

# Texas Is Still in Drought

After the driest year in recorded history in 2011 and months of near-record drought during 2012 and 2013, many communities around the state are continuing to experience moderate to exceptional drought conditions. With statewide reservoir levels at very low levels, it is crucial that Texans do their part to Take Care of Texas and conserve water.

## Pledge to Take Care of Texas

Visit <TakeCareOfTexas.org> to take the online pledge to do your part. There you'll find water conservation tips and successes as well as free publications to help you save water during drought.
