EMERGENCY ORDERS

Item 8 **[Docket No. 2015-0219-WR.](#)**

Update

Consideration of whether to affirm, modify, or set aside the Emergency Order issued by the Executive Director (ED) on February 18, 2015, under Tex. Water Code §§ 11.148 and 5.506 to the Lower Colorado River Authority (LCRA). The ED's Emergency Order grants LCRA's request for an emergency order by partially suspending a requirement of its 2010 Water Management Plan (WMP), Permit No. 5838 to maintain a minimum streamflow of 500 cubic feet per second (cfs) for six weeks in between March and May from Bastrop to Eagle Lake for the Blue Sucker. Specifically, the Emergency Order reduces the minimum streamflow requirement to 300 cfs. Without the Emergency Order this requirement could necessitate a release of stored water of approximately 21,000 acre feet (AF) by the end of May 2015. By granting LCRA's requested relief, the Emergency Order will prevent approximately 17,000 AF from being released from Lakes Buchanan and Travis. LCRA has the right to divert and use up to 1.5 million acre feet from Lakes Buchanan and Travis, in Travis, Llano, and Burnet Counties, Texas, under Certificates of Adjudication Nos. 14-5478 and 14-5482. These certificates require LCRA to develop the WMP, Permit No. 5838, which provides how LCRA makes water available from these lakes to help meet "firm" water customer needs, downstream interruptible irrigation demands, and environmental flow needs of Matagorda Bay and the Lower

Colorado River. (Kathy Alexander, Ruth Takeda)

Consideration of whether to affirm, modify, or set aside an Emergency Order issued by the Executive Director (ED) on February 18, 2015, under Tex. Water Code § 11.139, to the Lower Colorado River Authority (LCRA) to amend its 2010 Water Management Plan (WMP), Permit No. 5838. The Emergency Order grants LCRA's request to temporarily change the process required in its 2010 WMP for curtailment of interruptible stored water at higher levels of combined storage in Lakes Buchanan and Travis. LCRA has the right to divert and use up to 1.5 million acre feet from Lakes Buchanan and Travis, in Travis, Llano, and Burnet Counties, Texas, under Certificates of Adjudication Nos. 14-5478 and 14-5482. These certificates require LCRA to develop the WMP, Permit No. 5838, which provides how LCRA makes water available from these lakes to help meet "firm" water customer needs, downstream interruptible irrigation demands, and environmental flow needs of Matagorda Bay and the Lower Colorado River. The WMP also provides how LCRA will manage and curtail supplies from the lakes during times of drought including through a repeat of the Drought of Record. Due to the drought and continuing low inflows, on December 23, 2014, LCRA requested an emergency order suspending any obligation LCRA might have under the 2010 WMP to release interruptible stored water to customers in the Gulf Coast, Lakeside, and Pierce Ranch irrigation operations. The ED granted LCRA's requested relief by issuing an emergency order that expires on June 18, 2015, but may be renewed one time for no more than 60 days. (Kathy Alexander, Robin Smith)
