

HEFR v2.03

These release notes document changes relative to version 2.02

BUG FIXES

1. Q95 option did not work in batch mode. It now works.
2. Custom seasons did not work in batch mode. It now works.

OTHER

1. Code for batch mode is located in module "RunBatchModeMod." Please contact Dan Opdyke for instructions on how to run HEFR in batch mode.

~~~~OLD VERSIONS~~~~

HEFR v2.02

August 10, 2010

These release notes document changes relative to version 2.01

NEW FEATURES

1. The code now pastes all input selections to a sheet titled "Inputs"

BUG FIXES

1. A minor error related to the `multipeaks_multiplier` option in batch mode was fixed

OTHER

None at this time

~~~~OLD VERSIONS~~~~

HEFR v2.01

June 14, 2010

These release notes document changes relative to version 2.0

NEW FEATURES

None at this time

BUG FIXES

1. Previously, the code bombed if no "small floods" were identified by the hydrographic separation algorithm. The code now runs without a need for small floods.
