983c . I live off of Averett and Dickprice and the smell is already horrible. I have called and complained and was told it was no longer going to smell anymore , it actually has gotten worse !! We purchased our 2 acre home to spend time outdoors and cannot step foot outdoors with the horrible stench. Not only does this impact our health and property values (who wants to

MSW

have a mountain of waste view as soon as they step outside) but impacts the entire Kennedale community as well . Please consider a hearing for the Kennedale residents . Thank you . Jessica Monreal

**COMMENTS:** Kennedale residents cannot take more landfill smells, and this new plan will make that happen. Id like to propose a contested hearing, for the residents of Kennedale to voice their concerns over increasing the height and size of this landfill. First the price of water consumption goes up, now an expansion to the "dump"; people will be moving out of Kennedale at lightning speed which will defeat the plans to grow the town!
