## Plain Language Summary of the Bexar County State Implementation Plan Revision

### Introduction

The United States Environmental Protection Agency (EPA) established the maximum level of ozone in the air to protect human health (70 parts per billion for the 2015 ozone standard). Bexar County does not meet the EPA's 2015 standard for ozone and is designated as a nonattainment area under that standard. Texas must develop a plan, known as a State Implementation Plan, or SIP, revision, to meet certain federal Clean Air Act nonattainment area requirements.

### Summary

The proposed SIP revision for Bexar County includes an analysis of whether federal reasonably available control technology requirements are met for sources of air pollutant emissions in the nonattainment area under a moderate nonattainment classification and incorporates new proposed control strategies (Project No. 2023-132-SIP-NR). The proposed control strategies are included in proposed rulemakings that amend 30 Texas Administrative Code Chapters 115 and 117 (Project Nos. 2023-116-115-AI and 2023-117-117-AI).
