Job Description:

Conducts engineer reviews of federal operating permit applications and/or state air permit applications, registrations, and certifications for proposed new and modified construction of facilities that may emit air pollutants. Reviews state and/or federal (operating and new source) air permit applications, registrations, and certifications (i.e., projects) as necessary, defining all sources of contaminants and appropriate federal and state requirements, including rule interpretations, emission calculations, determination of federal applicability, permit shield issues, and stringency determinations; and involving economic development projects, and projects with high public interest, or utilization of developing pollution control technologies. Serves as a mentor for other permit reviewers on various projects; serves as a project manager. Communicates with applicants, agency staff, other state/federal agencies, elected officials, stakeholders, and the general public concerning inquiries pertaining to the applicability of federal and state requirements for the permitting process and the technical completeness of projects. Prepares and issues public notice authorizations, certifies proper notice, attends formal and informal public meetings and mediations, responds to public comments as required, and participates as an expert witness in contested-case public hearings or meetings regarding permit applications and permit by rule registrations. Drafts and edits permit contents and prepares final packages, including comprehensive technical review and/or preliminary determination summaries for projects with federal applicability. Develops and leads technical training activities concerning federal and state permit reviews. Participates in division, section, and team meetings. Prepares policy and guidance materials, including the development and maintenance of technical guidance packages and policy memos, assistance in streamlining activities, development of federal policy/guidance documents, conducting technical training activities, facilitation of meetings, and representation of the division and agency at meetings, training sessions, presentations, etc. Coordinates and oversees special projects as assigned by management.

Military Occupational Specialty (MOS) Codes:

12A, 12X, 51S, 72D, EA, 50, 59, ENG10, 8831, 8834, 3E5X1, and 8E000

Minimum Qualifications:

Texas Professional Engineer's license plus five years of full-time engineering experience beyond licensure.

Qualifying work experience includes that obtained post licensure as an engineering graduate student or teacher.

OR One year of full-time experience at TCEQ as an Engineer VI.

Preferred Requirements:

Bachelor's degree, with a major in engineering from an ABET (Accreditation Board for Engineering and Technology) accredited college or university.

Special Requirements:

Moving up to 20 pounds of office equipment, documents and files.

Traveling up to 5% of the time.

Condition of Employment:

TCEQ will verify Selective Service registration for males born on or after January 1, 1960. If exempt from Selective Service registration selected candidate must provide proof of exemption on first day of employment. Offers of employment are contingent on the candidate having legal authorization to work for the TCEQ. TCEQ will conduct a criminal history records search on candidates selected for posted vacancies. Only applicants who are interviewed will receive written non-selection notification.

Submit a standard State of Texas application for **each job posting** to the Texas Commission on Environmental Quality, Human Resources & Staff Services (HRSS) office by 5:00 p.m. on the closing date. A signed emailed copy is acceptable. In compliance with ADA, if you need any special accommodations during the employment process, please contact HRSS for assistance.
