This application was processed in an expedited manner, as allowed by the commission's rules in 30 Texas Administrative Code, Chapter 101, Subchapter J. The proposed facility will emit the following contaminants: organic compounds, nitrogen oxides, carbon monoxide, sulfur dioxide, hazardous air pollutants, and particulate matter including particulate matter with diameters of 10 microns or less and 2.5 microns or less.

The executive director has completed the technical review of the application and prepared a draft permit which, if approved, would establish the conditions under which the facility must operate. The executive director has made a preliminary decision to issue the permit because it meets all rules and regulations.

A public meeting is not a contested case hearing under the Administrative Procedure Act. During the Informal Discussion Period, the public will be encouraged to ask questions of the applicant and TCEQ staff concerning the permit application. The comments and questions submitted orally during the Informal Discussion Period will not be considered before a decision is reached on the permit application and no formal response will be made. Responses will be provided orally during the Informal Discussion Period. At the conclusion of the comment period, all formal comments will be considered before a decision is reached on the permit application. A written response to all formal comments will be prepared by the Executive Director and will be sent to each person who submits a formal comment or who requested to be on the mailing list for this permit application and provides a mailing address.
