2012 Texas Integrated Report
Water Bodies with Concerns for Use Attainment and Screening Levels

Explanation of Column Headings

SegID and Name: May be one of three types of numbers for SegID. The first type is a classified segment number (4 digits, e.g. 0218), as defined in the Texas Surface Water Quality Standards. The second type is an unclassified water body (e.g. 0218A), not defined in the Standards, associated with a classified water body because it is in the same watershed. The third type are special Segments for Oyster Water Use (e.g. 2421OW) and Beach Watch Use (e.g. 2481CB) special areas.

Area: AU_ID (*e.g.* 0101A_01) and description of the specific area in which one or more water quality standards are not met.

Parameter(s): These are pollutants or water quality conditions that assessment procedures indicate are the reason the water quality standards are not met.

Level of Concern: **CN** - Concern for near-nonattainment of the Water Quality Standards
CS - Concern for water quality based on screening levels
