Dr. Gary E. Saul
Texas Parks and Wildlife Department
4200 Smith School Road
Austin, Texas 78744

Dear Dr. Saul:

Bycatch and fishery discards are pressing problems that take many shapes and many forms in the world's fisheries. Natural Resources Consultants, Inc. (NRC) is seeking your assistance in a review of the nature and scope of fish, mammal, seabird, and turtle bycatch in these fisheries. During background work in preparation for the research, your contributions to the bycatch issues were noted in an article entitled, "Reducing the Bycatch in a Commercial Trawl Fishery". Recognizing your experience in this area, we would greatly appreciate reprints or references to other bycatch-related articles published by you or colleagues with whom you are familiar. We are very interested in articles providing data on target species harvest volumes, bycatch removals, bycatch rates, amounts discarded, survival rates, and socio-cultural attitudes towards bycatch.

In turn, we have enclosed a copy of the set of bibliographic citations for bycatch references maintained in our library. If there are articles of interest to you on this list we would be happy to make copies for you or make the necessary arrangements to have those articles delivered to you. As we add to the library with articles received from you and others we will update the list of citations and, at the close of the study, mail copies of the revised list of citations to contributing authors.

Thank you for your assistance. With your help, we hope to make the ongoing study the most comprehensive review and analysis of the bycatch problem available to date.

Sincerely,

NATURAL RESOURCES CONSULTANTS, INC.

Two handwritten signatures are present. The first signature on the left is for Mark H. Freeberg, and the second signature on the right is for Dr. Dayton L. Alverson. Both signatures are written in dark ink and are somewhat stylized.

Mark H. Freeberg

Dr. Dayton L. Alverson
