COMMENTS: I am against the IESI Fort Worth C&D Landfill's request for permit to increase volume and types of waste and their being able to vertically expand the elevation and site operations. During the past several months the smell has been awful. So bad at times I thought the gas on my own property was leaking. Please do not allow this permit.

COMMENTS: In the past year, the landfill has really started to give off a foul odor. It smells like a natural gas leak. I don't really think it is wise to increase the size of the landfill until the current problems are addressed.

COMMENTS: Please do not approve this! It is already an eyesore for Kennedale residents and I know you all know that we have a problem with a horrible stench coming from the landfill. We bought our house in Kennedale because we love the school district but now we kind of regret it! The smell in the mornings and evenings is so bad it makes me nauseous. It really affects the quality of life when you don't even want to go

MSW

enjoy the outdoors just to avoid the smells! I feel this will only add to the problem! Please keep Kennedale residents in mind!

COMMENTS: After all of the recent problems with smells associated with this landfill and other landfills in the area I feel that this is a bad idea. The truck traffic and messes on Dick Price Rd are beyond ridiculous and so is the current height of the landfill. Over the past several months Progressive has been building taller mounds and it is not only an eyesore but a safety hazard as well. There are items being dumped there that are not

MCW

allowed by their permit, but it happens anyway. I've filed several complaints about the smells coming from the landfill and feel that allowing an increase to their permit will only make the situation and quality of life worse.

COMMENTS: My husband and I vehemently oppose the expansion of the landfill! In its current state and size there are already detrimental factors to the quality of life our family has. We can't open our windows without having to smell the dump. The stench also disseminates through our heating and cooling system so any chance of avoiding the smell of the dump within our home is not feasible. Not only does this affect our quality of life but we have genuine concerns about the air quality affecting our health , the health of our children and our pets.

My

We moved to this neighborhood because of the beauty of the area to include the nature preserve that abuts it but that is diminished due to the smells coming from the dump. Outside of the smell we are concerned about runoff as well. What the eye sore that is a mountain of trash would do to property values is also of concern to us . It is our sincere hope that this permit to expand be denied but at the very least the public that is directly affected by the expansion be given the opportunity to have our voices heard.

COMMENTS: My family and small children live within two miles of this landfill. We can't go outside and play some days because the natural gas smell is so strong from the landfill. Please do not expand the landfill. The methane smell can not be good for us and it makes going outside not very enjoyable. That's an awful way to live. We own our house and it has gotten worse every year. Makes us regret buying in Kennedale.

COMMENTS: The Landfill is an sore for the resident of Kennedale, the foul odors now coning from the landfill are a determent to the quality of life for residents living near in the City of Kennedale. The Truck traffic is dangerous on Dick Price as it's a narrow 2 lane road. The Landfill mounds already cause cell phone disruption by blocking the cell towers located to the west and south west of location. The landfill needs to be closed and moved to the southwest off the Chisholm Trail Parkway.
