**NOTICE OF RESCHEDULE OF HEARING
DOWDELL PUBLIC UTILITY DISTRICT
SOAH Docket No. 582-17-4591
TCEQ Docket No. 2017-0436-MWD
Permit No. WQ0011404002**

APPLICATION.

Dowdell Public Utility District, c/o Smith, Murdaugh, Little & Bonham, L.L.P., 2727 Allen Parkway, Suite 1100, Houston, Texas 77019, has applied to the Texas Commission on Environmental Quality (TCEQ) for new Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0011404002, to authorize the discharge of treated domestic wastewater at a daily average flow not to exceed 900,000 gallons per day. TCEQ received this application on May 29, 2015. The Applicant previously published the Notice of Hearing on July 14, 2017, with the preliminary hearing date of August 28, 2017. This Notice of Reschedule of Hearing is being issued because the original hearing date was cancelled due to the impending impact of Hurricane Harvey on Harris County and southeast Texas.

The facility will be located west of Lozar Drive, approximately 750 feet northwest of the intersection of Lozar Drive and Avalon Aqua Way, in Harris County, Texas 77379. The treated effluent will be discharged to a detention pond system; thence to a 48-inch storm sewer pipe; thence to Harris County Flood Control District (HCFCD) ditch M114-00-00; thence to Willow Creek; thence to Spring Creek in Segment No. 1008 of the San Jacinto River Basin. The unclassified receiving water uses are minimal aquatic life use for the detention pond system, limited aquatic life use for HCFCD ditch M114-00-00, and high aquatic life use for Willow Creek. The designated uses for Segment No. 1008 are high aquatic life use, public water supply, and primary contact recreation. In accordance with 30 Texas Administrative Code (TAC) Section 307.5 and the TCEQ implementation procedures (June 2010) for the Texas Surface Water Quality Standards, an antidegradation review of the receiving waters was performed. A Tier 1 antidegradation review has preliminarily determined that existing water quality uses will not be impaired by this permit action. Numerical and narrative criteria to protect existing uses will be maintained. A Tier 2 review has preliminarily determined that no significant degradation of water quality is expected in Willow Creek, which has been identified as having high aquatic life use. Existing uses will be maintained and protected. The preliminary determination can be reexamined and may be modified if new information is received.

The TCEQ Executive Director has prepared a draft permit which, if approved, would establish the conditions under which the facility must operate. The Executive Director has made a preliminary decision that this permit, if issued, meets all statutory and

regulatory requirements. The permit application, Executive Director's preliminary decision, and draft permit are available for viewing and copying at the Harris County Public Library, Barbara Bush Branch Library at Cypress Creek Branch, 6817 Cypresswood Drive, Spring, Texas. As a public courtesy, we have provided the following Web page to an online map of the site or the facility's general location. The online map is not part of the application or the notice:
