

CHAPTER 7—EI REVISIONS, DATA REQUESTS, SITE COORDINATE DATA

This chapter covers submitting EI revisions, requesting EI data, and reviewing site coordinate data.

A revision request is made to correct erroneous EI data previously reported. A discussion on how to submit a revised EI for the current and previous reporting years is included in this chapter.

Regulated entities may request historical EI data from the TCEQ. Whether retrieving electronic data from STARS or viewing an EI file on paper, there are procedures in place to request such information. This chapter discusses what data EAS can provide and when an “open records” request may be more appropriate.

Because EPN and site centroid coordinate data are used for modeling, the TCEQ may request updates to this information. This chapter discusses coordinate data and can assist you in locating your site’s coordinates.

Revising an EI

Current Reporting Year

What Is Required

A revision must address errors in the self-reported EI. Submit the following to revise EI data:

- a signed cover letter describing the revisions being made and the reason for the revisions
- revised EIQ pages; it is not necessary to submit the entire EIQ
- updated **criteria emissions totals** for the site (found on page 3 of an EIQ) to help identify any errors in entering or submitting data
- detailed sample calculations and supporting documentation for the revised emissions—see Chapter 1 for additional instructions.

Use Permanent Ink

Please use permanent ink instead of pencil when revising the EIQ. Pencil tends to smudge and can be difficult to read, increasing the chance of data-entry errors or omissions. For each revision, use a different ink color to distinguish the most recently corrected EI information. There are no restrictions on ink color, but colors **other than black** make EIQ updates more noticeable.

How to Submit

Contact the EAS to identify the staff member assigned to review the EI for the current year. The EAS help line can be reached at 512-239-1773.

When submitting revisions, address them to the applicable EAS staff member at MC 164.

Previous Reporting Years

A previous EI reporting year can also be revised, following the same procedure as for the current EI reporting year. In the cover letter, indicate all years that are being revised. If you are submitting revisions for more than one year, make sure that the EI year is clearly marked on the EI pages.

EI Data Requests

Historical EI data are available in several formats. Site-level EI information can be found online (see below), while more detailed data can be obtained by completing an Emissions Data Request form. EI files can also be viewed in person at the TCEQ central office in Austin.

Data Available at the EAS Web Site

The EAS Web page titled Point Source Emissions Inventory <www.tceq.state.tx.us/goto/ieas> links to easily accessible EI data. Before contacting the TCEQ for EI data, please refer to that Web page to make sure the information is not already available. Information available there includes emissions inventory trends, total criteria emissions for each site that reported an EI for the previous year, this manual, and the companion document, *2008 Emissions Inventory Forms and Instructions* (publication number RG-360B).

Emissions Data Requests

To request emissions data, please complete the form at the end of this chapter and fax it to the EAS at the number on the form. The EAS will determine if the requested data are available electronically or if paper EI files are available for review.

If you have any questions on how to complete this form or what EI data are available, please call the EAS help line at 512-239-1773.

Paper EI Data Requests

EI Files Available at the TCEQ Central Office

The EAS maintains files for the current EI reporting year and the two most recent years. To request them, contact the EAS help line at 512-239-1773. The account number or RN, company and site names, and EI years desired are required so the files can be identified and located.

Please allow **at least 24 hours prior notice** to view a file. This allows the EAS time to retrieve it and allows the agency to ensure it contains no confidential information. It will then be available in the Central File Room for review. Copying and various other services are available at Central Records.

After two years, EI files are transferred to the state archives at the Texas State Library.

Archived Files

If an EI file has already been sent to the Texas State Library, an “open records” request is necessary to obtain the file. This request can be made by e-mail to <openrecs@tceq.state.tx.us> or in writing to the Public Information Officer. Please allow a few days for the state library to forward the files. For more information, visit <www.tceq.state.tx.us/goto/openrecords>.

Coordinate Data

Spatial Queries and Mapping Application Viewer

Advancements in GIS software and its wide availability have drawn increased attention to obtaining accurate coordinate data for the site centroid and EPNs. Because erroneous site coordinates greatly complicate emissions modeling, the TCEQ may request updates to them.

The TCEQ has recently made available an online viewer that uses Google Maps to help determine accurate coordinate data. See <www.tceq.state.tx.us/goto/sqmaview>.
