

## 2006 Texas Water Quality Inventory - Guide to Basin Assessment Data by Segment

Summary assessment data for individual water bodies are presented in PDF files, one for each of the major river basins. In these PDF files, water bodies are listed in numerical order by the segment identifier (SegID), which is the primary identifier used throughout the Inventory and List. Water bodies are grouped into one PDF for each of the river basins that are listed below. For your convenience, the water bodies in each river basin are listed below, alphabetically.
