

Janie Muñoz
Petroleum Storage Tank Program
Center for Environmental Excellence
Division for Enterprise Development
University of Texas Arlington

Janie Muñoz is the PST Field Operations Team Leader in the PST Program at the Center for Environmental Excellence for the UTA. Janie has been with UTA since December 2010. She is responsible for the management of many inspectors located throughout the state of Texas conducting PST Investigations to fulfill the Energy Act passed by Congress in 2005. The goal is to inspect every underground storage tank facility once every three years.

Prior to joining UTA, she worked as an environmental investigator in the Petroleum Storage Tank Section in the TCEQ Region 11 Austin Office. Janie was with the PST Program since March 2006 and originally worked at the Region 12 Houston Office for a year before transferring to the Austin Region.

Prior to joining the TCEQ, she worked for the University of Texas Brackenridge Lab as a research assistant for Dr. Larry Gilbert's Red Fire Ant Project that is currently trying to establish a comprehensive suite of phorid species for fire ant biological control in Central and South Texas.

Janie earned a B.S. in Ecology, Evolution and Behavior from the College of Natural Sciences and a B.S. in Communication Studies from the College of Communication from the University of Texas at Austin in 2005.
