

Confidentiality Plan

With respect to confidentiality of proprietary information, it is Contractor's policy to comply with all applicable laws, regulations and policies and not knowingly infringe upon the intellectual property rights of others; protect third-party information that is subject to a confidentiality obligation in accordance with the terms of such obligation(s); and require that subcontractors agree to adhere to any confidentiality obligations imposed by Contractor.

In accordance with our policy and capabilities, Contractor intends to manage Business Sensitive Information related to the Study on the Economic Impacts of Recycling in a manner that is aimed at protecting sensitive, confidential, trade secret, and proprietary information from disclosure contrary to executed confidentiality agreements, except as required by applicable law. All collected data will remain the exclusive property of the entity providing such data for the project (hereinafter "Responding Party").

Business Sensitive Information shall include any facility or operation information related to any survey results concerning amounts of recyclable materials, economic or financial data, or solid wastes processed, managed, or directed by a Responding Party.

Business Sensitive Information shall not include information that was in the public domain at the time of its release or which becomes a part of the public domain through no fault of Contractor; information that is released with the written approval of the disclosing firm; information that is released by a Responding Party after five (5) years from the receipt of the information; or information that must be released pursuant to the provisions of a court order. Contractor will protect such Business Sensitive Information with the same degree of care that Contractor uses to protect its own proprietary or confidential information.

Contractor will take the following steps during the course of this project aimed at keeping Business Sensitive Information confidential:

- Contractor will execute a confidentiality agreement with each subcontractor engaged on this project (Attachment 1);
- Contractor will offer to execute a confidentiality agreement with any Responding Party that completes a survey (Attachment 2);

- Contractor will require each employee engaged on the project to sign a statement acknowledging their understanding and acceptance of the confidential nature of data associated with this project;
- Contractor employees not engaged in this project will not be allowed access to confidential project files;
- To address the confidential nature of individual Responding Parties' data, Contractor will aggregate confidential data received from the Responding Parties for presentation to the public, Client, or the Recycling Industry Committee;
- Contractor will not release raw, company-specific data, or Responding Party proprietary or confidential information (unless directed to do so under order of law, which is defined as pursuant to a court order, governmental proceeding, or applicable law, including rulings by the Attorney General under the Public Information Act, Government Code Chapter 552, in which case we will notify Client and the Responding Party).

Contractor makes no representation that data collected will not be subject to state or federal open records laws or regulations or the Freedom of Information Act, as information subject to such rules is governed by the applicable statute/rule. Contractor has no control over the disclosure of such information by court order or as required by applicable law and shall not be held liable for the release of the information as required by law.
