Generator's EPA ID: If the generator has been assigned an EPA ID number, always provide it. If no EPA ID has been assigned, as may be the case with nonhazardous waste, provide the first 12 digits of the company name. If the generator is a Conditionally Exempt Small Quantity Generator (CESQG), provide the state postal code and the letters "CESQG" in lieu of an EPA ID.

Example: State Generator ID number D0022, Conditionally Exempt Small Quantity Generator from Louisiana, would record the EPA ID number as LACESQG. If the waste is hazardous or nonhazardous and the generator is from a foreign country, the EPA ID must always be provided by the facility that is accepting responsibility of the waste in Texas known as the - Importer of Record (IOR).

EPA Hazardous Waste Numbers: These numbers ONLY apply to hazardous waste and can be found in 40 Code of Federal Regulations Part 261. If more than four waste codes apply, use the four that best describe the waste.

No Shipments Received: If no hazardous or Class 1 nonhazardous industrial waste was received during the reporting period, mark Box 14 on the front of this form.

HANDLING (System Type) Codes: For reporting purposes, the Handling code selected should be for the final disposition of the waste, even if the waste is stored prior to disposal.
