

**Response to Public Comment on  
Implementation Plan for TMDL for Dissolved Oxygen in Lake O' the Pines  
May 22, 2008**

Tracking Number	Date Recd.	Affiliation of Commenter	Summary of Request or Comment	Summary of TCEQ Action or Explanation
001	5/19/08	Texas State Soil and Water Conservation Board	Comment 1: The commenter recommended using numbers for loadings and allocations as listed in the TMDL document, rather than rounding for use in the I-Plan.	The TCEQ notes that the same metric unit numbers for loadings and allocations are used in both the TMDL document and the I-Plan document. The only difference is that, in the I-Plan, the numbers were presented in both metric and English units rather than just the metric units as was done in the TMDL. English units were added to the I-Plan for informational purposes at the request of watershed stakeholders because English units are used more frequently and are more familiar. No changes to the I-Plan were made as a result of this comment.
			Comments 2 – 26: The commenter recommended changes to text that they had previously provided and other editorial changes to the document.	The document was revised in accordance with the recommendations of the commenter.
