Title 30 Texas Administrative Code Chapter 115

Surface Coating Processes

Introduction

The official version of the rules in [Chapter 115, Subchapter E, Division 2](#) and [Chapter 115, Subchapter E, Division 5](#) is available on the Secretary of State's website.

Each revision is identified by the date the commission adopted the changes. When available, the rule project number, which is the unique identification number from the rules tracking database for the specific rule project, is also provided for reference.

The *Texas Register* publications of the rule proposal and adoption are given for each revision. The proposed rules are approved by the commissioners to be published in the *Texas Register* for public comment. Once adopted by the commissioners, the rules are republished as final in the *Texas Register*.

These rules are submitted for Environmental Protection Agency (EPA) approval as part of the State Implementation Plan (SIP) control strategy to meet the National Ambient Air Quality Standard (NAAQS) for ozone. Links to the *Federal Register* publication of the EPA's approval of these rules and the associated SIP revisions are also included.

The summary information includes the affected sections of the rule, the counties affected, the compliance date, and a brief description of the rule revisions. If the adopted rule does not provide for additional time to comply with any new or revised requirements then compliance with any rule revisions is required by the effective date of the rulemaking.

The rulemaking also requires the carbon adsorption bed exhaust to be monitored continuously and that the records documenting exemption qualification be approved by both the executive director and the EPA. The revisions require determining compliance with the VOC emission limits on a line-by-line basis.

This rulemaking corrects rule deficiencies so that the surface coating processes rules meet federal RACT requirements and is part of the [15% ROP SIP Revision \(Phase I\)](#) (11/10/1993).
