

**Richard N. Berry, P.E.**  
**Fuel Systems**  
**Richard N. Berry, P.E., Inc.**

**President** – In this capacity, Mr. Berry is in charge of marketing and working towards acquiring new projects, all engineering design, and finances.

**Experience and Education** – Mr. Berry attended Texas A&M University, and graduated in 1983 with a B.S. in Civil Engineering. The emphasis of his work has been engineering services related to storage and dispensing of fuels ranging from Jet A, to gasoline, and synthetics such as E85 and biodiesel. Due to new regulations, the installation of Diesel Exhaust Fluid (DEF) has now been added to the scope of services. Facilities needing these services include retail service stations, school district transportation and maintenance facilities, and airports. While offering these design services, related services such as Spill Prevention, Control, and Countermeasure Plans (SPCC) and Storm Water Pollution Prevention Plans (SWP3) are also available such that a complete design and permitting package can be provided.
