TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

February 16, 2012

Re: Priority Call Rescinded in the Little Sandy Creek Watershed of the Sabine River Basin

Dear County Extension Agent:

By a letter dated January 4, 2012, the Texas Commission on Environmental Quality (TCEQ) notified you that certain diversions with a priority date of 1903 or later in the Little Sandy Creek Watershed of the Sabine River Basin were suspended due to a priority call on surface water from a senior water right holder.

The senior water right holder has now rescinded the priority call, and the TCEQ has lifted the suspensions. A copy of this correspondence is enclosed for your reference.

The TCEQ continues to monitor the situation closely and strives to balance protection of senior and superior surface water rights while attempting to minimize the impact to junior water right holders, within TCEQ's authority. Please note that should another priority call be made or should drought conditions persist or worsen, suspensions of junior water rights may again be necessary.

Multiple program areas at the TCEQ are actively engaged in the oversight of available water supplies statewide. We are monitoring drinking water supplies, both groundwater and surface water. We are also working with municipalities that face potential shortfalls of available drinking water. There is a common understanding in all of our programmatic efforts that our decisions have profound impacts on the people of Texas. We are weighing our decisions judiciously, paying particular attention to those potential impacts.

The TCEQ is soliciting your help in disseminating appropriate information to affected parties in the Sabine River Basin communities. If this drought cycle worsens, it will be very important that all residents living and working in the Sabine River Basin are well informed. The TCEQ has established a drought web page to provide additional information and address questions and concerns. The drought web page is located at: <http://www.tceq.texas.gov/agency/drought.html>. We have also activated the TCEQ Drought Hotline at 1-800-447-2827.

Should you have questions or need additional information, please contact L'Oreal Stepney, P.E., Deputy Director, Office of Water at 512-239-1321.

Sincerely,

A handwritten signature in black ink, appearing to read "Zak Covar".
