

Kellie Crouch-Elliott

Water Quality Division
Texas Commission on Environmental Quality

Kellie Crouch-Elliott is a Permit Coordinator with the Municipal Permits Team of the Wastewater Permitting Section. She joined the TCEQ in September 1999, first reviewing applications and writing registrations for sludge beneficial land application sites, later working with the Petroleum Storage Tank Reimbursement Program, followed by many years of working with the Water Quality Division's Applications Review and Processing Team. In October 2006 she joined the Land Application Team (now Municipal Permits Team), and currently reviews applications and drafts permits and registrations for beneficial land application of biosolids, as well as reviewing applications for and drafting of Texas Pollutant Discharge Elimination System (TPDES) permits and Texas Land Application Permits for domestic wastewater treatment facilities throughout the state. Kellie holds a Bachelor of Science Degree in Geography and Planning from Texas State University and a Master of Science Degree in Geography, emphasizing impacts of policy development on internationally shared waters, from Texas A&M University.
