WATER USE PERMIT APPLICATION MATTERS

Item 3

[Docket No. 2016-1612-WR.](#)

Consideration of an application by William Gavranovic, Jr. (Applicant) to extend or delete the term authorization for diversions under Water Use Permit No. 5603. The permit authorizes the diversion and use of 4,350 acre-feet of water per year, being 850 acre-feet from the Old River and 3,500 acre-feet from the Brazos River, Brazos River Basin for agricultural use in Burleson County. The authorization to divert 4,350 acre-feet expired on December 31, 2008, and the Applicant timely requested an extension or deletion of the term and to reduce the diversion amount to 3,210 acre-feet of water per year, divided as 620 acre-feet from the Old River and 2,590 acre-feet from the Brazos River. The Executive Director recommends denial of Application No. 5603A because unappropriated water is not available for a perpetual authorization and appropriated but unused water is not available for extension of the term authorization. The Commission will consider the application, the ED's recommendation, and timely filings on this application. (Calvin Clary, Ruth Takeda)

**Hyperlink
Update**

5:15 PM

Consideration for publication of, and hearings on, proposed amendments to Sections 101.300, 101.302 – 101.304, 101.306, 101.370, 101.372 - 101.374, and 101.376 of 30 TAC Chapter 101, General Air Quality Rules and corresponding revisions to the state implementation plan (SIP). The proposed rulemaking would revise the Emissions Reduction Credit and Discrete Emissions Reduction Credit Programs to address implementation issues that were identified with the generation of emissions credits for area and mobile sources. The revisions include: limiting types of area and mobile sources that are eligible to generate credits; reducing the eligible SIP emissions for credit generation projects; extending the deadline for applying to generate credits from mobile sources; defining the years used to determine the historical adjusted emissions for area and mobile sources; specifying the procedure for adjusting the credits issued for an individual mobile source based on its remaining useful life; reducing the amount of credits issued for an individual source based on the quality of the data used to determine the emissions; providing additional means to specify monitoring, testing, recordkeeping, and reporting requirements and to make the emission reduction permanent and federally enforceable; and various revisions providing greater flexibility for the generation and use

of emission credits. (Guy Hoffman, Amy Browning) (Rule Project No. 2016-041-101-AI)
