Third Party Agreement**

**Attachment A  
Supplemental Environmental Project**

1. *Project Description*

*Project Title: Household Hazardous Waste and Reusable Materials Collection*

*Description:* The LCRA will co sponsor or sponsor household hazardous waste ("HHW") collection events, battery collection events, used oil collection events, paint collection events, and tire collection events in conjunction with local city and county governments throughout the LCRA Statutory District. These collection events provide citizens with a safe and convenient opportunity to properly dispose of household hazardous wastes: such as, paint, tires, pesticides, motor oil, oil filters, antifreeze, batteries, and household cleansers. Citizens will be encouraged to reuse unused portions of properly labeled and handled chemical products (i.e. fertilizers, paints, and some pesticides/herbicides) through the reusable materials exchange. SEP monies will be used by LCRA to supplement scheduled events, add special collection events, such as, tire, battery, used oil, and paint collection events and to add additional collection events. The LCRA has not previously budgeted for these supplemental, additional, or special collection events and will not budget for them in the 2003, 2004, or 2005 fiscal years.

*Benefits:* By providing a safe and convenient means for proper disposal of HHW, the program helps protect the environment, particularly the Edwards Aquifer and groundwater sources. It also discourages the illegal dumping of hazardous materials by providing a convenient and free source for waste disposal. The program recycles materials when possible and encourages the reuse of properly handled and labeled materials.

*Eligible Counties:* Bastrop, Blanco, Burnet, Colorado, Fayette, Lampasas, Llano, Matagorda, San Saba, Travis, and Wharton.

*Estimated Time to Complete:* Two years

*Estimated Cost:* Minimum \$1000.00
