Railroad Commission of Texas
Groundwater Contamination Case
Description Table

TABLE 2
GROUNDWATER CONTAMINATION CASE DESCRIPTION BY COUNTY
RAILROAD COMMISSION OF TEXAS

EXPLANATIONS OF FIELDS

COUNTY: THE COUNTY NAME IS THE FIRST ENTRY IN THE LEFT PORTION OF THE TABLE. IT IS LISTED ONLY ONCE FOR EACH OF THE CASES IN THAT COUNTY.

DIVISION: THESE ARE THE SPECIFIC REGULATORY PROGRAMS WITHIN THE RAILROAD COMMISSION. DIVISIONS ARE LISTED ONLY ONCE FOR THEIR RESPECTIVE CASES IN EACH COUNTY. SEE ACRONYM LIST (PAGE III) FOR AGENCY DIVISION ABBREVIATIONS.

NEW CASES: AN ASTERISK (*) IS PLACED IN EACH RECORD THAT IS REPORTED AS NEW FOR THE YEAR.

FILE NAME: FILE NAMES REFLECT RESPONSIBLE PARTIES OR GEOGRAPHIC LOCATION

FILE NUMBER: FILE NUMBERS ARE ASSIGNED ACCORDING TO RCT DISTRICT COMPLIANT NUMBERING SYSTEMS. SOME DISTRICTS INCLUDE THE YEAR IN THE COMPLIANT NUMBER. SOME CASES HAVE NO NUMBERS BECAUSE THE CASE WAS INITIATED BY INSPECTION OR SOME OTHER MANNER. A FEW CASES ARE CODED ACCORDING TO RCT HEARING DOCKET NUMBER.

LOCATION: LOCATION DESCRIPTIONS VARY DEPENDING ON THE SCOPE OF THE INVESTIGATION AND WHETHER OR NOT THE COMPLAINANT'S PROPERTY IS ON AN OIL AND GAS LEASE. THE INVESTIGATIONS THAT ARE NARROWER IN GEOGRAPHIC SCOPE ARE GENERALLY DESCRIBED SPECIFICALLY BY LEASE AND FILED.

CONTAMINATION: CL- CHLORIDE, BA - BARIUM, BTEX - BENZENE, TOLUENE, ETHYLBENZENE, AND XYLENE, HCL - HYDROCHLORIDE ACID, GW - GROUNDWATER, NACL- SODIUM CHLORIDE, NG- NATURAL GAS, PSH - PHASE SEPARATED HYDROCARBONS, TDS- TOTAL DISSOLVED SOLIDS, SW - SURFACE WATER. MOST CASES SITE SODIUM CHLORIDE AS CONTAMINATION. SOME CASES INVOLVE REFINED HYDROCARBONS, OTHERS CITE CHLORIDE BECAUSE CATIONS OTHER THAN SODIUM MAY BE PRESENT IN HIGH CONCENTRATION.

ENFORCEMENT STATUS: ACTIONS AND NOTICES OF VIOLATIONS ARE TAKEN AT STAFF LEVEL AND MAY BE CONCURRENT. THE CLOSURE OR SHUT-IN OF FACILITIES AND PLUGGING OF WELLS MAY ALSO BE DIRECTED AT STAFF LEVEL. STAFF DIRECTIVES ARE IDENTIFIED AS ENFORCEMENT STATUS 2. ACTIONS MAY BE STEPPED UP TO A FORMAL ENFORCEMENT LEVEL WHICH CAN BE CATEGORIZED AS EXECUTIVE ACTION AND INCLUDE ADMINISTRATIVE PENALTIES AND ORDERS. IN SOME CASES, GROUNDWATER CONTAMINATION MAY BE DOCUMENTED BUT SPECIFIC SOURCE OR AN ACTUAL RESPONSIBLE PARTY CANNOT BE IDENTIFIED. ENFORCEMENT STATUS WOULD BE CATEGORIZED AS STAFF DISCOVERY. ACTIONS OF RESPONSIBLE PARTIES WHO DISCOVER AND REPORT GROUNDWATER CONTAMINATION ARE CATEGORIZED AS VOLUNTARY ACTIONS EVEN THOUGH INVESTIGATIVE OR REMEDIAL PLANS ARE REVIEWED AND APPROVED BY THE OIL AND GAS DIVISION. SEE PAGES 31 - 38 FOR A DESCRIPTION OF THESE CODES.

DATA QUALITY: E - EPA APPROVED ANALYTICAL PROCEDURES,
Q - QUALITY CONTROL PROGRAM ESTABLISHED FOR SAMPLING PROCEDURES,
V - VERIFICATION OF CONTAMINATION THROUGH PROCEDURES LISTED BELOW:
1. SPLITTING SAMPLES WITH REGULATED ENTITY OR OTHER AGENCY FOR COMPARISON OF ANALYSIS RESULTS
2. RESAMPLING FOR VERIFICATION ANALYSIS RESULTS
3. SUPERVISORY OR COMMITTEE REVIEW OF SAMPLING PROCEDURES AND ANALYSIS RESULTS

Appendix 2. Texas Groundwater Protection Policy

Texas Water Code, Section 26.401

- (a) The legislature finds that:
 - (1) in order to safeguard present and future groundwater supplies, usable and potentially usable groundwater must be protected and maintained;
 - (2) protection of the environment and public health and welfare requires that groundwater be kept reasonably free of contaminants that interfere with present and potential uses of groundwater;
 - (3) groundwater contamination may result from many sources, including current and past oil and gas production and related practices, agricultural activities, industrial and manufacturing processes, commercial and business endeavors, domestic activities, and natural sources that may be influenced by or may result from human activities;
 - (4) the various existing and potential uses are important to the state economy; and,
 - (5) aquifers vary both in their potential for beneficial use and in their susceptibility to contamination.

- (b) The legislature determines that consistent with the protection of the public health and welfare, the propagation and protection of terrestrial and aquatic life, the protection of the environment, the operation of existing industries, and the maintenance and enhancement of the long-term economic health of the state, it is the goal of groundwater policy in this state that the existing quality of groundwater not be degraded. This goal of nondegradation does not mean zero-contaminant discharge.

- (c) It is the policy of this state that:
 - (1) discharges of pollutants, disposal of wastes, or other activities subject to regulation by state agencies be conducted in a manner that will maintain present uses and not impair potential uses of groundwater or pose a public health hazard; and
 - (2) the quality of groundwater be restored if feasible.

- (d) The legislature recognizes the important role of the use of the best professional judgment of the responsible state agencies in attaining the groundwater goal and policy of this state.

Appendix 3. Groundwater Classification System

Purpose	The Texas Groundwater Protection Committee and its member agencies recognize that groundwater classification is an important tool to be used in the implementation of the groundwater policy contained in Section 26.401 of the Texas Water Code. Through classification, the groundwaters in the state can be categorized and protection or restoration measures can then be specified by member agencies according to the quality and present or potential use of the groundwater.
Basis	Four classes are defined based on quality as determined by total dissolved solids content (Figure 19). The names and concentration ranges are based on traditional nomenclature associated with each class. Quality also determines usability, however, it is implicit in this classification that a water-bearing zone must be able to produce sufficient quantities of water to meet its intended use. The examples of use are intended to describe some of the common uses of these classes and are not meant to be exclusive of other uses which might arise due to unusual circumstances or application of new technology such as desalinization.
Application	<p>This groundwater classification system applies to all groundwaters in the state. In assigning a classification, the member agencies shall endeavor to use the natural quality of the groundwater that is unaffected by discharges of pollutants from human activities.</p> <p>All usable and potentially usable groundwaters are subject to the same protection afforded the nondegradation policy goal of the Texas Water Code in Section 26.401. This section further states that nondegradation does not mean zero-contaminant discharge. Starting with this nondegradation policy goal, protection or restoration measures can be varied according to the response level set by the classification and guidance of this narrative so long as the following conditions are met:</p> <ul style="list-style-type: none">a) Current groundwater uses are not impaired;b) Potential groundwater uses are not impaired;c) A public health hazard is not created; andd) The quality of groundwater is restored if feasible.

In determining protection or restoration measures, the member agencies should consider all beneficial uses to which groundwater of a given quality can currently or potentially be put. Generally, the use of groundwater requiring the highest

degree of protection or restoration is human consumption as drinking water. Protection for this use will also be protective of all other current or potential uses in almost all circumstances. The suitability of a zone for use as a human drinking water supply can be based on the quality and quantity of the water it contains as well as its ability to produce enough water to meet its intended use. These considerations facilitate defining two response levels for purposes of assigning protection or restoration measures that are commensurate with the potential to impact human health and the environment.

- . Level I response for the fresh, slightly saline and moderately saline classes should be based on the current or potential use as a human drinking water supply.
- . Level II response for the very saline to brine class should be based on indirect exposure (i.e., by means other than drinking) or no human consumption.

Evaluations In specifying a protection or restoration measure, member agencies must apply best professional judgement on a case-by-case basis. Evaluations to be made include but are not limited to such factors as yield, the availability of alternate sources of water, any background concentrations of naturally occurring constituents, the effects of constituents on usability, traditional and potential beneficial uses of the water, economic and technical feasibility of treatment and projected needs for and types of impacts on these groundwaters. In instances where there is a likelihood of hydrologic interconnection with resultant potential for contaminant movement from a given groundwater zone to a surface water body or other groundwater zones, protection and restoration measures for that zone should be determined by the quality and current and potential use of the receiving waters.

Additional Function This classification system is intended to be implemented by member agencies as an integral part of their groundwater quality programs. In addition to its response setting function, the classification system can also serve as a common basis among the various programs to foster consistency. It can also be used as a mapping tool to delineate specific areas in need of more detailed groundwater quality management. Towards this end, the Committee recognizes the important contributions of all agencies that compile such data and supports the continuing efforts to enhance the statewide database.

Figure 19. Groundwater Classification System of the Texas Groundwater Protection Committee

CLASS	QUALITY*	EXAMPLES OF USE	AGENCY RESPONSE
Fresh	Zero to 1,000	Drinking and all other uses.	Level I Response: Protection or restoration measures based on current use as a human drinking water supply.
Slightly Saline	More than 1,000 to 3,000	Drinking if fresh water is unavailable, livestock watering, irrigation, industrial, mineral extraction, oil and gas production.	
Moderately Saline	More than 3,000 to 10,000	Potential/future drinking and limited livestock watering and irrigation if fresh or slightly saline water is unavailable; industrial, mineral extraction, oil and gas production.	
Very Saline to Brine	More than 10,000	Mineral extraction, oil and gas production.	Level II Response: Protection or restoration measures based on indirect exposure or no human consumption.

* Concentration range of Total Dissolved Solids in milligrams per liter.

JOINT REPORT

§601.1. Purposes of Rules.

The purpose of these sections is to implement duties and responsibilities assigned to the committee under the Texas Water Code, §26.406, concerning the maintenance by certain state agencies of public files containing documented cases of groundwater contamination and the publication by the committee, in conjunction with the commission, of annual groundwater monitoring and contamination reports and to establish general policies of the committee to guide such implementation.

§601.2. Applicability.

These rules specifically apply to each state agency or organization having membership on the committee. The committee is composed of the Texas Natural Resource Conservation Commission (or effective September 1, 2002, the Texas Commission on Environmental Quality), the Texas Department of Health, the Texas Department of Agriculture, the Railroad Commission of Texas, the Texas Water Development Board, the Texas Alliance of Groundwater Districts, the Texas Agricultural Experiment Station, the Bureau of Economic Geology of the University of Texas at Austin, the State Soil and Water Conservation Board, and the Water Well Drillers and Water Well Pump Installers Program of the Texas Department of Licensing and Regulation.

§601.3. Definitions.

The following words and terms, when used in this chapter, shall have the following meanings unless the context clearly indicates otherwise.

- (1) Act--House Bill 1458 (71st Session) codified as Texas Water Code §§26.401-26.407.
- (2) Commission--Texas Natural Resource Conservation Commission (or effective September 1, 2002, the Texas Commission on Environmental Quality).
- (3) Committee--Texas Groundwater Protection Committee.
- (4) Documented groundwater contamination--A case of groundwater contamination where an agency has an established procedure for making a determination based on the quality of groundwater and the information pertinent to making the determination is maintained by the agency under §601.4 (b) of this title (relating to Public Files).
- (5) Enforcement action--Any action of the agencies, identified in §601.2 of this title (relating to Applicability), which accomplishes or requires the identification, documentation, monitoring, assessing, or remediation of groundwater contamination.
- (6) Groundwater--Water below the land surface in a zone of saturation.
- (7) Groundwater contamination--The detrimental alteration of the naturally

occurring physical, thermal, chemical, or biological quality of groundwater. Furthermore, groundwater contamination, for purposes of inclusion of cases in the public files and the joint groundwater monitoring and contamination report, shall be limited to contamination reasonably suspected of having been caused by activities or by entities under the jurisdiction of the agencies identified in §601.4 (b) of this title (relating to Public Files), except in the case of an underground source of drinking water granted an aquifer exemption by the commission with concurrence from the United States Environmental Protection Agency in accordance with 40 Code of Federal Regulations, Parts 144, 145, and 146, and 30 TAC Chapter 331 (relating to Underground Injection Control); and affecting groundwater which contains a concentration of:

- (A) less than or equal to 10,000 milligrams per liter (mg/liter) of dissolved solids; or
- (B) greater than 10,000 mg/liter if it is:
 - (i) currently extracted for beneficial use such as domestic, industrial, or agricultural purposes; or
 - (ii) hydrologically connected with, and with the potential for contaminant movement to, a surface water body or another zone of groundwater which has a concentration of less than or equal to 10,000 mg/liter of dissolved solids.

§601.4. Public Files.

(a) Subject to the limitations provided by the Texas Water Code, §§26.401-26.407 (the Act), and the Open Records Act, Texas Civil Statutes, Article 6252-17a, information collected, assembled, or maintained by the committee and the agencies having responsibilities related to protection of groundwater under the Act is public record open to inspection and copying during regular business hours.

(b) Each agency having the responsibilities related to the protection of groundwater under the Act shall maintain a public file of all documented cases of groundwater contamination that are reasonably suspected of having been caused by activities regulated by the agency.

§601.5. Joint Groundwater Monitoring and Contamination Report.

In conjunction with the Texas Commission on Environmental Quality, the committee shall publish not later than April 1 of each year a joint groundwater monitoring and contamination report covering the activities and findings of the committee made during the previous calendar year. The report must:

- (1) describe the current status of groundwater monitoring programs conducted by or required by each committee agency or organization at regulated facilities or in connection with regulated facilities;
- (2) contain a description of each case of groundwater contamination documented during the previous calendar year and of each case of groundwater contamination documented during previous years for which enforcement action was incomplete at the time of issuance of the preceding report; and
- (3) indicate the status of enforcement action for each case of groundwater contamination that is included in the report.

Title 31. NATURAL RESOURCES AND CONSERVATION
Part XVIII. TEXAS GROUNDWATER PROTECTION COMMITTEE
Chapter 601. GROUNDWATER CONTAMINATION REPORT
Subchapter B. NOTICE OF GROUNDWATER CONTAMINATION

§601.10. Form and Content of Groundwater Contamination Notice.

When notice of groundwater contamination, as defined in §601.3(7) of this title (relating to Definitions), is provided under Texas Water Code, §26.408 to the owner of a private drinking water well that may be affected by the contamination and to each applicable groundwater conservation district, the notice shall:

- (1) be in writing; and
- (2) contain, at a minimum, the following information:
 - (A) the name of the contaminant or contaminants;
 - (B) the range of analytical results for the contaminant or contaminants measured in the area or well to date;
 - (C) possible health effects of the contaminant or contaminants;
 - (D) possible source or sources for this type of contamination;
 - (E) suggested actions and precautions potentially impacted well owners could take; and
 - (F) who to contact for more information.

Appendix 5. TCEQ Rules on Spill Prevention and Control

The TCEQ adopted Title 30, Texas Administrative Code, §§327.1-327.5 (Spill Prevention and Control Rules), which became effective May 23, 1996. A reportable discharge or spill is an unauthorized accidental discharge or spill of oil, petroleum product, used oil, hazardous waste, industrial solid waste, or other substances into the environment in a quantity equal to or greater than a reportable quantity listed in Figure 20.

Figure 20. Spill Response Reportable Quantities (RQ)

	Released Onto Land	Released Into Water
Hazardous substances	final RQ in Table 302.4 in 40 CFR ¹ §302.4	final RQ in Table 302.4 in 40 CFR §302.4; except where final RQ is >100 pounds, in which case the RQ is 100 pounds
Crude oil and oil other than that defined as petroleum product or used oil	210 gallons (five barrels)	quantity sufficient to create a sheen
Petroleum product and used oil	25 gallons; 210 gallons (five barrels) for petroleum storage tank exempted facilities	quantity sufficient to create a sheen
Industrial solid waste or other substances	---	100 pounds

¹ CFR: Code of Federal Regulations

Upon the determination that a reportable discharge or spill has occurred, the responsible person must notify the TCEQ as soon as possible but no later than 24 hours after its discovery. The responsible person must notify either:

- (1) the State Emergency Response Center at 1-800-832-8224;
- (2) during normal business hours, the TCEQ Regional Office in which the discharge or spill occurred (TCEQ's Regional Office telephone numbers are included in Appendix 6); or
- (3) the TCEQ's 24-hour spill reporting hotline at 1-800-832-8224; or
- (4) the Texas Railroad Commission, for petroleum industry spills at (512) 463-6765.

The responsible person's initial notification must contain, to the extent known, the following information:

- the name, address, and telephone number of the person making the telephone report;
- the date, time, and location of the discharge or spill; a specific description or identification of the substances discharged or spilled;
- an estimate of the quantity discharged or spilled;
- the duration of the incident;
- the name of the surface water or a description of the waters in the state affected or threatened by the discharge or spill;

- the source of the discharge or spill;
- a description of the extent of actual or potential water pollution or harmful impacts to the environment and an indication of any environmentally sensitive areas or natural resources at risk;
- if other than the person making the telephone report, the names, addresses, and telephone numbers of the responsible person and the contact person at the location of the discharge or spill;
- a description of any actions that have been taken, are being taken, and will be taken to contain and respond to the discharge or spill;
- any known or anticipated health risks;
- the identity of any governmental representatives, including local authorities or third parties, responding to the discharge or spill; and
- any other information that may be significant to the response action.

If the discharge or spill creates an imminent health threat, the responsible person must immediately notify and cooperate with local emergency authorities (fire department, fire marshal, law enforcement authority, health authority, or Local Emergency Planning Committee as appropriate). The responsible person must cooperate with the local emergency authority in providing support to implement appropriate notification and response actions. The local emergency authority, as necessary, must implement its emergency management plan, which may include notifying and evacuating affected persons. In the absence of a local emergency authority, the responsible person must take reasonable measures to notify potentially affected persons of the imminent health threat.

The responsible person must immediately abate and contain the discharge or spill and cooperate fully with the TCEQ and the local emergency authority. The responsible person must also begin reasonable response actions which may include, but are not limited to, the following actions:

- arrival of the responsible party or response personnel hired by the responsible person at the site of the discharge or spill;
- initiating efforts to stop the discharge or spill;
- minimizing the impact to the public health and the environment;
- neutralizing the effects of the incident;
- removing the discharged or spilled substances; and
- managing the wastes.

The responsible person must submit written information describing the details of the discharge or spill and supporting the adequacy of the response action, to the appropriate TCEQ Regional Manager within 30 working days of the discovery of the discharge or spill. A report is not required for spills occurring during the normal course of transportation which are reported to the U.S. Department of Transportation under 49 Code of Federal Regulations §171.16. If a spill cannot be cleaned up within 180 days of the date it was reported, the responsible person is required to clean up the spill in accordance with the TCEQ's risk-based corrective action rules.

The TCEQ's Spill Prevention and Control Rules apply to discharges or spills that result in a release to the environment within the territorial limits of the state, including the coastal waters of the state. The Spill Prevention and Control Rules do not apply to the following.

- Discharges or spills of oil that enter or threaten to enter the coastal waters of the state. Except for spills of oil of 240 barrels or less for which the Railroad Commission of Texas is the on-scene coordinator, such discharges or spills are regulated by the Texas General Land Office under the Oil Spill Prevention and Response Act of 1991, the Texas Natural Resources Code, Chapter 40, Subchapters C, D, E, F, and G.
- Discharges or spills from activities subject to the jurisdiction of the Railroad Commission of Texas under §26.131, Texas Water Code.
- Releases only to air.
- The lawful placement of waste or accidental discharge of material into a solid waste management unit registered or permitted under Title 30, Texas Administrative Code, Chapter 335, Subchapter A (relating to Industrial Solid Waste and Municipal Hazardous Waste in General).
- Units and activities regulated under the authority of the Texas Water Code, Chapter 26, Subchapter I (relating to Underground and Aboveground Storage Tanks).
- The lawful application of materials, including but not limited to fertilizers and pesticides, to land or water.
- Discharges that are authorized by a permit, order, or rule issued under federal law or any other law of the state, provided, however, that discharges not so authorized shall be reported under the Spill Prevention and Control Rules unless the permit, order, or another TCEQ rule provides an applicable reporting requirement.
- Discharges or spills that are continuous and stable in nature, and are reported to the U.S. Environmental Protection Agency under 40 Code of Federal Regulations (CFR) §302.8.
- Discharges or spills occurring during the normal course of rail transportation about which carriers are required to give notice and report in accordance with 49 CFR §171.15 and §171.16.

Additionally, the TCEQ adopted Title 30, Texas Administrative Code, §§302.1-302.3 (Public Notice of Spills or Accidental Discharges from Wastewater Facilities Owned or Operated by Local Governments), which became effective December 30, 1999. These rules require:

(a) The owner of a facility must designate a responsible individual to comply with this subchapter.

(b) In addition to the noncompliance notification to the commission required by §305.125(9) of this title (relating to Standard Permit Conditions) and any notification required under Chapter 327 of this title (relating to Spill Prevention and Control), the owner of a facility, through its responsible individual, must notify appropriate local government officials and the local media whenever one of the following types of spills occurs from the facility:

- (1) a spill, regardless of volume, that the facility owner knows or has reason to know, will adversely affect a public or private source of drinking water;
- (2) a spill with a volume of 50,000 gallons or more where one or more of the following conditions also exists:

- (A) the spill enters water in the state within ½-mile of a public source of drinking water that has been assessed by the commission as vulnerable to contamination;
- (B) the spill enters water in the state within ½-mile of a private source of drinking water located within ½-mile of a public source of drinking water that has been assessed by the commission as vulnerable to contamination;
- (C) the spill enters water in the state within ½-mile up-gradient of a public or private source of drinking water surface water intake;
- (D) the spill occurs in an active groundwater recharge area;
- (E) the spill occurs up-gradient and within ½-mile of a karst terrain or shallow alluvial well that is a source of drinking water;

(3) a spill of 100,000 gallons or more.

(c) The responsible individual must issue the notice using the form in §319.303 of this title (relating to Form of the Notice to Local Officials and Local Media) as quickly as possible, but not later than 24 hours after becoming aware of the spill. The notice must be delivered in an expeditious manner. It may be hand-delivered, sent by facsimile, e-mail, or by phone with follow-up written notice.

(d) Immediately after giving of notice to appropriate local government officials and local media, the responsible individual must report to the commission regional office in whose region the spill occurred that this notice was given.

Appendix 9. Other Reports and Publications

There are numerous water-agency publications addressing the state's groundwater resources, groundwater quality, groundwater protection, and groundwater contamination. These reports provide a different focus or perspective on groundwater quality conditions and present information not contained within this report. Other publications of these agencies provide information on statewide groundwater protection efforts and specific protection programs.

Texas Groundwater Protection Committee Publications

Publications of the Texas Groundwater Committee can be accessed at the following Web site address:

www.tgpc.state.tx.us/Publications.html

There are sixteen annual predecessors to this report as produced annually by the Texas Groundwater Protection Committee and published by the Texas Water Commission/Texas Natural Resource Conservation Commission/Texas Commission on Environmental. Report Z 94, the initial report, contains information on the groundwater contamination cases documented or under enforcement during 1989. Each successive report presents information on the groundwater contamination cases documented or under enforcement for the calendar year as titled. The sixteen preceding reports are:

Texas Groundwater Protection Committee, 1990, *Joint Groundwater Monitoring and Contamination Report*, Texas Water Commission (TWC) Publication No. Z 94, April 1990.

___, 1991, *Joint Groundwater Monitoring and Contamination Report - 1990*, TWC Publication No. Z 104, April 1991.

___, 1992, *Joint Groundwater Monitoring and Contamination Report - 1991*, TWC Publication No. R 92-02, May 1992.

___, 1993, *Joint Groundwater Monitoring and Contamination Report - 1992*, TNRCC Publication No. SFR-1, November 1993.

___, 1994, *Joint Groundwater Monitoring and Contamination Report - 1993*, TNRCC Publication No. SFR-6, May 1994.

___, 1995, *Joint Groundwater Monitoring and Contamination Report - 1994*, TNRCC Publication No. SFR-20, April 1995.

___, 1996, *Joint Groundwater Monitoring and Contamination Report - 1995*, TNRCC Publication No. SFR-36, April 1996.

___, 1997, *Joint Groundwater Monitoring and Contamination Report - 1996*, TNRCC Publication No. SFR-56, June 1997.

___, 1998, *Joint Groundwater Monitoring and Contamination Report - 1997*, TNRCC Publication No. SFR-56/97, June 1998.

___, 1999, *Joint Groundwater Monitoring and Contamination Report - 1998*, TNRCC Publication No. SFR-56/98, October 1999.

___, 2000, *Joint Groundwater Monitoring and Contamination Report - 1999*, TNRCC Publication No. SFR-56/99, December 2000.

___, 2001, *Joint Groundwater Monitoring and Contamination Report - 2000*, TNRCC Publication No. SFR-56/00, April 2001.

___, 2002, *Joint Groundwater Monitoring and Contamination Report - 2001*, TNRCC Publication No. SFR-56/01, August 2002.

___, 2003, *Joint Groundwater Monitoring and Contamination Report - 2002*, TCEQ Publication No. SFR-56/02, June 2003.

___, 2004, *Joint Groundwater Monitoring and Contamination Report - 2003*, TCEQ Publication No. SFR-56/03, June 2004.

___, 2005, *Joint Groundwater Monitoring and Contamination Report - 2004*, TCEQ Publication No. SFR-56/04, June 2005.

___, 2006, *Joint Groundwater Monitoring and Contamination Report - 2005*, TCEQ Publication No. SFR-56/05, July 2006.

Five other publications prepared by the Texas Groundwater Protection Committee address the issues of the state's complex set of groundwater protection programs and address the coordination and improvement of these various programs to best protect the state's groundwater resources.

Texas Ground Water Protection Strategy, February 2003, TCEQ Publication No. AS-188, offers a guide for developing new programs and improving cooperation and coordination among agencies and programs. Goals for new programs and improvements are set out in a number of important groundwater program areas. This publication updates and supercedes *Texas Ground Water Protection Strategy*, January 1988.

Texas Ground-Water Data Dictionary, August, 1996, describes a standardized framework for collecting and storing information on groundwater in Texas. The production and development of the data dictionary took a proactive approach to consider data sharing and data quality in view of three recent technological advances: distributed computing, geographic information systems, and widespread data exchange via the Internet. Use of 135 data elements contained in the dictionary will make it easier to share information stored in various computer programs and operating systems, and will facilitate processing of information in a geographic information system (GIS).

Landowners Guide to Plugging Abandoned Water Wells, RG-347, March 2006. Prepared by the Texas Agricultural Extension Service, along with a video detailing the procedure and purpose behind properly plugging abandoned water wells.

Activities of the Texas Groundwater Protection Committee - Report to the 80th Legislature, SFR-047/06, January 2007. Biennial report of activities of the committee to the legislature, prepared prior to each Legislative session.

Texas State Management Plan for Prevention of Pesticide Contamination of Groundwater, TCEQ Publication No. SFR-070/01, January 2001, describes the general policies and regulatory approaches the state will use in order to protect groundwater resources from risk of contamination by pesticides. The document describes a generic coordinating mechanism between all responsible and participating agencies during the implementation of the plan, and provides for specific actions and responses necessary to prevent or manage pesticide contamination of groundwater, as the need arises.

Texas Commission on Environmental Quality/ Texas Water Commission/ Texas Natural Resource Conservation Commission Publications

Texas Commission on Environmental Quality, 2006, TCEQ Publications Catalog, PD-001, April 2006. Electronic version and search capability available at:

http://www.tceq.state.tx.us/comm_exec/forms_pubs/search_pubs.html

Presented within this bibliography is a partially annotated list of all works published by the Texas Commission on Environmental Quality,

Texas Water Commission, 1989, *Ground-Water Quality of Texas - An Overview of Natural and Man-Affected Conditions*, TWC Publication No. 89-01, March 1989.

This out-of-print publication provides an overview of groundwater quality conditions in the state based on a review of the available data from many sources. Water quality, as expressed by the concentration of total dissolved solids, is mapped for seven major aquifers and 17 minor aquifers in the state. The concentrations of other important constituents, such as nitrates, iron, and sulfates, are mapped for the affected major aquifers. A basic discussion of hydrogeology, the chemistry and evolution of water quality, and the potential impact of man's activities is provided. The affect of man's activities is assessed in terms of its impact on the state's groundwater resources. The report also discusses aquifer vulnerability mapping and DRASTIC. Two DRASTIC vulnerability maps are presented depicting the relative sensitivity of the state's groundwater resources to surface sources of contamination. The report concludes that the greatest impact on the quality of the state's groundwater is from naturally occurring sources of more saline water. The report further concludes that, in terms of water quality, probably less than one percent of the state's groundwater is affected by man's activities and the effects are centered in areas of large population and industrial development.

Texas Natural Resource Conservation Commission, 1994, *Risk-Based Corrective Action for Leaking Storage Tank Sites*, TCEQ Publication No. RG-36, January 1994. Includes inserts, "Corrective Action Plans for LPST Sites", RG-041, November, 1996, and "Am I Regulated" RG-042, November, 1996.

This document describes, in detail, the application of risk assessment to prioritize leaking storage tank sites, develop site-specific, risk-based cleanup levels, and determine the level of remediation required at each site.

Texas Natural Resource Conservation Commission, 1996, *Groundwater Monitoring and Reporting* (for LPST sites), RG-043, September, 1996.

This document describes, in detail, the monitoring and reporting of groundwater samples at LPST sites.

Texas Natural Resource Conservation Commission, 1994, *Guidance Manual for Risk Assessment Contaminant Fate and Transport Modeling*, TCEQ Publication RG-91, May 1994.

This document is a guide designed to provide a basic understanding of how contaminants behave when released from a storage tank system. The document offers a general explanation of contaminant fate and transport processes and contaminant fate and transport models and modeling practices. It also provides some direction on how to address certain situations that may be encountered.

Texas Natural Resource Conservation Commission, 1995, *Guidance for Risk-Based Assessments at LPST Sites in Texas: Emphasizing Initial Investigations and Plan A Evaluations*, TCEQ Publication No. RG-175, October 1995.

This document defines site assessment protocol and requirements which should be followed at newly confirmed and existing leaking petroleum storage tank (LPST) sites. This new risk-based assessment process and reporting (Assessment Report Form, TCEQ-0562) replaces the Limited Site Assessment guidance and report form.

Texas Natural Resource Conservation Commission, 2000, *An Introduction to the Texas Risk Reduction Program*, TCEQ Publication No. RG-366/TRRP-1, February 2000.

First in a series of 34 guidance documents under the overall number of RG-366, this document introduces the Texas Risk Reduction Program, and is intended for the general public, regulated community, and environmental professionals. Nine more in the series are also available at this time, with the remainder targeted for availability before the end of calendar year 2001.

Texas Natural Resource Conservation Commission, 1996, *The State of Texas Water Quality Inventory -13th Edition*, TCEQ Publication No. SFR-50, December 1996.

This publication describes the conditions of the state's surface and groundwater quality. The state's groundwater protection program is described and the major documented and potential sources of groundwater contamination are identified. Ambient groundwater quality conditions and documented cases of groundwater contamination are assessed for selected aquifers.

Texas Natural Resource Conservation Commission, 2000, *The State of Texas Water Quality Inventory -15th Edition*, TCEQ Publication in review, SFR-50/00, April 2002.

Texas Natural Resource Conservation Commission, 1997, *State of Texas Oil and Hazardous Substances Spill Contingency Plan - 1996*, TCEQ Publication No. RG-290, November 1997.

This publication provides general guidance for a coordinated response to oil and hazardous substance spills and outlines notification procedures by which spills shall be reported to state and federal agencies. The publication represents the cooperative efforts of the TCEQ, the Texas General Land Office, and the Railroad Commission of Texas.

Texas Natural Resource Conservation Commission, 2001, TRRP: Soil and Groundwater Response Objectives, RG-366/TRRP-29.

This publication describes for environmental consultants the extent to which contaminants must be removed from or isolated in soil and groundwater at a site in order to achieve Remedy Standards A and B under the Texas Risk Reduction Program (TRRP).

Texas Natural Resource Conservation Commission, 2001, Private Well Disinfection and Water Sampling, GI-005.

This publication provides information on how to conduct private well disinfection and water sampling.

Texas Water Development Board Publications

Texas Water Development Board, 1976, *Annotated Bibliography of Texas Water Resources Reports of the Texas Water Development Board and the United States Geological Survey through August 1974*, TWDB Report 199, February 1976.

This bibliography of state and federal agency water related publications contains a listing, with a brief summary, of reports addressing groundwater contamination investigations.

Texas Water Development Board, 1992, *Texas Water Development Board Publications Catalog*, TWDB Publication Catalog, June 1992. Electronic version, updated through 2000, available at: www.twdb.state.tx.us/publications/pub.htm

Presented within this bibliography is a partially annotated list of all works published by the Texas Department of Water Resources (the predecessor agency to the TWDB and the Texas Water Commission) and its predecessor agencies through August 1985. It also provides a completely annotated list of works published by the TWDB since September 1, 1985. A county index for the publications noted above are included in this bibliography.

Texas Water Development Board, 1990, *A Field Manual for Ground Water Sampling*, TWDB Users Manual UM-51, May 1990, Revised September 1991.

This users manual describes the Board's standardized procedures for the ambient groundwater sampling program. It explains sample collection and chemical characterization procedure guidelines followed by TWDB personnel during field sampling events.

Texas Water Development Board, 1990, *Water for Texas: Today and Tomorrow*. (Texas Water Plan), TWDB Document No. GP 5-1, December 1990.

___, 1992, *Water for Texas: Today and Tomorrow. Recommendations for the 1992 Update of the Texas Water Plan*, TWDB Document No. GP 6-1, December 1992.

___, 1997, *Water for Texas. A Consensus-Based Update to the State Water Plan*, TWDB in Conjunction with the TCEQ and Texas Parks and Wildlife Department, TWDB Document No. EP-6-2, August 1997.

___, 2002, *Water for Texas - 2002*. TWDB Document No. EP-7-1, January 2002.

___, 2007, *Water for Texas - 2007*. TWDB Document No. EP-7-1, January 2007.

The 2007 State Water Plan is the second plan adopted that incorporates regional water plans developed under Texas Water Code, Section 16.053 between January 2001 and January 2005. The report includes statewide water resources information and the Texas Water Development's Board's legislative policy recommendations. The report also includes details of the state's planning process, the 2006 Regional Water Plans, and other water resources information.

Texas Water Development Board, 1991, *Delineation Criteria for the Major and Minor Aquifer Maps of Texas*, TWDB Limited Publication 212, June 1991.

This report documents the criteria and sources used by the TWDB to delineate each of the nine major and 20 minor aquifers in the state. The report includes a major aquifer and minor aquifer map.

Texas Water Development Board, 1995, *Aquifers of Texas*, TWDB Report 345, November 1995.

Aquifers of Texas provides general information pertaining to location, geology, quality, yield, common use, and specific problems of the state's aquifers; and an aquifer specific bibliography follows each aquifer description.

Texas Water Development Board, 2000, *Groundwater Availability of the Trinity Aquifer, Hill Country Area, Texas: Numerical Simulations through 2050*, TWDB Report 353, September 2000.

Texas Water Development Board, 2000, *Aquifers of West Texas*, TWDB Report 356, December 2001.

Texas Department of Health Publication

Texas Department of Health Strategic Plan 2001-2005, 2000, gives the vision and mission statement for the Texas Department of Health. The role of public health in protecting the health of citizens of the state cuts across many subjects and programs, including preserving the state's environment and ensuring wise, productive use of the state's natural resources.

Bureau of Economic Geology Publications

The Bureau of Economic Geology is a research bureau of the University of Texas at Austin. The Bureau conducts basic and applied research projects in coastal processes, energy and mineral resources, and in hydrogeology, groundwater resources, and environmental site assessment and remediation. The Bureau publishes major reports in the University of Texas Publication series. The Bureau's List of Publications is updated annually. The List of Publications can be obtained by contacting the Bureau's Publication Sales office at 1-888-839-4365.

Mace, R.E., Fisher, R.S., Welch, D.M., and Parra, S.P., 1997, *Extent, Mass, and Duration of Hydrocarbon Plumes from Leaking Petroleum Storage Tank Sites in Texas*, Bureau of Economic Geology, University of Texas at Austin Geologic Circular 97-1, 1997.

This study consisted of compiling and summarizing leaking petroleum storage tank site

information and quantifying the size, mass, and duration of dissolved benzene plumes in Texas in order to determine dimensions of the plumes, predictability of plume concentrations and lengths, rates at which plumes self-remediate, and classification of plume behavior to assist in exposure assessments. The study is the first attempt to quantify the general site, soil, hydrogeologic, and plume characteristics throughout Texas and in different regions of the state.

Appendix 10. Closed Cases

The following table lists 785 cases from the 1994 through 2005 Joint Groundwater Monitoring and Contamination Reports that have been closed by a program area or agency, and have been listed in previous reports with an Activity Status Code of "6C - No further regulatory action is required", "6D - agency action final, however, contamination still exists under institutional controls" or "6E - agency action final, however, contamination still exists under required engineering controls."

While enforcement actions may be closed on these cases, the Activity Status Code descriptions allow that groundwater contamination may still be present at the site, and may therefore be of interest to regulatory agencies and the general public. This list is not a comprehensive inventory. The Activity Status Codes "6D" and "6E" were first implemented in 1995, which is the primary reason that closed case data prior to 1994 has not been included in this table. Additionally, an agency or agency program area may have closed an enforcement case in any previous report without providing details on the closure, and groundwater local to the site may still be impacted by contamination. Instances of sites where groundwater was determined to have been impacted, but analysis indicated that the contamination was below regulatory action levels and the case was "closed" in the investigation stage, also will not be reflected in this table.

The codes used in this table are the same as those in the four main agency tables, however a code indicating the agency originally responsible for the case is included. "TCEQ" is the Texas Commission on Environmental Quality or predecessor agencies; "RCT" is the Railroad Commission of Texas; "TAGD" is the Texas Alliance of Groundwater Conservation Districts; and "DSHS" is the Department of State Health Services. A field showing the calendar year of the last report in which the cases were listed is also included.

Additional information regarding these cases may be obtained from the agencies listed in the table. Contact information for agency staff members can be found in Appendix 7.

All Agencies, 1994-2005**

TABLE 5 (APPENDIX 10)
 HISTORIC GROUNDWATER CONTAMINATION CASE DESCRIPTION BY COUNTY
 ALL AGENCIES, 1994-2005

EXPLANATIONS OF FIELDS

COUNTY: THE COUNTY NAME IS THE FIRST ENTRY IN THE LEFT PORTION OF THE TABLE. IT IS LISTED ONLY ONCE FOR EACH OF THE CASES IN THAT COUNTY.

AGENCY: TCEQ – TEXAS COMMISSION ON ENVIRONMENTAL QUALITY, OR PREDECESSOR AGENCIES
 RCT - RAILROAD COMMISSION OF TEXAS
 TAGD - TEXAS ALLIANCE OF GROUNDWATER DISTRICTS
 DSHS - DEPARTMENT OF STATE HEALTH SERVICES

DIVISION: DIVISIONS ARE LISTED ONLY ONCE WITH THEIR RESPECTIVE CASES FOR EACH COUNTY.

- ENF - ENFORCEMENT DIVISION, TCEQ
- FOD - FIELD OPERATIONS DIVISION, TCEQ
- RMD/CA - REMEDIATION DIVISION/CORRECTIVE ACTION SECTION, TCEQ
- RMD/DCRP - REMEDIATION DIVISION/ DRY CLEARNERS PROGRAM
- RMD/PST - REMEDIATION DIVISION/ PETROLEUM STORAGE TANK PROGRAM
- RMD/SC - REMEDIATION DIVISION/ SUPERFUND CLEANUP PROGRAM, TCEQ
- RMD/SSDAT - REMEDIATION DIVISION/SUPERFUND SITE DISCOVERY AND ASSESSMENT, TCEQ
- RMD/VC - REMEDIATION DIVISION/VOLUNTARY CLEANUP PROGRAM, TCEQ
- RMD/VCIO - REMEDIATION DIVISION/VOLUNTARY CLEAN UP/INNOCENT OWNER, TCEQ
- RMD/VCBSA - REMEDIATION DIVISION/VOLUNTARY CLEANUP/BROWNFIELDS SITE ASSESSMENT, TCEQ
- WPD/MSW - WASTE PERMITS DIVISION/MUNICIPAL SOLID WASTE SECTION, TCEQ
- WPD/IHW - WASTE PERMITS DIVISION/ INDUSTRIAL AND HAZARDOUS WASTE SECTION, TCEQ
- WPD/RML - WASTE PERMITS DIVISION/ RADIOACTIVE MATERIAL LICENSING TEAM, TCEQ
- WQD/WQAS - WATER QUALITY DIVISION /WATER QUALITY ASSESSMENT SECTION, TCEQ
- WSD/PDW - WATER SUPPLY DIVISION /PUBLIC DRINKING WATER SECTION, TCEQ
- WSD/WRPA - WATER SUPPLY DIVISION
- OIL & GAS - OIL AND GAS DIVISION, RCT'
- SLUWCD - SANDYLAND UNDERGROUND WATER CONSERVATION DISTRICT, MEMBER OF TAGD

SECTION: PROGRAM AREA WITHIN DIVISION OF AGENCY RESPONSIBLE FOR CASE, IF APPLICABLE

FILE NAME: FILE NAMES REFLECT RESPONSIBLE PARTIES OR GEOGRAPHIC LOCATION

FILE NUMBER: FILE NUMBERS ARE ASSIGNED ACCORDING TO THE RESPECTIVE DIVISION NUMBERING SYSTEM. FILE NUMBER IS USED TO LOCATE FILE IN TCEQ RECORDS.

LOCATION: LOCATIONS ARE GIVEN AS ADDRESSES OR GEOGRAPHIC LOCATIONS DESCRIPTIONS.

CONTAMINATION DESCRIPTION: AS- ARSENIC, CR - CHROMIUM, PB - LEAD, NO3 - NITRATE, SO4 - SULFATE, VOC- VOLATILE ORGANIC COMPOUNDS, ORG.- ORGANIC CHEMICALS, TOC- TOTAL ORGANIC COMPOUNDS, TDS- TOTAL DISSOLVED SOLIDS, TCE- TRICHLOROETHENE, MEK - METHYL ETHYL KEYTONE, CARBON TET - CARBON TETRACHLORIDE, PCP - POLYCHLORINATED PHENYLS, PCB - PLOYCHLORINATED BIPHENYLS, TPH - TOTAL PETROLEUM HYDROCARBONS, BTEX - BENZENE - TOLUENE-ETHYLBENZENE-XYLENE, MTBE - METHYL-TERTIARY-BUTYL-ETHER. THE MAJORITY OF CASES INVOLVE PETROLEUM CONTAMINATION.

YEAR: YEAR CASE WAS DROPPED FROM THE REPORT

ENFORCEMENT STATUS: THE FIRST ENTRY IN THIS FILED INDICATES THE LEVEL OF AGENCY RESPONSE, THE SECOND INDICATES THE SITE ACTIVITY STATUS. SOME CASES DO NOT HAVE COMPLETE ENFORCEMENT STATUS CODES BECAUSE IF INSUFFICIENT DATA. STATUS CODES MAY BE BORDER-LINE BETWEEN TWO LEVELS ON THE ENFORCEMENT STATUS MATRIX AND ARE ENTERED AS A COMBINATION OF ENFORCEMENT STATUS CODES, I.E.:3A,B OR 4,5. SEE PAGES 31-38 FOR A DESCRIPTION OF THESE CODES
