

TCEQ MECHANICAL SOURCES CURRENT MSS BACT REQUIREMENTS

MATERIAL HANDLING

This information is maintained by the Mechanical/Agricultural/Construction NSR Section and is subject to change. Last update 11/2006

Year	Source Type	Pollutant	Minimum Acceptable Control	Details
2006	Material Handling	Particulate Matter	No downtime since [1] water sprays should be functioning with number and flow rate prior to the start of operation, [2] material should be wet, [3] enclosures should be in place and [4] fabric filters should be in good repair with an acceptable pressure drop prior to the start of operation.	
	Material Transferring / Stockpiles		No downtime since water sprays at transfer points and on stockpiles should be functioning prior to the start of operation.
