Project	Bird Deterrent Netting Installation		

Construction of bird deterrents on the State Highway 16 Bridge in Kerrville, TX is now complete. Installation of bird netting and spikes commenced on December 17, 2012 and finished on January 30, 2013. The contractor was SCR Construction Co., Inc. out of Richmond, TX. The bird deterrent netting system was successfully installed on bridge spans 2, 3, and 4 in accordance with the “Kerrville Bridges Bird Deterrents” plans and specifications prepared by James Miertschin & Associates, Inc. A final walkthrough was performed by James Miertschin & Associates, Inc. on January 30, 2013. During the final walkthrough general conformance of the cable and anchor system was observed. Pictures and descriptions of project are provided below.

Photos:

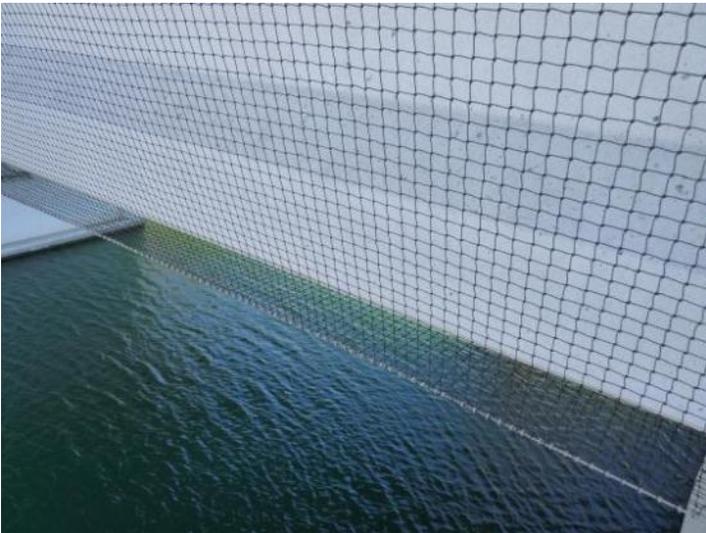

Final netting system layout over Spans 2, 3, and 4.

Installing of the cable and anchor system.

Cable system installed.

Cable system holds netting away from beams in order to prevent wear.

First section of netting installed on Span 4.

End enclosure on Span 4.

End enclosure above bent cap
between Spans 4 and 5.

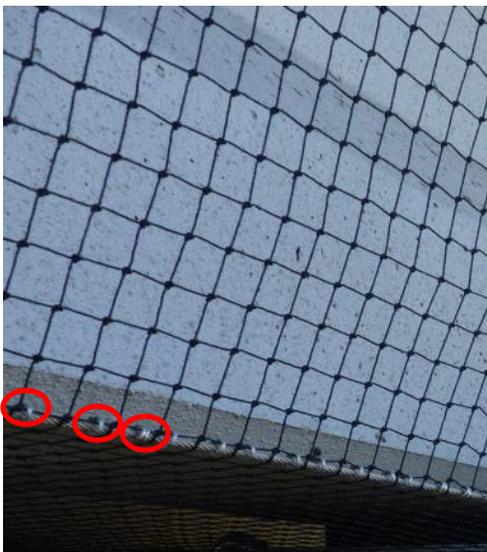

Installation of final section of netting
on Span 2 over the Guadalupe River.

Installation of final section of netting on Span 2 over the Guadalupe River.

Spikes were also applied to the tops of the bent caps to prevent bird roosting.

Net rings (circled in red) were used to attach the netting to the cable system at a rate of 16 per foot. The contractor estimated that he used nearly 70,000 net rings to complete the project.
