

## LIST OF TABLES

<i>Table No.</i>	<i>Title</i>	<i>Page</i>
2.1	Historical loading of BOD <sub>5</sub> to Galveston Bay system (circa 1970)	21
2.2	Estimates of Municipal and Industrial Wastewater Discharges by County (circa 1970)	23
2.3	Estimates of salt brine discharges and disposal method by county in the Galveston Bay area (circa 1961)	24
2.4	Neleigh's estimated loads of selected pollutants into the Galveston Bay system by water quality segment (circa 1974)	26
2.5	Neleigh's estimated loads of selected pollutants into the Galveston Bay system by pollutant (circa 1974)	30
2.6	Estimated loading of nonconventional and toxic pollutants into the Galveston Bay system (1985-87)	33
2.7	Estimates of selected pollutant loadings into the Galveston Bay system (1985-87) from permitted dischargers and major tributaries	36
2.8	Annual pollutant discharges by major source category and percent of annual total discharge (1987)	40
2.9	Non-point source loads into Galveston Bay for average (1987) year	42
3.1	Texas Water Quality Segments used to aggregate point source loading estimates	51
3.2	Water quality parameters included in point source loading estimates	52
3.3	Effluent parameter code prefix and suffix match	54
3.4	Typical Pollutant Concentrations from Pacheco et al. (1990)	61
3.5	Texas Water Commission source of wastewater codes	63
3.6	Ratios used to correct Typical Pollutant Concentrations from experience with Galveston Bay system dischargers	68
3.7	Example of effluent load summary for discharges into the Galveston Bay system in 1990	69
3.8	Determination of allowable concentrations of metals in effluents discharging to marine and estuarine waters	73
3.9	Typical pollutant concentrations corrected to meet current Texas surface water quality criteria	75
3.10	USGS gauge names, numbers, and drainage areas used in estimating tributary loading into Galveston Bay	77
3.11	Annual inflows to Lake Houston (1965-88)	83
3.12	Evaporation from Lake Houston (1965-88)	84
3.13	Withdrawals from Lake Houston (1965-88)	85
3.14	Changes in storage in Lake Houston (1965-88)	86
3.15	Annual water balance in Lake Houston (1965-88)	88
4.1	Summary of statistics for 30-day average BOD <sub>5</sub> concentrations in selected individual municipal wastewater discharges for 1990	93
4.2	Summary of statistics for constituents in industrial wastewater discharges for 1990	95
4.3	Total effluent flows into Galveston Bay in 1990	96

4.4	Effluent flows without cooling water into Galveston Bay in 1990	97
4.5	Effluent loads of BOD <sub>5</sub> into Galveston Bay in 1990	98
4.6	Effluent loads of TSS into Galveston Bay in 1990	100
4.7	Effluent loads of oil and grease into Galveston Bay in 1990	101
4.8	Effluent loads of total nitrogen into Galveston Bay in 1990	102
4.9	Effluent loads of total phosphorus into Galveston Bay in 1990	103
4.10	Effluent loads of total fecal coliforms into Galveston Bay in 1990	104
4.11	Effluent loads of total arsenic into Galveston Bay in 1990	106
4.12	Effluent loads of total cadmium into Galveston Bay in 1990	107
4.13	Effluent loads of total chromium into Galveston Bay in 1990	108
4.14	Effluent loads of total copper into Galveston Bay in 1990	109
4.15	Effluent loads of total iron into Galveston Bay in 1990	110
4.16	Effluent loads of total lead into Galveston Bay in 1990	111
4.17	Effluent loads of total mercury into Galveston Bay in 1990	112
4.18	Effluent loads of total zinc into Galveston Bay in 1990	113
4.19	Effluent loads of PCB into Galveston Bay in 1990	114
4.20	Effluent loads of total arsenic into Galveston Bay in 1990 with revised Typical Pollutant Concentrations	116
4.21	Effluent loads of total cadmium into Galveston Bay in 1990 with revised Typical Pollutant Concentrations	117
4.22	Effluent loads of total chromium into Galveston Bay in 1990 with revised Typical Pollutant Concentrations	118
4.23	Effluent loads of total copper into Galveston Bay in 1990 with revised Typical Pollutant Concentrations	119
4.24	Effluent loads of total lead into Galveston Bay in 1990 with revised Typical Pollutant Concentrations	120
4.25	Effluent loads of total mercury into Galveston Bay in 1990 with revised Typical Pollutant Concentrations	121
4.26	Effluent loads of total zinc into Galveston Bay in 1990 with revised Typical Pollutant Concentrations	122
4.27	Summary of effluent loads of constituents into Galveston Bay in 1990	123
4.28	Metals loading from tributaries into Galveston Bay corrected from dissolved to total metal loading	152
4.29	Annual areal tributary loads	153
4.30	Flows from waste discharges (1990) and tributaries (1968-88 average) including cooling water	155
4.31	Flows from waste discharges (1990) and tributaries (1968-88 average) excluding cooling water flows	156
4.32	Loading from waste discharges (1990) and tributaries (1968-88 average) for BOD <sub>5</sub>	157
4.33	Loading from waste discharges (1990) and tributaries (1968-88 average) for total suspended solids	158
4.34	Loading from waste discharges (1990) and tributaries (1968-88 average) for total nitrogen	159
4.35	Loading from waste discharges (1990) and tributaries (1968-88 average) for total phosphorus	160
4.36	Loading from waste discharges (1990) and tributaries (1968-88 average) for oil and grease	162

4.37	Loading from waste discharges (1990) and tributaries (1968-88 average) for fecal coliform bacteria	163
4.38	Loading from waste discharges (1990) and tributaries (1968-88 average) for total arsenic	164
4.39	Loading from waste discharges (1990) and tributaries (1968-88 average) for total cadmium	165
4.40	Loading from waste discharges (1990) and tributaries (1968-88 average) for total chromium	166
4.41	Loading from waste discharges (1990) and tributaries (1968-88 average) for total copper	167
4.42	Loading from waste discharges (1990) and tributaries (1968-88 average) for total iron	168
4.43	Loading from waste discharges (1990) and tributaries (1968-88 average) for total lead	169
4.44	Loading from waste discharges (1990) and tributaries (1968-88 average) for total mercury	170
4.45	Loading from waste discharges (1990) and tributaries (1968-88 average) for total zinc	171
4.46	Loading from waste discharges (1990) and tributaries (1968-88 average) for PCB	172
4.47	Active permitted tidal disposal brine discharges in Galveston Bay in 1992	173
5.1	Comparison of annual pollutant discharges from wastewater discharges from this study and those of Pacheco et al. (1990)	179
5.2	Summary of constituent loads into the Galveston Bay system from point sources, tributaries, and non-point sources	181
