

LIST OF FIGURES

<i>Figure</i>		<i>Page</i>
Main Report Figures		
1.1	Continuum of Environmental Quality Conditions of Galveston Bay	14
3.1	Research Design of the Contingent Valuation Study	38
4.1	Percent of Respondents Voting "Yes" at Price Offered (by Income Groups, Pooled Data)	60
4.2	Percent of Respondents Voting "Yes" at Price Offered (by Education Attainment, Pooled Data)	61
4.3	Percent of Respondents Voting "Yes" at Price Offered (Comparison of Recreational Users and Nonusers, Pooled data)	62
4.4	Percent of Respondents Voting "Yes," "No," and "Not Sure" at Price Offered (Mail-Only Survey Alone)	63
4.5	Percent of Respondents Voting "Yes" at Price Offered (by Survey Type and Treatment of "Not Sure" Responses)	64
4.6	Percent of Respondents Voting "Yes" at Price Offered (by Video Treatment, Pooled Data)	66
4.7	Percent of Respondents Voting "Yes" at Price Offered (Unweighted and Weighted, Pooled Data)	68
7.1	Continuum of Environmental Quality Conditions of Galveston Bay	98
Appendix Figures		
A1.I.1	Ex-vessel Values of Commercial Landings from Galveston Bay, 1962-1991	116

Acknowledgments

We would like to express our appreciation to the many people who assisted us with this research project. Everyone on the staff of the Galveston Bay National Estuary Program was gracious and helpful. We would especially like to thank our project manager, Russell Kiesling, for his thoughtful direction and keen insights. We also want to thank the seven members of our technical review panel for their time and constructive criticism:

Glenda Callaway
Ekistics Corporation

Mike Hightower
Sea Grant College Program
Texas A&M University

Kenneth G. Teague
U.S. Environmental Protection Agency

Carol Holloway
U.S. Army Corps of Engineers

Kariann Sokulsky
Water Policy Division
Texas Natural Resource Conservation
Commission

Gary Mitchell
Houston-Galveston Area Council

F. G. Bloodworth
Chief, Water Uses and Projections
Texas Water Development Board

Neil Armstrong, University of Texas at Austin, kindly shared with us his in-depth understanding of the Galveston Bay estuary system. Linda Shead and the staff of the Galveston Bay Foundation generously showed us firsthand the competing uses of Galveston Bay. Finally, we want to thank the following members of two graduate seminars at the University of North Carolina, who helped us design and carry out this research project:

Lee S. Alter
Sarah C. Clegg
Jennifer A. Davis
Renee Purdy DeShazo
Victoria Heid
Marc R. Houyoux
Stephanie Jones
John R. Leopold
Hwong Wen Ma

Christopher E. Pfeifer
Sanath D. B. Ranawana
Frances M. Randall
Jennifer L. Sampson-Platt
Sally E. Stone
Matthew F. Thayer
Lisa Thompson
Wendy G. Worley
Sherry L. Yarkowsky
