Wetland Plant Communities,
Galveston Bay System

Galveston Bay
National Estuary Program
GBNEP-16
March 1992
Wetland Plant Communities,
Galveston Bay System
This project has been funded in part by the United States Environmental Protection Agency under assistance agreement # CE-06550-01 to the Texas Water Commission. The contents of this document do not necessarily represent the views of the United States Environmental Protection Agency or the Texas Water Commission, nor do the contents of this document necessarily constitute the views or policy of the Galveston Bay National Estuary Program Management Conference. The information presented is intended to provide background information for Management Conference deliberations in drafting of official policy in the Comprehensive Conservation and Management Plan (CCMP). The mention of trade names or commercial products does not in any way constitute an endorsement or recommendation for use.
Policy Committee

The Honorable Rodney Ellis, Chair  
*Texas Senate*

Mr. John Hall  
*Chair, Texas Water Commission*

Ms. Linda Shead  
*Executive Director, Galveston Bay Foundation*

Ms. Eileen Crowley  
*Former President, Greater Houston Partnership*

Mr. Buck J. Wynne, III, Vice-Chair  
*Regional Administrator, EPA Region 6*

Mr. John Wilson Kelsey  
*Vice-Chair, Texas Parks and Wildlife Commission*

Mr. Charles W. Jenness  
*Chair, Texas Water Development Board*

The Honorable Jon Lindsay  
*County Judge, Harris County*

Local Governments Advisory Committee

The Honorable Ray Holbrook, Chair

Management Committee

Mr. Myron O. Knudson, Chair  
Ms. Barbara Britton, Vice-Chair

Scientific/Technical Advisory Committee

Dr. Frank M. Fisher, Jr., Chair  
Dr. Robert McFarlane, Vice-Chair

Citizen's Advisory Steering Committee

Ms. Sharron Stewart, Chair  
Ms. Glenda Callaway, Vice-Chair

Galveston Bay Public Forum

Dr. Martin Arisco, Chair  
Dr. Don Bass, Vice-Chair

Program Director

Dr. Frank S. Shipley

1. Index map of the Galveston Bay area ................................................................. 4
2. Natural systems in the Galveston Bay area .......................................................... 6
3. Location map of field survey sites ....................................................................... 15
4. Index map of quadrangles covering the Galveston Bay area ............................... 19
5. Low salt-marsh community of Spartina alterniflora and open water on the inland
   margins of Jones Bay (east end of West Bay) ....................................................... 28
6. Salt-marsh community on Follets Island .............................................................. 28
7. Low salt-marsh community inland from West Bay ............................................... 29
8. Salt-marsh community on the bayward margin of Bolivar Peninsula ................. 29
9. Salt-marsh community at Houston Point .............................................................. 30
10. Salt marsh/sand flat community on Follets Island ............................................. 30
11. Profile of salt marsh at Smith Point showing relative elevations of plant communities ... 31
12. Profile of brackish marsh in the Brazoria National Wildlife Refuge showing relative
    elevations of plant communities ...................................................................... 32
    of Hoskins Mound ............................................................................................ 34
    Mound .............................................................................................................. 34
15. High and low brackish-marsh communities in the Anahuac National Wildlife Refuge .. 35
16. Brackish-marsh community dominated by Spartina patens, west of High Island .... 35
17. Brackish-marsh community in a swale on Galveston Island ............................... 36
18. Brackish- to fresh-marsh community in a depression on Follets Island, gulfward of
    highway ........................................................................................................... 36
20. Brackish-marsh community on the Trinity River delta near the delta/bay margin .. 37
21. Fresh-marsh community in the Trinity River valley north of Interstate Highway 10 .. 39
22. Fresh- to brackish-marsh community on the Trinity River delta near Old River Lake .. 39
23. Fresh-marsh and forested-wetland communities in the San Jacinto River valley .... 40
24. Fresh-marsh community of Scirpus californicus in an ox-bow lake in the Brazoria
    National Wildlife Refuge ................................................................................. 41
25. Fresh-marsh community dominated by Eleocharis quadrangulata (squarestem
    spikesedge) .................................................................................................... 41
26. Swamp community dominated by *Taxodium distichum* along the Trinity River inland from Interstate Highway 10 ................................................................. 43

27. Generalized map showing the locations of submerged vegetation along the margins of the Trinity River delta ........................................................................................................... 44

28. Generalized map showing the locations of submerged vegetation in 1956 and 1987 in the Galveston Bay system ........................................................................................................... 45

29. Disturbed-area community on a small spoil mound along the Intracoastal Waterway on the landward margin of Follets Island ........................................................................... 50

Tables

1. Generalized characteristics of active coastal processes and conditions in the Galveston Bay area ................................................................................................................................. 7

2. Dominant and common plants in brackish and fresh marshes in Chambers County .......... 9

3. Common species in salt and fresh marshes in the Brazoria National Wildlife Refuge, Brazoria County ........................................................................................................... 10

4. Typical plants found in grassflats, marshes, and transitional areas in the Galveston Bay area ......................................................................................................................... 11

5. Typical plants identified at saline sites at Armand Bayou and vicinity .......................... 12

6. Water regime descriptions for wetlands used in the Cowardin and others (1979) classification system ................................................................................................................... 14

7. List of USGS 7.5-minute topographic maps that encompass the Galveston Bay project area ................................................................................................................................. 20

8. List of common plant species for various marshes based on field surveys .................. 21

9. Species most frequently observed at survey sites in the study area ............................ 22

10. Wetland indicator status and common names of plants identified in field surveys ...... 24

11. Characteristics of typical soils at field survey sites ...................................................... 46
