9931 Allison Ct  
Lipan, TX 76462-6604

Re: Certificate of Adjudication No. 12-4060

As you are aware, Texas is experiencing widespread drought conditions. Even though portions of Texas have experienced recent rain events, drought conditions persist and no substantial relief is projected. You were previously notified that the Executive Director issued an Order suspending certain diversions in the Brazos River Basin below Lake Possum Kingdom. On December 5, 2012, the Commission voted to affirm that Order and modified it to include the requirements under 30 TAC Chapter 36.5. Your surface water right for **municipal use** was not suspended at that time for public health, safety, and welfare reasons, even though all or part of your water right is junior to the priority call. You provided information under 30 TAC Chapter 36.5 indicating that you are not using surface water under your water right for municipal purposes.

**Based on your response, I have issued a modified order suspending your surface water right that is junior to February 14, 1942 until further notice. That order is included in this mailing. Should conditions change such that surface water under your water right is needed to protect public health, safety, and welfare, please contact Ms. Melissa Keller, TCEQ Water Rights Liaison at 512-239-1768.**

Consistent with the January 8, 2013 Order, now included in the January 15, 2013 Order, suspended water rights may divert or impound water when flows at certain United States Geological Survey (USGS) gages are above specific levels. In addition, during this suspension, you may continue to divert water which was stored under the provisions of the attached Order, under the terms and conditions of your water right.

A hearing before the Commission will be held to affirm, modify, or set aside the order. This matter is scheduled for consideration at the Commission Agenda on January 30, 2013 at 9:30 a.m. at 12100 Park 35 Circle, Building E, Room 201S, Austin, Texas 78753.

The TCEQ continues to monitor the situation closely. Water is a precious resource – all Texans are encouraged to conserve, especially during times of drought. Should senior

Durham Overstreet Trust

Page 2

January 15, 2013

needs not be fulfilled as a result of these suspensions, please be aware that TCEQ may take additional actions to enforce the priority call. If conditions improve, we may be able to lift restrictions.

You may find additional drought information on TCEQ's drought web page at: <http://www.tceq.texas.gov/response/drought> or by contacting the TCEQ Drought Hotline at 1-800-447-2827. You may also contact your TCEQ Regional Office or Ms. Melissa Keller at 512-239-1768 should you have additional questions on this matter.

Sincerely,

Re: Certificates of Adjudication Nos. 12-5291 & 12-5292

As you are aware, Texas is experiencing widespread drought conditions. Even though portions of Texas have experienced recent rain events, drought conditions persist and no substantial relief is projected. You were previously notified that the Executive Director issued an Order suspending certain diversions in the Brazos River Basin below Lake Possum Kingdom. On December 5, 2012, the Commission voted to affirm that Order and modified it to include the requirements under 30 TAC Chapter 36.5. Your surface water right for **municipal use** was not suspended at that time for public health, safety, and welfare reasons, even though all or part of your water right is junior to the priority call. You provided information under 30 TAC Chapter 36.5 indicating that you are not using surface water under your water right and that your groundwater supply is sufficient to meet your needs.

**Based on your response, I have issued a modified order suspending your water right. That order is included in this mailing. The purpose of this letter is to direct you to immediately suspend all diversions with a priority date of February 14, 1942 or later until further notice. Should conditions change such that surface water under your water right is needed to protect public health, safety, and welfare, please contact Ms. Melissa Keller, TCEQ Water Rights Liaison at 512-239-1768.**

Consistent with the January 8, 2013 Order, now included in the January 15, 2013 Order, suspended water rights may divert or impound water when flows at certain United States Geological Survey (USGS) gages are above specific levels. In addition, during this suspension, you may continue to divert water which was stored under the provisions of the attached Order, under the terms and conditions of your water right.

A hearing before the Commission will be held to affirm, modify, or set aside the order. This matter is scheduled for consideration at the Commission Agenda on January 30, 2013 at 9:30 a.m. at 12100 Park 35 Circle, Building E, Room 201S, Austin, Texas 78753.

January 15, 2013

The TCEQ continues to monitor the situation closely. Water is a precious resource – all Texans are encouraged to conserve, especially during times of drought. Should senior needs not be fulfilled as a result of these suspensions, please be aware that TCEQ may take additional actions to enforce the priority call. If conditions improve, we may be able to lift restrictions.

You may find additional drought information on TCEQ's drought web page at: <http://www.tceq.texas.gov/response/drought> or by contacting the TCEQ Drought Hotline at 1-800-447-2827. You may also contact your TCEQ Regional Office or Ms. Melissa Keller at 512-239-1768 should you have additional questions on this matter.

Sincerely,

Texas Water Development Board  
Water Uses Section  
PO Box 13231  
Austin, Texas 78711-3231

Re: Water Use Permit No. 2925

As you are aware, Texas is experiencing widespread drought conditions. Even though portions of Texas have experienced recent rain events, drought conditions persist and no substantial relief is projected. You were previously notified that the Executive Director issued an Order suspending certain diversions in the Brazos River Basin below Lake Possum Kingdom. On December 5, 2012, the Commission voted to affirm that Order and modified it to include the requirements under 30 TAC Chapter 36.5. Your surface water right for **municipal use** was not suspended at that time for public health, safety, and welfare reasons, even though all or part of your water right is junior to the priority call. You provided information under 30 TAC Chapter 36.5 indicating that Allens Creek Reservoir was not constructed and water was not being used for municipal purposes under this water right.

**Based on your response, I have issued a modified order suspending your surface water right that is junior to February 14, 1942 until further notice. That order is included in this mailing. Should conditions change such that surface water under your water right is needed to protect public health, safety, and welfare, please contact Ms. Melissa Keller, TCEQ Water Rights Liaison at 512-239-1768.**

Consistent with the January 8, 2013 Order, now included in the January 15, 2013 Order, suspended water rights may divert or impound water when flows at certain United States Geological Survey (USGS) gages are above specific levels. In addition, during this suspension, you may continue to divert water which was stored under the provisions of the attached Order, under the terms and conditions of your water right.

A hearing before the Commission will be held to affirm, modify, or set aside the order. This matter is scheduled for consideration at the Commission Agenda on January 30, 2013 at 9:30 a.m. at 12100 Park 35 Circle, Building E, Room 201S, Austin, Texas 78753.
