

ENGINEER HIRING PROGRAM

Calling all Texas Professional Licensed Engineers

At the Texas Commission on Environmental Quality, engineers play a vital role in accomplishing the mission of the agency to protect our state's natural resources, to ensure clean air and water, and to dispose of waste safely. Engineers at the TCEQ have opportunities for increasing job responsibilities, as well as pay, while enjoying great benefits and retirement options.

Interested in Joining the Team?

The Engineer Hiring Program is open to any Texas Professional Licensed Engineer, whether you are newly licensed or have been licensed for years. The TCEQ has opportunities for all levels.

WHO IS ELIGIBLE?

The program is available to individuals who hold a Texas Professional Engineer's License.

HOW DOES THE PROGRAM WORK?

Hiring supervisors in the Austin Central Office, or any of the TCEQ's sixteen regional offices, may request applicants with a P.E. license and geographic preferences from the pool of engineer applicants.

HOW DO I APPLY?

Complete a State of Texas Application. Note in the job title field "Engineer Hiring Program." Submit your application to <jobs@tceq.texas.gov>.

What TCEQ Engineers are Saying About Working Here:

"My ten-plus years with the TCEQ have allowed me to grow in my professional knowledge, gain valuable experience, and acquire in-depth training (as well as train others) to serve and protect the public. My quality of life has exceeded what I found possible in private-sector engineering jobs."

– Johnny Cosgrove, P.E., Dam Safety Engineer

"I enjoy being able to work with the individual companies and consultants that submit air permits, as well as representing the people of Texas in the public sector. The working atmosphere and professional development opportunities have been an advantage over my previous private-industry experience, and I enjoy the work-life balance afforded by working at the TCEQ."

– Brandon Marsh, P.E., Air Permits Division

"I have been working at the TCEQ since graduating with a Master's degree from UT Austin. Working at the agency for the past 22 years has been a very rewarding professional experience. I have worked in several different programs ranging from engineering consulting to both air and waste permitting. Now I am a senior professional engineer working on highly technical environmental permitting projects, interacting with companies, consultants, and the public."

– Jean Shaw, P.E., Senior Engineer
