## TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

January 11, 2007

TO: Persons on the attached mailing list.

RE: TexCom Gulf Disposal, LLC  
Permit Nos. WDW 410, WDW 411, WDW 412 and WDW 413

### **Decision of the Executive Director.**

The executive director has made a decision that the above-referenced permit application meets the requirements of applicable law. **This decision does not authorize construction or operation of any proposed facilities.** Unless a timely request for contested case hearing or reconsideration is received (see below), the TCEQ executive director will act on the application and issue the permit.

Enclosed with this letter is a copy of the Executive Director's Response to Comments. A copy of the complete application, draft permit and related documents, including public comments, is available for review at the TCEQ Central office. A copy of the complete application, the draft permit, and executive director's preliminary decision are available for viewing and copying at the Montgomery County Courthouse, 301 N. Main, Conroe, Texas 77301.

If you disagree with the executive director's decision, and you believe you are an "affected person" as defined below, you may request a contested case hearing. In addition, anyone may request reconsideration of the executive director's decision. A brief description of the procedures for these two requests follows.

### **How To Request a Contested Case Hearing.**

It is important that your request include all the information that supports your right to a contested case hearing. You must demonstrate that you meet the applicable legal requirements to have your hearing request granted. The commission's consideration of your request will be based on the information you provide.

The request must include the following:

- (1) Your name, address, daytime telephone number, and, if possible, a fax number.
- (2) If the request is made by a group or association, the request must identify:
  - (A) one person by name, address, daytime telephone number, and, if possible, the fax number, of the person who will be responsible for receiving all communications and documents for the group; and
  - (B) one or more members of the group that would otherwise have standing to request a hearing in their own right. The interests the group seeks to protect must relate to the organization's purpose. Neither the claim asserted nor the relief requested must require the participation of the individual members in the case.
- (3) The name of the applicant, the permit number and other numbers listed above so that your request may be processed properly.
- (4) A statement clearly expressing that you are requesting a contested case hearing. For example, the following statement would be sufficient: "I request a contested case hearing."

Your request must demonstrate that you are an **"affected person."** An affected person is one who has a personal justiciable interest related to a legal right, duty, privilege, power, or economic interest affected by the application. Your request must describe how and why you would be adversely affected by the proposed facility or activity in a manner not common to the general public. For example, to the extent your request is based on these concerns, you should describe the likely impact on your health, safety, or uses of your property which may be adversely affected by the proposed facility or activities. To demonstrate that you have a personal justiciable interest, you must state, as specifically as you are able, your location and the distance between your location and the proposed facility or activities.

Your request must raise disputed issues of fact that are relevant and material to the commission's decision on this application. The request must be based on issues that were raised during the comment period. The request cannot be based solely on issues raised in comments that have been withdrawn. The enclosed Response to Comments will allow you to determine the issues that were raised during the comment period and whether all comments raising an issue have been withdrawn. The public comments filed for this application are available for review and copying at the Chief Clerk's office at the address below.

To facilitate the commission's determination of the number and scope of issues to be referred to hearing, you should: 1) specify any of the executive director's responses to comments that you dispute; and 2) the factual basis of the dispute. In addition, you should list, to the extent possible, any disputed issues of law or policy.

## **How To Request Reconsideration of the Executive Director's Decision.**

Unlike a request for a contested case hearing, anyone may request reconsideration of the executive director's decision. A request for reconsideration should contain your name, address, daytime phone number, and, if possible, your fax number. The request must state that you are requesting reconsideration of the executive director's decision, and must explain why you believe the decision should be reconsidered.

## **Deadline for Submitting Requests.**

A request for a contested case hearing or reconsideration of the executive director's decision must be in writing and must be **received by** the Chief Clerk's office no later than **30 calendar days** after the date of this letter: You should submit your request to the following address:

LaDonna Castañuela, Chief Clerk  
TCEQ, MC-105  
P.O. Box 13087  
Austin, Texas 78711-3087

## **Processing of Requests.**

Timely requests for a contested case hearing or for reconsideration of the executive director's decision will be referred to the alternative dispute resolution director and set on the agenda of one of the commission's regularly scheduled meetings. Additional instructions explaining these procedures will be sent to the attached mailing list when this meeting has been scheduled.

## **How to Obtain Additional Information.**

If you have any questions or need additional information about the procedures described in this letter, please call the Office of Public Assistance, Toll Free, at 1-800-687-4040.

Sincerely,

LaDonna Castañuela  
Chief Clerk

---

**EXECUTIVE DIRECTOR'S RESPONSE TO PUBLIC COMMENT**

---

The Executive Director of the Texas Commission on Environmental Quality (TCEQ) files this Response to Public Comment on the applications by TexCom Gulf Disposal, LLC for Class I Underground Injection Control (UIC) permits and on the Executive Director's preliminary decision.

As required by Title 30, Texas Administrative Code, Section 55.156, before an application is approved, the Executive Director prepares a response to all timely, relevant and material, or significant public comments. The Office of Chief Clerk received timely comments from 526 persons.

The following elected official sent in an individual comment letter:

The Hon. Alan B. Sadler, County Judge, Montgomery County;

The following persons sent in individual comments letters and/or spoke at the public meeting:

Bruce Burnham  
Mary Hartt  
Shirley Hoagland  
Edgar Hoagland  
Ray Jackson  
Trudilee O'Neil  
Melvin Remley  
D. Renfro representing Blue River Investment

This response addresses all timely public comment received, whether or not withdrawn. If you need more information about these permit applications or the permitting process please call TCEQ Office of Public Assistance at (800) 687-4040. General information about TCEQ is available at the TCEQ website: [www.tceq.state.tx.us](http://www.tceq.state.tx.us).

### **Description of Facility**

TexCom Gulf Disposal, LLC proposes to operate a commercial industrial nonhazardous waste management facility. TexCom Gulf Disposal, LLC proposes to receive waste from off-site sources on a commercial basis. Wastes proposed to be disposed at this facility include aqueous waste with low solvents, aqueous waste with low concentrations of other toxic organics, spent acid without metals, acid aqueous waste, spent caustic, caustic aqueous waste, aqueous waste with reactive sulfides, aqueous waste with high dissolved solids, aqueous waste with low dissolved solids, scrubber waste, inorganic liquids, brine solution that could also bear the form code 113, halogenated/non-halogenated solvent mixture, oil water emulsion or mixture, concentrated aqueous solution of other organics, paint thinner or petroleum distillates, organic liquids, and ethylene glycol based antifreeze. The description and location of the proposed commercial industrial nonhazardous waste management facility is approximately 27 acres located at 16185 Creighton Road near the corner of Creighton Road and FM 3083 near Conroe, Montgomery County, Texas.

### **Clarification of Application Numbers**

TexCom Gulf Disposal, LLC submitted applications for proposed Permits No. WDW410, No. WDW411, No. WDW412, and No. WDW413 for the construction of underground injection wells. TexCom Gulf Disposal LLC has also applied for a permit to construct and operate a surface facility at this location. The proposed surface facility permit application is nonhazardous industrial solid waste permit No. 87758. Comments received by the Executive Director that referenced Permits No. WDW410, No. WDW411, No. WDW412, and No. WDW413, the materiality and relevancy of which actually apply to the surface facility permit, nonhazardous industrial solid waste permit No. 87758, are included in this response and will be addressed further in the Executive Director's Response to Public Comment for nonhazardous industrial solid waste permit No. 87758. Additionally, the Executive Director has included in this response

comments that referenced Permit No. 39002, TexCom Gulf Disposal, LLC, the materiality and relevancy of which actually apply to Permits No. WDW410, No. WDW411, No. WDW412, and No. WDW413.

### **Procedural History**

These permit applications are for new permits. The Executive Director received the permit applications on August 2, 2005. The Executive Director declared the applications administratively complete on August 31, 2005. TexCom Gulf Disposal, LLC published Notice of Receipt and Intent to Obtain Class I UIC Permits for these permit applications on September 20, 2005 in *The Courier* of Montgomery County. TCEQ, Office of Public Assistance held a public meeting on March 9, 2006 in Conroe, Texas. TexCom Gulf Disposal, LLC published Notice of Application and Preliminary Decision on July 9, 2006 in *The Courier* of Montgomery County (public notice). The public comment period ended on August 8, 2006. Because these applications were administratively complete after September 1, 1999, this action is subject to the procedural requirements adopted pursuant to House Bill 801.<sup>1</sup>

#### Access to Rules, Laws and Records

TCEQ Website	<a href="http://www.tceq.state.tx.us/">http://www.tceq.state.tx.us/</a>

TCEQ records on TexCom Gulf Disposal, LLC are available for viewing and copying and are located at the TCEQ Region 12 office located at 5425 Polk Street, Suite H, Houston TX 77023-1452.

---

<sup>1</sup> Tex. H.B. 801, 76<sup>th</sup> Leg., R.S. (1999).

Proposed permits No. WDW410, No. WDW411, No. WDW412, and No. WDW413 were made available for the public to view and duplicate at the Montgomery County Courthouse, 300 North Main Street, Conroe Texas, 77301.

If you would like to file a complaint, you may contact TCEQ at (888) 777-3186 or you may contact the TCEQ Regional office at 5425 Polk Street, Suite H, Houston, TX 77023-1452, phone (713) 767-3500. If a facility is found to be out of compliance, it may be subject to enforcement action according to TCEQ "Enforcement Initiation Criteria."

### **Comments and Responses**

Comments are organized by topic under the following headings:

- I. Concerns Relating to Siting
  - a. Location
  - b. Diminished Property Values
  - c. Traffic
  - d. Origin of Waste
- II. Surface Facility
- III. Land Use and Fault Restrictions
  - a. Migration of Waste
  - b. Faults
  - c. Proximity to Water Wells
- IV. Environmental and Human Health Issues
  - a. Air Quality and Odor
  - b. Noise
  - c. Illegal Dumping
  - d. Environmental Impact
- V. Enforcement
- VI. Administrative Procedures

VII. Opposition

I. Concerns Relating to Siting

I. a. Location

**Comment 1:**

Leah Smith and Mary Hartt commented that too many landfills and waste facilities are concentrated in east Montgomery County. Bruce Burnham commented that the location of the site for the proposed wells is a residential area not an industrial area. Melvin Remley and Barbara Smith commented that waste disposal facilities should be located in an area where fewer people reside such as west Texas.

**Response 1:**

TCEQ jurisdiction is established by the Legislature and is limited to the issues set forth in the Texas Water Code, Chapter 27. In determining whether to approve or deny a Class I Underground Injection Control permit application, the Executive Director considers siting criteria listed in TCEQ rules located at Texas Administrative Code, Chapter 30, Section 331.121(c). The Executive Director does not have jurisdiction to consider whether land in the area of the proposed Class I UIC wells is currently being used for residential or commercial purposes, how many existing waste disposal facilities are located in the area of the proposed injection wells, or the proximity of the proposed facility to existing waste disposal facilities. The siting criteria the Executive Director must consider include the proximity of the proposed injection formation to an underground source of drinking water (USDW) or freshwater aquifer; the geologic suitability of the injection zone to receive wastes; and the subsurface location and characteristics of the confining zone. Except under limited circumstances, which do not exist

under this particular permit application, the issuance of a permit cannot be denied on the basis of the facility location. The Executive Director has made a preliminary decision that these proposed permits meet all statutory and regulatory requirements.

### **I. b. Diminished Property Values**

#### **Comment 2:**

Edgar Hoagland and Shirley Hoagland commented that the proposed facility would diminish the value of their homestead.

#### **Response 2:**

TCEQ jurisdiction is established by the Legislature established and is limited to the issues set forth in statute. Accordingly, the Executive Director does not have jurisdiction under the Texas Water Code, Chapter 27 or under TCEQ rules to consider property values when determining whether to approve or deny a permit application. However, TCEQ regulatory jurisdiction does not affect or limit the ability of a landowner to seek relief from a court in response to activities that interfere with the landowner's use and enjoyment of his property. If TexCom Gulf Disposal LLC is issued these permits, the permits would not authorize TexCom Gulf Disposal LLC to injure persons, to injure property, to invade property rights, or to infringe upon any state or local law or regulation as stated on page 5 of draft permit WDW 410 and on page 6 of draft permits WDW 411, WDW 412, and WDW 413.<sup>2</sup>

---

<sup>2</sup> 30 TEX. ADMIN. CODE § 305.122(c) (2006).

### **I c. Traffic**

#### **Comment 3:**

Bruce Burnham, Mary Hartt, Group "B", Group "A," Trudilee O'Neil, D. Renfro, Leah Smith, and Richard Ward commented that the injection well operations will generate too much truck traffic, that the roads in the vicinity of the site of the proposed wells are inadequate to handle the increased traffic volume, and that the increased traffic volume will increase the risk of vehicular accidents creating a safety hazard.

#### **Response 3:**

The Texas Water Code, Chapter 27 does not include traffic and related issues within TCEQ authority. Accordingly, when determining whether to approve or deny a Class I Underground Injection Control permit application, the Executive Director does not have jurisdiction to consider additional traffic, excessive or undesirable noise, or air pollution. However, TCEQ rules prohibit discharge of air contaminants in a way injurious to or adversely affecting human health, and prohibit creating or maintaining a condition of nuisance that interferes with a landowner's use and enjoyment of his property.<sup>3</sup> Additionally, the scope of the TCEQ regulatory jurisdiction does not affect or limit the ability of a landowner to seek relief from a court in response to activities that interfere with the landowner's use and enjoyment of his property.

### **I. d. Origin of Waste**

---

<sup>3</sup> 30 TEX. ADMIN. CODE § 101.4 (2006).

**Comment 4:**

Mary Hartt and Trudilee O'Neil commented that the majority of the waste destined for the proposed injection wells originates outside of Montgomery County. Trudilee O'Neal commented that new waste facilities should be located in Harris County because the majority of the waste originates in Harris County.

**Response 4:**

When determining whether to grant a Class I UIC permit application, the Executive Director does not have jurisdiction under the Texas Water Code, Chapter 27 or TCEQ rules to consider the origin of waste that will be disposed of at the proposed facility.

**Comment 5:**

Edgar Hoagland and Shirley Hoagland commented that TexCom Gulf Disposal, LLC refused to identify sources of the waste to be disposed of in the proposed wells when the question was asked at the public meeting held for these permit applications.

**Response 5:**

TexCom Gulf Disposal, LLC identified proposed potential waste sources by industries and processes in Section IX., "Wastes and Waste Management" of the application.<sup>4</sup> TexCom Gulf

---

<sup>4</sup> 30 TEX. ADMIN. CODE § 331.121 (G)(iii) (2006).

Disposal, LLC provided the following list of businesses and entities for whom it might provide waste disposal services: Alpha Omega Recycling, Inc.; American Spring Wire Corp; Arnold Forest Products; ATMI Materials, LTD; Babn Technologies, Inc.; Benchmark Performance Group, Inc.; BP Amoco Chemical Company; Celanese LTD; Chemicals, Inc.; Coastal Chemical Co., LC; Drexel Oilfield Services, Inc.; E.I. Du Pont De Nemours and Company; Enterprise Products Operating, LP; Environmental Processing Systems, LC; Fairmont Minerals; Hilo Auto Supply, LP; Huntsman Petrochemical Corporation; Kelly-Moore Paint Company, Inc.; Kinder Morgan Energy partners, LP; Louisiana-Pacific Corporation; Marathon Ashland Petroleum, LLC; Matheson Tri-Gas; Metton America, Inc.; The Metallic Products Corporation; Nalco Energy Services, Inc.; National Flame & Forge, Inc.; Pasadena Pulp Co., Inc.; Pennzoil-Quaker State Company; Permian Mud Services, Inc.; Praxair, Inc.; PVI Industries, LLC; Rescar, Inc.; Sartomer Company, Inc.; Schirm USA, Inc.; Shawcor Pipe Protection, LLC; Shell Chemicals, LP; Shell Oil Company; Southwest Shipyard, LP; TexCom Gulf Disposal, LLC (onsite); Tompkins Industries, Inc.; Tuboscope Vetco International, Inc.; Univar USA, Inc.; Vopak Logistics Services USA, Inc.; Vopak Terminal Deer Park, Inc.; Vopak USA, Inc.; West Texas Drum Company, Inc. The Executive Director considered information TexCom Gulf Disposal LLC provided about proposed waste sources when evaluating the applications.

## **II. Surface Facility**

### **Comment 6:**

D. Renfro commented that TexCom Gulf Disposal, LLC is not allowed to adjust the pH of waste, combine waste, or treat waste onsite prior to injection. D. Renfro asked whether waste will be treated at the surface before injection.

**Response 6:**

Provision V.C in draft permit WDW410 and provision VI.C in draft permits WDW411, WDW412 and WDW413 specify that the pH of injected waste streams shall be greater than 3.0 and less than 9.0. The waste received at the TexCom Gulf Disposal, LLC facility is to be processed in surface units prior to injection to ensure the waste meets all permit parameters. Surface units and above-ground waste processing associated with the proposed injection wells will not be regulated under proposed permits, No. WDW410, No. WDW411, No. WDW412, or No. WDW413. If TCEQ issues these proposed WDW permits and if TCEQ issues proposed Industrial Nonhazardous Waste Permit No. 87758, the surface units and any above-ground waste processing associated with the proposed injection wells will be regulated by pending proposed Industrial Nonhazardous Waste Permit No. 87758 if TCEQ issues this permit.

**Comment 7:**

Mary Hartt, Melvin Remley and Barbara Smith commented that spills at the surface facility would contaminate adjacent land, and water wells. Mary Hartt, Melvin Remley, Barbara Smith, Edgar Hoagland, and Shirley Hoagland commented that the surface facility should be covered with a nonpermeable material, such as concrete, to prevent surface contamination in the event of spills. Edgar Hoagland and Shirley Hoagland commented that the surface facility design does not provide secondary containment capable of holding the capacity of the tanks that will be located at the facility.

**Response 7:**

These comments are not relevant or material to the proposed Class I UIC well permits, No. WDW410, No. WDW411, No. WDW412, and No. WDW413 because these permits do not cover surface units and above-ground waste processing. The pending permit application for surface operations associated with the proposed injection wells is Industrial Nonhazardous Waste Permit No. 87758. Therefore, these comments do not apply to the Executive Director's evaluation of the proposed UIC permit applications.

**III. Land Use and Fault Restrictions**

**III. a. Migration of Waste**

**Comment 8:**

Leah Smith commented that leaks or failure of these wells would result in upward migration of highly pressurized waste fluids through a series of small faults into shallower lower pressure zones.

**Response 8:**

The proposed Class I UIC wells are required to have a confining zone overlying the injection zone. The confining zone is the section between the injection zone and the lowermost underground source of drinking water (USDW) that acts as a barrier to upward movement of fluids out of the injection zone. Both the confining and injection zones must be below all USDWs. The confining zone for the proposed Class I UIC wells consists mostly of impermeable shale beds of the Jackson Formation extending from approximately 4100 to 5100 feet below ground. Additionally, the confining zone is separated from the base of the lowermost USDW by

permeable and less permeable zones that will provide added protection for the USDW in the event of fluid movement in an unlocated borehole or transmissive fault. Sands with lower than normal formation pressure are bleed off zones that provide additional protection.

### **III b. Faults**

#### **Comment 9:**

Leah Smith commented that the numerous faults shown by 3D Seismic are not accurately depicted by fault cuts in wells.

#### **Response 9:**

Generally speaking, faults in the Gulf Coast area do not transmit injection fluids out of injection zones for two reasons. First, the behavior of the shales above the injection zone would cause sealing of any fractures that extended upward from the reservoir. Second, the increased reservoir pressures, due to injection, at the locations of the faults, would be insufficient to move fluids upward into overlying aquifers. The Executive Director reviewed the Class I UIC well permit applications checking for faults with characteristics which would allow migration of injected wastewater into USDWs. The Executive Director checks for fault characteristics including permeability, throw (movement from one side relative to the other), and the vertical extent of faults. TexCom Gulf Disposal, LLC's application contained no data indicating the presence of transmissive faults within the 2½ mile radius area of review. Additionally, the Executive Director reviewed oil well logs, Railroad Commission of Texas maps, and topographical maps of the area within a 2½ mile radius of the proposed Class I UIC wells and found no transmissive faults.

### **III. c. Proximity to Water wells**

**Comment 10:**

Shirley Hoagland, Richard Ward, Freeman Suttles, Leah Smith, Trudilee O'Neil, and the Honorable Alan Sadler commented that the location of the site of the proposed injection wells is too close to existing water wells. Group "A" commented that multiple drinking water wells including a registered Public Water System, PWS ID #0200488, are located within one quarter mile of the site of the proposed wells.

**Response 10:**

The Executive Director has determined that operation of these proposed Class I UIC wells according to the requirements of the proposed permits and UIC rules should not adversely affect the quality of groundwater or the water table elevation of local drinking water aquifers. Express permit provisions require that the injection zone be isolated from the local drinking water aquifers and that the proposed wells conform to the regulatory requirements located in Texas Administrative Code Chapter 30, Section 331.121. To ensure that injected wastewater remains permanently isolated from drinking water resources, monitoring requirements stated in the proposed permit and Texas Administrative Code Chapter 30, Section 331.64 address three primary concerns:

1. Mechanical Integrity of the Wells

TCEQ rules prohibit injection for Class I UIC disposal wells that lack mechanical integrity.<sup>5</sup> Mechanical integrity of a Class I UIC well is defined as "no significant leak in the well's casing, tubing, or packer; and . . . no significant fluid movement through vertical channels adjacent to

---

<sup>5</sup> 30 TEX. ADMIN. CODE § 331.3 (2006).

the injection well bore.”<sup>6</sup> Class I UIC wells are required to be continuously monitored for leaks.<sup>7</sup> Gauges and recorders must be maintained in proper operating condition to provide accurate monitoring data.<sup>8</sup> Class I UIC well operators are required to demonstrate mechanical integrity of each well annually.<sup>9</sup> To make this demonstration, Operators must conduct a pressure test of the casing, tubing, and packer, and conduct a radioactive tracer survey.<sup>10</sup> The radioactive tracer survey demonstrates whether the injected waste is going into the permitted injection zone.<sup>11</sup>

## 2. Prevention of Subsurface Fracturing Resulting from Excessive Injection Pressure

TCEQ rules and draft permit provisions VII (WDW410) and VIII (WDW411, WDW412 and WDW413) prohibit starting or extending fractures in the rocks of the injection zone.<sup>12</sup> The injection zone is defined in the proposed permits as the Cockfield Formation at the well log depths of 5134 to 6390 feet. Fracturing of the injection zone could create paths for fluid movement out of the injection zone. The calculated maximum allowable surface injection pressure specified in the draft permits, 1250 pounds per square inch gauge, includes multiple safety factors to guard against subsurface fracturing. TCEQ rules require continuous monitoring of surface injection pressure, automatic alarms, and either automatic shutdown devices or immediate operator response to alarms.<sup>13</sup>

## 3. Pressure Buildup in the Injection Zone from Well Operation

Predicted maximum pressure buildup in the injection zone has been calculated for the area within

---

<sup>6</sup> 30 TEX. ADMIN. CODE § 331.43(a) (2006).

<sup>7</sup> 30 TEX. ADMIN. CODE § 331.64 (2006).

<sup>8</sup> *Id.*

<sup>9</sup> *Id.*

<sup>10</sup> *Id.*

<sup>11</sup> *Id.*

<sup>12</sup> 30 TEX. ADMIN. CODE § 331.63(b) (2006).

<sup>13</sup> 30 TEX. ADMIN. CODE § 331.64 (2006).

2½ miles of the proposed wells. The pressure calculations are based on an assumption of well operation for 10 years at maximum permitted injection rates. The calculated pressure increases have been evaluated with records of other wells in the area to reach a conclusion that injection within the allowable rates specified in proposed permit Provision VII (WDW410) and VIII (WDW411, WDW412 and WDW413) will safely maintain isolation of the injection zone from drinking water resources, without need for corrective action on any existing wells. Proposed permit provisions, VIII (WDW410) and IX (WDW411, WDW412 and WDW413) require the operator to monitor the injection zone pressure annually to determine whether the pressure is maintained within the range predicted for operations protective of drinking water resources. An injection zone pressure monitoring data report must be submitted annually to TCEQ. To maintain safety of the operation, TCEQ evaluates this report annually and determines whether to require permit amendments to limit injection rates or whether corrective action is required for any wells in the area. For more information please see response number eight under III a. above.

#### **IV. Environmental and Human Health Issues**

##### **IV. a. Air Quality and Odor**

###### **Comment 11:**

Edgar Hoagland, Shirley Hoagland, and Melvin Remley commented that the waste operations associated with these proposed injection wells lack air pollution control devices, and that TCEQ should require an emissions permit and odor control measures of the surface facility. Trudilee O'Neil commented that waste hauling trucks are a source of odor and air pollution.

###### **Response 11:**

Air pollution and odor are not factors that the Executive Director evaluates when determining whether to approve or deny a Class I UIC permit application under the Texas Water Code, Chapter 27. However, TCEQ rules prohibit creating or maintaining a nuisance and prohibit endangerment of the public health and welfare.<sup>14</sup> Any person experiencing air pollution or odor from the facility should call the TCEQ Regional office in Houston at 713-767-3500, or call the toll-free Environmental Violation Hotline at 1-888-777-3186.

#### **IV. b. Noise**

##### **Comment 12:**

Edgar Hoagland and Shirley Hoagland commented that pump operation and truck traffic will generate unbearable noise. Barbara Smith commented that truck drivers congregating before and after unloading will make excessive noise and conduct themselves in a manner unsuitable for a residential neighborhood.

##### **Response 12:**

The Legislature established TCEQ jurisdiction over regulation of Class I UIC wells. TCEQ jurisdiction is limited to the issues set forth in statute. Accordingly, the Executive Director does not have jurisdiction to consider noise when determining whether to approve or deny a Class I UIC permit application. TCEQ regulatory jurisdiction does not affect or limit the ability of a landowner to seek relief from a court in response to activities that interfere with the landowner's use and enjoyment of his property. TCEQ rules provide that "the issuance of a permit does not authorize any injury to persons or property or an invasion of other property rights, or any

---

<sup>14</sup> 30 TEX. ADMIN. CODE §§ 335.4(2)-(3) (2006).

infringement of state or local law or regulations.<sup>15</sup> Additionally, TCEQ rules prohibit creating or maintaining a nuisance and prohibit endangerment of the public health and welfare.<sup>16</sup>

#### **IV. c. Illegal dumping**

##### **Comment 13:**

Mary Hartt and Ray Jackson commented that waste haulers transporting waste to permitted waste facilities dump waste illegally in east Montgomery County polluting the water, air, and land and burdening tax payers with clean up costs. Mary Hartt and Melvin Remley commented that recently waste haulers have disposed of waste illegally in creeks and on the land in this part of Montgomery County. Melvin Remley and Barbara Smith commented that polluted lakes, rivers, streams and creeks in east Montgomery County are hazardous to human health.

##### **Response 13:**

Illegal dumping is a violation of state law. Waste handlers are permitted separately from the facilities they serve and deliver waste to. Any person who witnesses illegal dumping should call the TCEQ Regional office in Houston at 713-767-3500, or call the toll-free Environmental Violation Hotline at 1-888-777-3186.

#### **IV. d. Environmental Impact**

##### **Comment 14:**

---

<sup>15</sup> 30 TEX. ADMIN. CODE § 305.122(c) (2006).

<sup>16</sup> 30 TEX. ADMIN. CODE §§ 335.4(2)-(3) (2006).

The Honorable Alan Sadler commented that the site of the proposed wells is located in an environmentally sensitive part of the county.

**Response 14:**

The Executive Director has reviewed the permit application in accordance with the applicable law, policy and procedures, and TCEQ's mission to protect Texas' human and natural resources consistent with sustainable economic development. If the facilities are operated as specified in the permit terms and conditions, the Class I UIC waste disposal wells covered by this permit should not adversely impact people or water quality. Individuals are encouraged to report any environmental concerns at the site by contacting the TCEQ Houston Regional Office at 713-767-3500, or by calling the twenty-four hour toll-free Environmental Complaints Hotline at 1-888-777-3186. TCEQ investigates all complaints it receives. If the facility is found to be out of compliance with the terms and conditions of the permit, it will be subject to possible enforcement action.

**V. Enforcement**

**Comment 15:**

Mary Hartt and Ray Jackson commented that TCEQ does not enforce the permits it issues and that TCEQ allows permittees to self-police.

**Response 15:**

A permittee is subject to potential enforcement action for failure to comply with TCEQ rules or permits. TCEQ has an inspection program for wells which forms the basis for enforcement actions which may include civil or criminal penalties. TCEQ rules require permittees to

continuously monitor and record injection tubing pressures, injection flow rates, injection fluid temperatures, injection volumes, tubing-long string casing annulus pressures and volumes, and any other data specified by the permit.<sup>17</sup> Additionally, the permittee must notify the Executive Director and shut in a well when and if pressures and flow rates or other parameters approved by the Executive Director exceed a range and/or gradient specified in the permit; when a well appears to be lacking mechanical integrity; or when the owner or operator obtains evidence that there may have been a release of injected wastes into an unauthorized zone.<sup>18</sup> TCEQ inspections include review of onsite monitoring record. Individuals are encouraged to report any environmental concerns at the site by contacting the TCEQ Houston Regional Office at (713) 767-3500, or by calling the twenty-four hour toll-free Environmental Complaints Hotline at (888) 777-3186. The TCEQ investigates all complaints it receives. If the facility is found to be out of compliance with the terms and conditions of the permit, it will be subject to possible enforcement action.

## **VI. Administrative Procedures**

### **Comment 16:**

Mary Hartt and Ray Jackson commented that the TCEQ web site indicates that the status of these permit applications is active, and that TCEQ staff has stated and that the published public notice for these permit applications indicates that the injection wells are not actively receiving waste.

### **Response 16:**

This comment refers to the words TCEQ Office of the Chief Clerk (OCC) uses to denote the status of permits in its database. The word "active" listed under application status denotes that a

---

<sup>17</sup> 30 TEX. ADMIN. CODE § 331.64 (2006).

<sup>18</sup> *Id.*

permit is currently being processed by OCC. Following issuance or denial of a permit application, OCC lists a permit's status designation as "closed." These proposed Class I UIC well permits are listed as "active" in OCC's database. This "active" designation does not indicate whether a well has been constructed or whether a facility is actively receiving or disposing of waste.

**Comment 17:**

Mary Hartt commented that Industrial Hazardous waste was not included in the notice published for this application.

**Response 17:**

The published notice was not required to list hazardous waste because TexCom Gulf Disposal, LLC has proposed to operate a commercial industrial **nonhazardous** waste management facility. These proposed injection well applications do not contemplate disposal of hazardous waste in the proposed Class I UIC wells.

**Comment 18:**

Melvin Remley asked why a former permit from this facility wasn't sold or taken over by someone else. Group "A" commented that TCEQ's predecessor agency, Texas Natural Resource Conservation Commission, denied permit applications, WDW-167 and WDW-193, submitted by Future Environmental Systems, Inc. for this same location.

**Response 18:**

Originally, proposed permit WDW410 was issued on February 7, 1994 to Crossroads

Environmental, Inc. as permit WDW315. An endorsement to permit WDW315 was issued on March 10, 1995 to correct the subheading on the first page of the permit, and a minor modification was issued on October 29, 1999 to modify the construction plans of the well. The well was subsequently owned and drilled by EarthCare Company which filed voluntary bankruptcy on April 11, 2002. Surface units were never constructed and the well was never used due to a lack of the funds required to construct the surface units. Permit WDW315 expired on February 7, 2004. The well was scheduled to be plugged. Subsequently, RLI Insurance Company posted financial assurance for the well. A settlement agreement signed by EarthCare Company, TCEQ, RLI Insurance Company and Texas Commercial Resources, Inc. (TCRI) stipulated sale of the property to TCRI on or before February 15, 2005. Because the original permit, WDW315, had expired, the settlement agreement required submittal of a new permit application by May 13, 2005. The agreement included conditions for monitoring and testing of the existing well. TCRI is the precursor to TexCom, Inc., and TCRI assigned to TexCom, Inc. all its rights and obligations relating to the Conroe property and WDW315. Subsequently, TexCom Gulf Disposal, LLC (TGD) was formed as a wholly-owned subsidiary of TexCom, Inc. TGD was formed to own, manage and operate certain disposal businesses developed or acquired by TexCom, Inc., including the proposed new Class I UIC well WDW410 at the Conroe property.

**Comment 19:**

The Honorable Alan Sadler commented that the application was notarized in Louisiana.

**Response 19:**

The initial application was notarized by an out-of-state notary. TCEQ rules do not require that signatures be notarized by notaries for the state of Texas. However, at the Executive Director's request, subsequent submissions from TexCom Gulf Disposal, LLC were notarized by notaries

for the state of Texas.

## **VII. Opposition**

### **Comment 20:**

The Honorable Alan Sadler, Richard Ward, Melvin Remley, Barbara Smith, Ray Jackson, and Group "B" commented that they are opposed to issuance of these permits and that they are opposed to waste disposal by injection in this area. Mary Hart and Ray Jackson commented that TCEQ advocates for the waste industry and does not advocate for Texas citizens. Mary Hart and Ray Jackson commented that TCEQ should be more responsive to citizens, prevent and reduce pollution, and should not approve every permit requested.

### **Response 20:**

The Executive Director has reviewed the permit application in accordance with the applicable law, policy and procedures, and TCEQ's mission to protect Texas' human and natural resources consistent with sustainable economic development. If the facilities are operated as specified in the permit terms and conditions, the waste disposal wells covered by this permit should not adversely impact people or water quality. Individuals are encouraged to report any environmental concerns at the site by contacting the TCEQ Houston Regional Office at (713) 767-3500, or by calling the twenty-four hour toll-free Environmental Complaints Hotline at 1-(888) 777-3186. The TCEQ investigates all complaints received. If the facility is found to be out of compliance with the terms and conditions of the permit, it will be subject to possible enforcement action.

CHANGES MADE IN RESPONSE TO COMMENT

No changes to the draft permits have been made in response to public comment.

Respectfully submitted,

Texas Commission on Environmental Quality
