### 582 Commission on Environmental Quality

---

#### GENERAL INFORMATION

The Texas Commission on Environmental Quality (TCEQ) strives to protect our state's public health and natural resources consistent with sustainable economic development. Our goal is clean air, clean water, and the safe management of waste. To accomplish this mission, we will:

- base decisions on the law, common sense, sound science, and fiscal responsibility;
- ensure that regulations are necessary, effective, and current;
- apply regulations clearly and consistently;
- ensure consistent, just, and timely enforcement when environmental laws are violated;
- ensure meaningful public participation in the decision-making process;
- promote and foster voluntary compliance with environmental laws and provide flexibility in achieving environmental goals; and
- hire, develop, and retain a high-quality, diverse workforce.

Our mission will be accomplished using our state resources in the most effective and efficient manner possible. TCEQ continues to evaluate and improve its business practices to ensure the protection of public health and the environment. We are ever mindful of the competing demands on state resources. We also accept as part of our charge the requirement to work within our approved funding and staffing limitations. This requires that we continue to re-evaluate how to efficiently meet current and new challenges.

#### GOVERNING BOARD INFORMATION

Bryan W. Shaw, Ph.D., P.E. Chairman, Sept. 10, 2009 – Aug. 31, 2013, Elgin.  
Toby Baker, Commissioner, April 16, 2012 – Aug. 31, 2017, Austin.  
Jon Niermann, Commissioner, Oct. 1, 2015 – Aug. 31, 2021, Austin.

#### OVERVIEW OF BUDGET REQUEST

The TCEQ has prepared its funding request in compliance with the policy letter dated June 30, 2016, instructions issued by the Governor's Office of Budget, Planning and Policy and the Legislative Budget Board. As a result, the request for the 2018-2019 biennium contains a reduction of four percent in General Revenue and General Revenue Dedicated Funds, from the fiscal year 2016-17 adjusted levels of funding. It also includes the ten Percent Biennial Base Reduction Options Schedule. The proposed reductions in general revenue-related funding follow careful examination of agency funding priorities and are proposed with the intent that they would have as minimal an impact as possible on priority services. The four percent reductions would impact Texas Emission Reduction Plan (TERP) grant funding (\$26,680,867), as well as funding for Closed Battery Recycling (\$1,700,000), Data Center Services (\$976,784 General Revenue only), and Hazardous Chemical Events Community Planning Grants (\$4,000,000), and the Environmental Radiation and Perpetual Care Account (\$2,283,333). The 10 Percent Biennial Base Reduction Options Schedule reflects reductions in Data Center Services (\$2,344,283 GR only) and TERP Grants (\$77,933,280).

The TCEQ is requesting exceptional items to ensure the agency's ability to address priority issues for fiscal years 2018 and 2019. These items total \$33,958,490 for the biennium. There are a total of nineteen new FTEs requested for all exceptional items. These items are presented in more detail under the Exceptional Items heading below. The baseline biennial request totals \$891,235,694 with fee generating sources comprising approximately 87 percent of the request, General Revenue approximately three percent of the request, and funds received from the federal government and other sources comprising approximately ten percent of the request.

Automated Budget and Evaluation System of Texas (ABEST)

---

**582 Commission on Environmental Quality**

---

EXCEPTIONAL ITEMS

TCEQ has conducted a review of its funding needs for the next biennium, and has identified the following exceptional items. The total request for these items is for \$16,868,685 in FY 2018 and \$17,089,805 for FY 2019 in General Revenue related funding. Nineteen additional full-time equivalent positions are requested.

1) Public Drinking Water Needs (PDW)

Additional funding is requested for the Public Drinking Water System Program to address growing needs and the reduction in federal funds which supported the program. There are increased costs associated with collecting additional water system samples, implementing new compliance schedules, as well as additional EPA sampling. There has been an increased level of financial, managerial, and technical assistance to public water systems due to emergency conditions ranging from flooding to drought, a growing population, and an increase in complex, unfunded federal regulations. Funding will provide support to implement and maintain the public drinking water compliance program.

2) Water Quality Needs

Water quality monitoring instruments are required for the collection and analysis of surface water quality monitoring data. Funding is required for the Continuous Water Quality Monitoring Network (CWQMN), the Surface Water Quality Monitoring Program (SWQM), and the Sugar Land Laboratory. The water quality data collected supports: the Texas Integrated Report, the Texas Surface Water Quality Standards, the Total Maximum Daily Load and Nonpoint Source programs, Clean Rivers Program, the continuous water quality monitoring network (CWQMN), and the environmental monitoring and response system (EMRS). The funding is also for Total Maximum Daily Load (TMDL) contracts that support the program and provide valuable expertise, equipment, and resources for the TCEQ in various watersheds across the state. Lastly, funding is also for escalating costs in two state university contracts that provide assistance in processing stormwater and wastewater permits, approximately 2,000 authorizations per year, and statewide public notices for General Permit renewals.

3) Targeted Salary Classification Increases

The agency continues to lag state agency averages, which contributes to turnover in some classifications. The classifications of interest include natural resource specialists, accountants, auditors, contract specialists, electronics technicians, engineers, geoscientists, planners and systems analysts.

4) Revised Total Coliform Rule (RTCR)

The Federal Revised Total Coliform Rule (RTCR) protects public health by reducing potential pathways for fecal contamination into public drinking water distribution systems. All public water systems (PWS) must comply with the new requirements. Staff will be responsible for: thorough review and approval of RTCR assessments; corrective actions; compliance; the revision of 6,900 PWS site sampling plans; and seasonal start-up procedures. Additional funding will be used for compliance training and outreach events, increased Financial, Managerial, and Technical Assistance (FMT) compliance support, and additional operator training.

5) Agency Operational Needs

The agency has historically funded shortfalls in operational needs with funds that would have been used to pay the salaries of replacement Full Time Equivalent (FTEs)

**582 Commission on Environmental Quality**

---

employees. The agency seeks to equalize these costs while ensuring retention of a qualified workforce. Examples of operational needs funded by salaries of vacated positions include:

- Responding to requests from the public for services for failing septic tanks, including conducting soil and water samples when the public has concerns with contamination;
- Management of the Central File Room and conversion to electronic records which supports public access of the agency's primary regulatory records;
- Response to technology changes for increased cyber security standards, accessibility requirements, monitoring and data collection methods; and,
- Repair of a leaking roof that houses lab equipment.

6) Critical Technology Upgrade

The requested funding will be used to modernize key enterprise applications identified as "legacy" by House Bill 2738, (83rd Legislature). Many of the largest and most critical of the legacy applications were developed using a proprietary application development technology called CA Gen, a computer aided software engineering (CASE) tool. Support for these applications is limited. Of all the CA Gen applications assessed, three mission critical applications were determined to present the most risk to agency operations: Central Registry, the Consolidated Compliance and Enforcement Data System, and the Commissioners' Integrated Database. These applications were developed to provide a centralized source of agency information supporting the agency's core functions including permitting, enforcement and public access to items pending for Commission consideration. Each one works inter-dependently and interfaces with multiple systems throughout the agency. The remaining CA Gen applications to be re-developed include the State of Texas air reporting system, Occupational Licensing, Compliance History, Dam Safety Module, Integrated Web Reporting, and the Water Districts Database.

7) West County Road 112 Ground Water Plume Filtration Systems

Additional funding is requested to support the monitoring, maintenance, and installation of filtration systems on private water wells impacted with total chromium contamination above the federal maximum contaminant level at the West County Road 112 Ground Water Plume Federal Superfund Site. This funding will ensure that private well users have access to potable water and filter replacements for the filtration systems. Between Fiscal Years 2009 and 2016, the TCEQ has expended over \$8.6 million in state funds for this purpose. In prior years, the program had sufficient cost recovery funds to support these filtration activities, but recently there has been a reduction in the amount of available cost recovery funds.

8) Take Care of Texas

Consistent with public education requirements, the Take Care of Texas (TCOT) statewide campaign encourages all Texans to help keep our air and water clean, conserve water and energy, reduce waste, and save a little money in the process. The Take Care of Texas initiative ensures the agency educates the public on the importance of conserving and protecting the state's natural resources. Goals are achieved through the promotion of a dual-language website, statewide conferences and events, and bilingual publications.

9) EPA RCRA Funding Reductions

Additional funding is requested to address funding reductions in the Federal Resource Conservation and Recovery Act (RCRA) Program. EPA announced a new methodology for allocating hazardous waste grants to states for fiscal years 2016-2020. The new methodology reflects shifts in program priorities since the previous formula was developed in 1996. As a result of the new methodology, grant funding for the TCEQ will be reduced over a five year period. Reductions will impact core

**Administrator's Statement**

8/23/2016 4:49:52PM

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**582 Commission on Environmental Quality**

---

permitting, compliance and remediation activities related to hazardous waste facilities. The agency will be reduced by approximately \$1.3 million by fiscal 2019.

10) Funding for Leases

Funding is requested to pay for lease increases. The funding is for a new lease in Corpus Christi, and the others are renegotiated leases in Austin, Lubbock, and Houston (boat storage). These leases were last executed by Texas Facilities Commission (TFC), some more than ten years ago.

11) State Office of Risk Management (SORM) Auto, Property, and Marine Insurance

Through SORM's Statewide Auto Insurance Program, TCEQ will be able to transfer the uncertain risk of auto losses to a highly rated insurance company. The physical damage insurance will cover vehicles, trailers, boats, and equipment breakdown. It will offset the agency cost in the event of a natural disaster at high risk coastal regional offices.

12) Data Center Services (DCS)

The DCS budget includes costs for the TCEQ to participate in the managed statewide data centers. In addition, the budget includes all TCEQ hardware, storage, software licensing, backup recovery, databases, and agency applications. Any loss of funding will either impact the availability of applications or data center services. A reduction in funding would have one or more of the following impacts: reduce ability for programs such as GIS and electronic records management to store data; reduced application development due to reassignment for infrastructure consolidation; or reduced agency backup schedules which would impact agency continuity of operations.

13) Emissions Banking and Trading Support

The agency is requesting additional staff to process Air and Mobile Source Emissions Credits to support the Emissions Banking and Trading Program (EBTP). Revised rules will result in an increased number of applications from area and mobile sources. Additional FTEs would be used to review credit generation and use applications, respond to increased emissions inventory reporting, complete statutorily-required compliance assessments and analyses and issue required documentation as needed to ensure that the credited emissions reductions are permanent and enforceable as required under the Federal Clean Air Act.

OTHER FUNDING ISSUES

Water Funding

The revenue that supports the Water Resource Management Account 153 (WRM account) is insufficient to support the agency's estimated budget. The costs and obligations to the WRM account have increased as General Revenue funding for the agency's water programs has decreased. Programs impacted include Dam Safety, Bays and Estuaries, and Total Maximum Daily Loads. These programs do not have a direct fee to generate revenue to support their costs. The agency has been increasing the Consolidated Water Quality (CWQ) fee the last several years to maintain sufficient revenue. However, revenue to the WRM Account is not keeping pace with the increased obligations placed on it.

1) Government Effectiveness and Efficiency Report (GEER)

**582 Commission on Environmental Quality**

---

Prior to the 84th Legislative Session, the LBB in its GEER report identified concerns of the Water Resource Management (WRM) account and recommendations to address the revenue shortfall. One of the recommendations was to complete a water study. This recommendation became a rider in the 2016-2017 General Appropriations Act (GAA), Article IX, Section 18.01 (c).

Most of the discussion in the report focused on the TCEQ's highest revenue generating fees – Consolidated Water Quality Fee (CWQ), the Public Health Service Fee (PHS), and the Water Utility Regulatory Assessment Fee (WRU). These fees comprise 84 percent of the total collections in the WRM account. The report suggests that there is an inequity between fee payers for each of the fees. The inequities identified in the GEER are described below:

- The CWQ has a statutory cap, currently set at \$115,000. An entity that could pay as high as \$2 million is paying only \$115,000, while an entity with more limited resources is paying almost the same amount;
- The PHS fee is calculated on the number of connections rather than water consumption, therefore, an industry or a commercial user will pay the same fee as a residential user; and
- The WRU fee does not apply to all water and wastewater users and the fee is either 0.5%, or 1.0%. This fee also supports appropriations to the Public Utility Commission and the Office of Public Utility Counsel, creating additional obligations to the account.

2) Article IX Section 18.01

As noted above, TCEQ was directed to conduct a study of the WRM account by Article IX, Section 18.01, of the 2016-17 General Appropriations Act. Specifically, subsection (c) of the rider required the agency to:

- Review the agency's water programs and determine the level of agency workload related to the revenue generated by the associated fee payers and the benefit to the fee payers;
- Use this analysis to develop a methodology to determine the appropriate level of rates that would generate revenue in proportion to the workload and the fee payer's benefit; and
- Use this new methodology for future fee rate setting.

The Article IX rider also directed the TCEQ to raise the CWQ fee and the PHS fee to fulfill the agency funding obligations. Both fees were increased, though the PHS fee required agency rulemaking while the CWQ fee increase did not require rulemaking. The adopted PHS rule provides flexibility by allowing the agency to raise the fee in the future if needed to support the agency's water programs.

3) Water Study Workgroup

The agency created an internal workgroup to perform the Article IX study which consisted of representatives from the Office of Water, the Office of Compliance and Enforcement, the Office of Legal Services, and the Office of Administrative Services. The workgroup compiled the costs associated with the water programs and the

**Administrator's Statement**

8/23/2016 4:49:52PM

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**582 Commission on Environmental Quality**

---

number of FTEs supporting each program. Staff also identified the source of funding, including Federal Funds, Interagency Contracts, and General Revenue. In addition, the staff listed the Water Resource Management fees that support the programs, and the benefit to the fee payer. Using this data, the workgroup allocated the fees to the appropriate programs to determine which programs have insufficient revenue to support their costs.

TCEQ's Water Study Workgroup is finalizing its review and recommendations of the Article IX study and potential changes to fees. The final review will be made available to the public and scheduled for discussion and consideration in the fall of 2016.

**Abolish the Used Oil Recycling Account**

The agency recommends that the use of the Used Oil Recycling Account be expanded and that the fee that is dedicated to this account along with the current fund balance in the account be transferred to the Water Resource Management Account.

The Used Oil Recycling Account 146 was created in 1991 by the 72nd Legislature and was established for public education, grants, and registration of used oil collectors, transporters, marketers, and recyclers. The purpose was to prevent pollution of water resources from the dumping of used oil. Revenue in the account consists of a penny per quart fee on the sale of automotive oil.

An oil manufacturer or importer who makes a first sale of automotive oil in the state is required to remit a fee of one cent per quart or four cents per gallon of oil. A first sale of oil does not include the sale of oil to a manufacturer or distributor or the sale of oil to a subsequent purchaser who maintains a used oil collection center. The fund balance as of August 31, 2015 was \$17.8 million. The fee generates approximately \$2 million per year and only \$0.5 million is appropriated, so the fund balance is projected to grow by \$1.5 million annually.

The Water Resource Management Account 153 is significantly underfunded, especially as the amount of General Revenue appropriated to water programs has decreased over the years. Transferring the existing Used Oil Recycling Account balance and future collections of the fee to account 153 would provide water account balance support and stabilize funding for TCEQ's current water programs. Also, the purpose of the automotive oil sales fee would continue to support programs that protect the water resources of the state. Further, there is no "new fee", as the fee is currently assessed. This is beneficial to individual, existing TCEQ fee payers as well as the general public. As Texas' population grows, it is imperative to achieve revenue reliability to ensure the protection of Texas' water resources.

**Tier II Chemical Reporting Program**

The Tier II Chemical Reporting Program was transferred to the TCEQ per House Bill 942, 84th Regular Session, effective September 1, 2015. The fund balance for General Revenue-Dedicated Workplace Chemicals List Account No. 5020 was approximately \$4.5 million at the time of the program transfer. A Department of State Health Services (DSHS) exceptional item was also approved in the 84th legislative session for \$4,000,000 for Hazardous Chemical Events Community Planning Grants from Fund No. 5020. This Tier II grant funding was subsequently transferred to TCEQ from DSHS. As part of TCEQ's implementation of the Tier II Program, the TCEQ is monitoring demand for the \$4 million in grant dollars by local emergency planning committees as well as the reduced fund balance in anticipation of programmatic costs exceeding revenue in future biennia.

**AUTHORITY TO CONDUCT BACKGROUND CHECKS**

As required by, the Human Resources and Staff Services (HRSS) division conducts criminal history record searches on all applicants selected for employment. If the

**Administrator's Statement**

8/23/2016 4:49:52PM

---

selected applicant has a criminal history record, HRSS will consult with the General Law Division to determine if the applicant is eligible for employment with TCEQ. HRSS will notify applicants who are rejected because of criminal history record information and provide the applicant five business days to dispute and correct the information.

# TCEQ Organizational Chart

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

At the top of the operating structure of the TCEQ are the offices of the commissioners. The executive director reports to the commissioners, with several divisions lending direct support. The agency's primary environmental programs and administrative offices are represented by six major offices, all of which have broad responsibilities. Under each of those offices are divisions with clearly defined duties.

**Commissioners**

Three full-time commissioners are appointed by the governor to establish overall agency direction and policy, and to make final determinations on contested permitting and enforcement matters. They are appointed for six-year terms with the advice and consent of the Texas Senate. A commissioner may not serve more than two six-year terms, and the terms are staggered so that a different member's term expires every two years. The governor also names the chairman of the commission. The following four divisions report directly to the commissioners.

*General Counsel*

The General Counsel is the chief legal and the chief ethics advisor for the agency. The general counsel provides legal assistance to the commissioners for their review of permits, proposed enforcement actions, rules, and other matters, in addition to managing the administrative affairs of the commissioners' office.

Alternative Dispute Resolution (ADR) staff under the general counsel assist permit applicants and persons opposed to the applications in resolving their differences informally, if possible, to avoid the time and expense of a contested public evidentiary hearing. ADR procedures are voluntary, and participation in ADR does not forfeit a person's right to a hearing if ADR does not result in a settlement.

*Chief Auditor*

The Chief Auditor's Office (CAO) provides assurance and advisory services that help the commissioners and management meet agency goals and objectives. The CAO provides independent and objective information, analyses, and recommendations to assist management in effecting constructive change, managing business risk, and improving the compliance and accountability of the regulated community and business partners.

*Chief Clerk*

The Office of the Chief Clerk issues required notices of applications, public hearings, and public meetings. The OCC also prepares and maintains the agendas and backup material for commission agenda meetings and work sessions, transmits final decision documents (issued by the commission and the executive director) as required, and maintains the official records of pending commission proceedings.

The OCC tracks the status of all matters pending before the commission and executive director for approval after notice is issued. These include enforcement cases, rules, permit and license applications, registrations, and actions involving water districts. The OCC schedules and conducts public meetings and hearings where the public may obtain information and provide comments on pending permitting actions.

If you wish to electronically file hearing requests or comments regarding a pending permit application, you may do so using the OCC's eComments system. If you wish to file a pleading or view filed pleadings for a docketed case pending before the commission, you may do so using the OCC's [eFiling system](#)

*Public Interest Counsel*

The Public Interest Counsel was created by the legislature to ensure that the public's interest is represented in issues considered by the commission. The Counsel does not formally represent individuals at commission proceedings. However, citizens who have questions about the legal aspects of

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

dealing with the TCEQ, its hearing process, and its rules can obtain help from the Public Interest Counsel. Assistance is available to anyone who is affected by a particular permit application or other agency authorization. The staff of the Public Interest Counsel also provides assistance to people with questions about enforcement proceedings.

**Office of the Executive Director**

The executive director, who is hired by the commissioners, is responsible for managing the agency's day-to-day operations. Major responsibilities include directing operations of approximately 2,800 employees in 17 statewide offices, implementing commission policies, making recommendations to the commissioners about contested permitting and enforcement matters, and approving uncontested permit applications and registrations. The deputy executive director serves as the chief operating officer to assist the executive director in the administration of the agency. In coordination with the Office of Legal Services, the special counsel advises the executive office on pending litigation and other legal matters. Six office clusters report to the executive director. Each office is headed by a deputy director. These deputies are responsible for administering our regulatory and administrative programs. Five divisions report directly to the executive director:

*Take Care of Texas*

Take Care of Texas is a statewide campaign that provides helpful information on Texas' successes in environmental protection and encourages all Texans to help keep our air and water clean, conserve water and energy, and reduce waste. The program includes an interactive website at [TakeCareOfTexas.org](http://TakeCareOfTexas.org), radio and television public service announcements, free print publications to educate Texans of all ages, classroom resources, social-media sites, and more.

*Agency Communications*

Agency Communications works to continuously improve and streamline the delivery of print and Web information to the public and within the agency. This division coordinates the agency response to all media inquiries, prepares and distributes agency news releases, and coordinates news conferences. The division also includes the agency library and a publishing staff, that coordinates, produces, or distributes regulatory and general information materials for both print and Web.

*Intergovernmental Relations*

Intergovernmental Relations (IGR) coordinates the agency response to legislative inquiries and constituent issues, legislative initiatives, and interim committee studies affecting the agency. IGR also coordinates the agency's testimony and participation during legislative sessions and ensures that the Legislature is informed of the TCEQ's initiatives and activities. IGR serves as a clearinghouse for border affairs information for the TCEQ and coordinates agency comments on national policy issues.

*Environmental Assistance*

The Environmental Assistance Division (EAD) provides confidential compliance assistance on air, water, and waste regulations to small businesses and small local governments; works with regulated entities, industries, and manufacturers to implement pollution prevention, recycling, and innovative environmental programs; and educates the public and the regulated community on rules and environmental issues. EAD services include:

- A confidential compliance assistance hot line (800-447-2827) for small businesses and local governments;
- Online tools and resources for small businesses and local governments;

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Free on-site technical assistance and other resources for regulatory compliance;
- Assistance with pollution prevention planning and reporting;
- Seminars and workshops on regulations and pollution prevention;
- Information on innovative practices and technologies such as environmental management systems and clean school buses;
- Environmental education resources for schools and educators;
- Awards and special events to recognize environmental leadership;
- Recycling and disposal opportunities in urban, rural, and agricultural communities (including materials such as computer equipment);
- Resources for individuals, communities, schools, and businesses that want to Take Care of Texas; and
- Voluntary programs, advisory committees, and partnerships encouraging public participation.

EAD also implements the TCEQ's Public Education Program. The program answers questions about pending TCEQ permits, explains the permitting process, helps the public learn of opportunities for public participation on permit applications, and staffs a toll-free hotline for the general public (800-687-4040). In addition, the Public Education Program distributes the TCEQ Customer Satisfaction Survey, which encourages customers' feedback on their experiences with the agency. Every two years, the Public Education Program summarizes the most recent survey responses in a Report on Customer Service to the Legislative Budget Board.

*Toxicology*

The Toxicology Division gives toxicological support to a broad range of agency activities. The division assesses risks to human health and makes technical recommendations regarding agency permitting, monitoring, and enforcement. TCEQ toxicologists:

- Conduct the toxicological evaluations of air permit applications.
- Develop Effects Screening Levels.
- Develop Air Monitoring Comparison Values.
- Evaluate environmental data collected from the air, water, and soil.
- Characterize and communicate risk to citizens and external stakeholders.
- Make recommendations for the addition or removal of areas to the Air Pollutant Watch List based on air monitoring data.
- Review Baseline Risk Assessments and other remediation-related documents submitted under the Texas Risk Reduction Program and the Risk Reduction Rules for state and federal Superfund sites.

Six office clusters report to the executive director. Each cluster is headed by a deputy director. These deputies are responsible for administering the agency's regulatory and administrative programs.

**Office of Administrative Services**

The Office of Administrative Services provides service and support to agency staff and external customers, supplying the essential administrative infrastructure required to maintain business operations. Services include:

- Budget and financial administration;

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Human-resources management and staff development;
- Information-technology and record management; and
- Management and support of assets, physical property, procurement and contracts, and HUB programs.

*Chief Financial Officer*

The Chief Financial Officer's office oversees all budgeting and financial issues in the agency. This office oversees the development of the agency's strategic plan, biennial appropriations request, the annual operating budget, and quarterly performance reports to the Legislature and the governor. On fiscal matters, this office is the point of contact for the TCEQ's oversight agencies. The office is involved in bill implementation and preparing fiscal notes that have revenue requirements and it prepares the annual financial report, monitors revenue and expenditures, estimates revenue collections, and provides fiscal analysis and reporting.

*Budget and Planning*

Budget and Planning is responsible for developing and monitoring the agency's annual operating budget. Staff prepares, monitors, and submits all of the agency's federal grant applications and work plans, providing centralized grants management in support of TCEQ programs. The division also develops the agency's biennial legislative appropriations request. In addition, staff conducts special analyses to monitor the achievement of agency goals and priorities.

*Financial Administration*

The Financial Administration Division is responsible for managing the agency's financial transactions, ensuring the integrity of its accounting records, and maintaining adequate internal controls to safeguard its financial assets. This division is responsible for payroll and timekeeping, payments to employees and vendors, billing and collection of fees and federal grants, centralized revenue management, financial reporting, and financial assurance. This division also conducts procurement and contracting activities, coordination of the Historically Underutilized Business Program, and contract workforce monitoring.

*Human Resources and Staff Development*

The Human Resources and Staff Services Division provides a wide range services. The division recruits qualified staff to fill vacancies, administers employee-benefit programs and special leave programs, ensures compliance with state and federal laws on equal opportunity and fair labor practices, offers policy guidance to employees, administers employee programs, supplies human resources data to agency decision makers, and offers training to help employees advance along career paths and formalized career ladders.

The division is also responsible for risk management, physical property management, and fleet/supply management. The division reviews and processes health, safety, and security concerns; conducts safety training and inspections; and provides centralized receiving and distribution services. In addition, the division provides copying and bulk printing services, mail and messenger services, facilities liaison services, and management of agency-wide utilities and lease program.

*Information Resources*

The Information Resources Division supports enterprise applications, data, and telecommunication systems that further the agency's mission. The division is responsible for provision of hardware and software to agency employees, and operation of the physical IT and telecommunications infrastructure at the TCEQ's Austin and regional locations. The division provides technical expertise and leadership in software development and

## Organizational Structure 85<sup>th</sup> Regular Session, Agency Submission

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

enhancement for enterprise information systems as well as IT project management and business analysis for agency programs. The division develops IT budgets, plans, and reports for agency management and other agencies. The division also administers the agency's central records system through a contract with a commercial records-management firm, and coordinates the TCEQ's response to open records requests.

### **Office of Air**

This office oversees all of our air permitting activities. The office also implements plans to protect and restore air quality in cooperation with local, regional, state, and federal stakeholders, and tracks progress toward environmental goals, adapting plans as necessary.

#### *Air Permits*

The Air Permits Division processes air permits and authorizations for facilities that, when operational, would emit contaminants into the atmosphere. The division does this through two major air permitting programs, New Source Review (NSR) Permits and Title V Federal Operating Permits.

#### *New Source Review Permits*

Several potential air authorizations fall under the category of NSR Permits:

- De Minimis
- Permits by Rule (PBR)
- Standard Permit (SP)
- Construction, Modification
- Prevention of Significant Deterioration (PSD)
- Nonattainment

#### *Title V Federal Operating Permits*

Two kinds of permits are possible under the category of Title V Federal Operating Permits:

- Site Operating Permit
- General Operating Permit

#### *Air Quality*

The Air Quality Division works to protect and restore air quality through four programs.

#### *Air Implementation Grants*

Under the Texas Emission Reduction Plan (TERP), Air Implementation Grants provide funding and financial incentives to offset the costs of eligible projects that reduce emissions of NO<sub>x</sub> from high-emitting diesel sources.

#### *Air Industrial Emissions Assessment*

- Provides information about the Toxic Release Inventory Program;
- Maintains the inventory of point source emissions for industrial sources of air contaminants;
- Develops the emissions inventory for area emissions, such as those from small businesses that are not regulated as point sources, and;

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Assists companies in interpreting emissions and inspection-fee rules and performs audits to ensure fees have been correctly reported.

*Air Modeling and Data Analysis*

- Analyzes data and conducts photochemical models in support of pollution control strategies and designs.
- Manages air quality research for the agency, including the:
  - Texas Air Quality Study (2005-06), which examines the causes of air pollution in Texas and collects data critical to developing controls to meet new federal clean air standards; and
  - Texas Air Quality Study (2000), data from which are used in the development of the State Implementation Plan.
- Coordinates the Rider 8 program, an initiative that supports air quality planning activities to reduce ozone in specified areas of the state. The areas include: Waco, El Paso, Beaumont, Austin, Corpus Christi, Longview-Tyler-Marshall, San Antonio, and Victoria.

*Air Quality Planning*

- Coordinates the development and implementation of the State Implementation Plan (SIP) – the state’s plan for air quality protection and improvement – which explains how the state will comply with federal air quality standards.
- Performs research to identify and develop appropriate pollution control measures.
- Develops the emissions inventory for mobile sources of air contaminants.
- Reviews federally funded projects such as airports, roads, and ports to ensure they comply with the SIP. Also reviews transportation projects in nonattainment areas to ensure emissions do not exceed budgets in the SIP.
- Administers the state’s Low-Emission Diesel, Low Reid Vapor Pressure Gasoline, and Gasoline Vapor Recovery programs.
- Implements a number of other programs to reduce pollution related to transportation:
  - AirCheckTexas Motor Vehicle Emissions Testing;
  - AirCheckTexas Drive a Clean Machine Program, which provides financial assistance for replacing or repairing qualifying vehicles in certain counties, and;
  - Vehicle Emissions Enforcement and Smoking Vehicle programs.
- Administers the Air Emissions Banking and Trading Program, which:
  - Provides flexibility for compliance with the federal Clean Air Act through a market-based framework for emissions banking and trading while achieving net reductions in air emissions, and;
  - Offers incentives for voluntary air emissions reductions.
- Implements the Tax Relief Program for Pollution Control Property, which provides determinations of whether certain pollution control property may be exempted from property taxes.
- Evaluates appropriate pollution control strategies, develops plans to implement the stationary source control measures necessary to comply with federal air quality standards, and provides technical guidance to stakeholders affected by these regulations.

**Office of Compliance and Enforcement**

This office enforces compliance with the state’s environmental laws, responds to emergencies and natural disasters that threaten human health and the environment, oversees dam safety and monitors air and water quality within Texas. In addition, the office oversees the operations of 16 regional and one special-project office across the state.

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

*Critical Infrastructure*

The Critical Infrastructure Division, in keeping with the State of Texas Homeland Security Strategic Plan, strives to achieve a safer, more secure, and more resilient state. To accomplish this, the division seeks not only to assure compliance with environmental regulations to protect health and the environment, but also—during disaster conditions—to support regulated critical assets that are essential for the state and its citizens.

*Dam Safety Program*

The Dam Safety Program monitors and regulates both private and public dams in Texas. The program inspects dams that pose a high or significant hazard and provides recommendations and reports to responsible parties (owners) to help them maintain safe facilities. The program ensures that these facilities are constructed, maintained, repaired, and removed safely.

*Homeland Security Program*

The TCEQ's Homeland Security Program assists in the planning, development, coordination, and implementation of initiatives to promote the governor's homeland-security strategy, and to detect, deter, respond to, and recover from disasters, whether caused by nature or people. These initiatives include notifying and coordinating with those responsible for much of the state's critical infrastructure, including producers and purchasers of drinking water for the public, high-risk dams, refineries, petrochemical facilities, and wastewater-treatment facilities. As part of the Texas Homeland Security Council, the TCEQ assists in planning, coordination, and communication for homeland-security preparedness. The homeland-security coordinator facilitates requests for assistance from Texas Homeland Security and the Texas Division of Emergency Management. The coordinator works with all TCEQ program areas and the THS and TDEM on issues and activities related to all hazards, including homeland security and emergency management.

The program includes the TCEQ BioWatch Program, a federal initiative that provides for early detection of bioterrorism agents to enable the earliest possible response to an attack.

An additional focus of the Homeland Security Program is the safety and security of radioactive materials. Our health physicists investigate compliance with radioactive materials regulations of construction, operation, security, and closure at regulated facilities, and are members of the state radiological emergency-response team.

*Emergency Management Support Team*

The Emergency Management Support Team supports the state's capability to prepare for, respond to, and recover from disasters caused by nature or people. As part of this function, the team supports the TCEQ's regional offices by training staff on enhanced disaster preparedness and coordinating state-level preparation for, response to, and recovery from large-scale or statewide disasters.

*Enforcement*

Through enforcement of the TCEQ rules, regulations and permits, the Enforcement Division protects human health and the environment and deters future noncompliance. The division develops enforcement cases in accordance with state statutes and agency rules consistent with the TCEQ's philosophy that enforcement, when necessary, must be swift, sure, and just. For each enforcement case, the division drafts proposed enforcement orders that include appropriate penalties and other provisions for the commission's consideration and approval.

In addition, the Enforcement Division is also responsible for:

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Administering the Compliance Monitoring Program under the Texas Pollutant Discharge Elimination System;
- Administering third-party Supplemental Environmental Projects;
- Reviewing and responding to notices and disclosures submitted pursuant to the Texas Environmental, Health, and Safety Audit Privilege Act, and;
- Processing compliance-history appeals.

*Monitoring*

The Monitoring Division provides the TCEQ with the foundation for making sound, scientifically-based decisions for the protection of public health and the environment by ensuring the collection, analysis, and display of quality environmental data.

*Air Quality Monitoring*

The division oversees the Texas air quality monitoring program, which samples and analyzes the air in Texas and reports the results to the public and the U.S. EPA. It relies on a network of stationary monitors (that belong to the state, local governments, councils of governments, and private partners), labs that analyze samples, and short-term mobile monitoring of emission sources. The program generates data for:

- determining the causes, nature, behavior, and trends of air pollution;
- forecasting possible high concentrations of ozone and particulate matter;
- determining attainment with EPA air quality standards;
- informing Air Pollutant Watch List decisions; and
- evaluating impacts of air quality on human health.

*Laboratory Accreditation*

The TCEQ's laboratory-accreditation program is a voluntary program that accredits environmental laboratories providing analytical data directly or indirectly to the agency. Accreditation ensures that environmental labs meet established standards and reduces the risk of poor environmental decisions.

***TCEQ Field Operations Around the State***

To meet the challenges posed by Texas' diversity and to provide excellent service to Texas citizens and the regulated community, the agency divides the state into four regional areas:

- Field Operations Border and Permian Basin
- Field Operations Central Texas
- Field Operations Coastal and East Texas
- Field Operations North Central and West Texas

The regional areas are responsible for the administration and operation of each region including legislative and EPA investigative commitments, emergency response, budget, human resources, purchasing, lease management, consistency of program implementation, development of program policy and guidance, coordination and implementation of special initiatives, coordination and interaction with the EPA, and data management.

Major responsibilities of all regional offices include:

- Investigating compliance at permitted and registered air, water, and waste facilities located across the state and complaints at facilities and operations—permitted or not—from citizens, businesses and other organizations, or other concerned parties.

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Developing enforcement-action referrals for violations identified during investigations.
- Environmental education and technical assistance for communities as needed.
- Monitoring the quality of ambient air, surface water (rivers, lakes, and bays), and public drinking water.
- In addition, the agency's strike teams are housed in the regions. They are a key component of the agency's ability:
- to rapidly respond to emergencies (including natural disasters) with personnel, equipment, and expertise;
- assess the extent of public exposure to hazardous materials, and;
- provide an interoperable communication platform.

These groups of highly trained and experienced environmental investigators can offer specialized, long-term response capabilities to any region in the state for almost any type of event, whether natural or caused by people.

*Field Operations Border & Permian Basin*

Responsible for the operations of:

- Region 6 (El Paso)
- Region 7 (Midland)
- Region 15 (Harlingen — includes Eagle Pass Office; also office of the Rio Grande Watermaster)
- Region 16 (Laredo)

*Field Operations Central Texas*

Responsible for the operations of:

- Region 9 (Waco)
- Region 11 (Austin)
- Region 13 (San Antonio — also office of the South Texas Watermaster)

*Landscape Irrigation Program*

The Landscape Irrigation Program conserves water through its efficient application to promote healthy plant and turf materials and protects human health by requiring backflow prevention. In areas that have not adopted local programs, TCEQ personnel serve as the primary enforcement authority.

*On-Site Sewage Facility Program*

The OSSF program compiles and enforces a minimum state code for the design, construction, installation, operation and maintenance of on-site sewage facilities (such as septic tanks); delegates regulatory authority to local governments; reviews and evaluates local OSSF programs; and gives technical assistance and support to local governments, licensees, manufacturers, and the public.

*Clean Water Certification Program*

The Program Support Section certifies marine sanitation devices and boat pump-out facilities, collecting fees and issuing stickers for vessels. The program is aimed at reducing sewage in Texas waters from boats and pump-out stations.

*Field Operations Coastal & East Texas*

Responsible for the operations of:

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Region 5 (Tyler)
- Region 10 (Beaumont)
- Region 12 (Houston)
- Region 14 (Corpus Christi)

*Field Operations North Central & West Texas*

Responsible for the operations of:

- Region 1 (Amarillo)
- Region 2 (Lubbock)
- Region 3 (Abilene)
- Region 4 (Dallas/Fort Worth — includes Stephenville Special-Project Office for Concentrated Animal Feeding Operations)
- Region 8 (San Angelo — also office of the Concho Watermaster)

**Office of Legal Services**

This office manages legal services for the agency in environmental law, enforcement litigation, bankruptcy, and general agency operations. The office gives legal counsel and support to the executive director, the agency programs, and—along with the general counsel and the public interest counsel—the commissioners. The office ensures that commission decisions follow the law, and that rules we develop comply with statutory authority and are applied consistently.

*Environmental Law*

The Environmental Law Division primarily supports the offices of Permitting and Registration, Water, and the chief engineer. This division provides legal counsel to the agency in all areas of permitting and rulemaking, and represents the executive director in contested permitting matters in accordance with state law and agency rules regarding participation in hearings. The division's functions also include legal support related to federal program delegation, interpretation of environmental statutes and rules, and support for the Office of the Attorney General in state and federal court litigation.

*General Law*

The General Law Division serves as legal counsel to the agency on issues related to contracts, grants, procurement, employment law and public-service ethics; processing and distribution of information for the public; and records retention. The division director serves as the agency ethics adviser. The division also prepares the administrative records for appeals under the Administrative Procedures Act and supports the Office of Legal Services with administrative personnel (paralegals and legal secretaries).

The division is integral to the agency's administration, coordinating statewide public hearings; managing its rulemaking, including publishing its rules in the Texas Register; reviewing, tracking and posting information and public notices at its website; and preparing matters for the commissioners' agenda.

*Litigation*

The Litigation Division provides legal representation and support to the Enforcement, Field Operations and Remediation divisions of the Office of Compliance and Enforcement. The division negotiates agreed enforcement orders, litigates enforcement actions, advises the agency concerning

## Organizational Structure 85<sup>th</sup> Regular Session, Agency Submission

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

cleanup standards and recovery of cleanup costs, and coordinates the programs for Supplemental Environmental Projects and Environmental Audits. Through the Environmental Crimes Section, it investigates and gathers evidence on environmental crimes for prosecution in state and federal courts.

### **Office of Waste**

This office implements federal and state laws related to the regulation of aboveground and underground petroleum storage tanks (PSTs); generation, treatment, storage, and disposal of municipal, industrial, low-level radioactive, and hazardous wastes; and the recovery and processing of uranium and disposal of byproduct. It also oversees state cleanup of contaminated sites.

### *Permitting and Registration Support*

The Permitting and Registration Support Division promotes and supports various agency programs. Division responsibilities include:

- dry-cleaner registrations and fees ;
- industrial and hazardous waste registrations, reports, and one-time shipments;
- registrations and reports relating to medical-waste transporters;
- facility registrations and notifications and self-certifications of compliance relating to petroleum-storage tanks;
- registrations and reports relating to sludge transporters;
- permits by rule for stationary compactors and enclosed containers (destined for Type IV facilities);
- registrations and reports relating to used-oil and oil-filter handlers, transporters, and collection centers, and;
- 10 occupational licensing and registration programs.

### *Radioactive Materials*

The Radioactive Materials Division performs activities associated with the licensing of facilities involved in the storing, processing, or disposing of one or more of the following: uranium ore; by-product radioactive waste; low-level radioactive waste; non-oil and -gas naturally occurring radioactive waste (NORM waste); radioactive waste generated from federal government activities; and activities associated with the permitting, registration, and authorization of Class I, III, and V wells in the underground injection control program.

The Texas Health and Safety Code, Chapter 401, authorizes the TCEQ to regulate the disposal of most radioactive substances in Texas. Also, the State of Texas is an "Agreement State" authorized by the United States Nuclear Regulatory Commission to administer a radiation-control program under the Atomic Energy Act of 1954, as amended.

### *Remediation*

The Remediation Division oversees the investigation and cleanup of pollutants released into the environment, both hazardous and nonhazardous, by responsible parties, state contractors, and the state itself. The division also seeks restoration of damaged natural resources resulting from such releases. Division programs include:

- the Brownfields Site Assessments Program;
- contracting support;
- the Dry Cleaner Remediation Program;
- the Industrial Hazardous Waste Corrective Action Program;
- the Innocent Owner/Operator Program;

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Municipal Designation Settings;
- the Natural Resource Trustee Program;
- the Petroleum Storage Tank Program;
- the Superfund Program, which includes the Superfund Site Discovery and Assessment Program;
- the Texas Risk Reduction Program, and;
- Voluntary Cleanup Program.

*Waste Permits*

The Waste Permits Division is responsible for permitting and registering facilities involved in one or more of the following: storing, processing, or disposing of hazardous waste, nonhazardous industrial waste, municipal solid waste, special waste, and international waste. The division also:

- performs technical analysis of notifications for waste management, including recycling of industrial and municipal solid waste;
- performs technical analysis related to waste received from international sources;
- performs technical analysis of submissions from regulated entities;
- makes groundwater protection recommendations to the Railroad Commission of Texas and applicants for oil and gas wells, Class II injection wells, cathodic protection wells, and seismic programs;
- administers the assessment and collection of fees for the generation, treatment, storage, or disposal of solid waste or hazardous waste; and
- administers the Regional Solid Waste Grant Program

**Office of Water**

This office works toward clean and available water and is responsible for all aspects of planning, permitting, and monitoring to protect the state's water resources. The Office of Water is responsible for the implementation of the following major programs:

- Public Drinking Water
- Water Rights
- Interstate River Compacts
- Watermaster
- Districts and Utilities
- Groundwater Protection
- Texas Surface Water Quality Standards
- Nonpoint Source Program
- Wastewater, Storm Water, and Concentrated Animal Feeding Operation Permitting
- Surface Water Quality Monitoring
- Watershed Protection Plans and Total Maximum Daily Loads
- Galveston Bay Estuary Program

***Water Availability***

- Processes water rights permits and amendments.
- Maintains water-availability models for all river basins.

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Reviews water-conservation plans and drought contingency plans.
- Performs groundwater quality planning and assessments.
- Supports the interagency Texas Groundwater Protection Committee and the Texas Groundwater Protection Strategy.
- Manages the state's plan for preventing groundwater pollution from pesticides and the state's program for the identification of priority groundwater-management areas.
- Ensures compliance, through the watermaster programs, with water rights by monitoring stream flows, reservoir levels, and water use.
- Supports interstate river compacts.

***Water Quality***

The Water Quality Division is responsible for protecting the quality of water in Texas. This division:

- Issues wastewater authorizations under the Texas Pollutant Discharge Elimination System and the Texas Land Application Permit program.
- Issues sludge permits, registrations, and authorizations for sewage and water-treatment plants.
- Develops procedures to implement the Texas Surface Water Quality Standards.
- Updates the Water Quality Management Plan.
- Issues permits to control pollution from concentrated animal-feeding operations and storm water runoff.
- Reviews state water quality certifications of Clean Water Act Section 404 permit applications for federally regulated dredging and filling activities administered by the U.S. Army Corps of Engineers.
- Administers the pretreatment program, which regulates industrial discharges into publicly owned treatment works.
- Issues authorizations for reuse of treated wastewater effluent.
- Reviews wastewater-system plans and specifications to ensure they meet design requirements.

***Water Quality Planning***

The goals of the Water Quality Planning Division are to assess, protect, and improve the quality of Texas surface water resources.

***Planning and Implementation Section***

The Nonpoint Source Pollution Program:

- Implements statewide and regional planning to safeguard surface water quality.
- Works with stakeholders to develop and implement watershed-based plans for water affected by nonpoint source pollution.
- Administers EPA grants that support prevention and reduction of nonpoint source pollution.

***The Total Maximum Daily Load Program:***

- Develops TMDLs, which determine the amount of a pollutant that a water body can assimilate daily and still meet water quality standards.
- Works with other TCEQ programs to evaluate the best approach for restoring impaired water resources, and develops plans to meet pollutant-reduction goals in TMDLs.

***The Galveston Bay Estuary Program and the Coastal Bend Bays and Estuaries Program:***

- Implement scientific, strategic plans developed by their communities to protect and improve the quality of bay systems.

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Encourage and support wetland and habitat protection.

*Monitoring and Assessment Section*

*The Water Quality Standards Program:*

- Develops and revises the standards for surface water quality in Texas.
- Works with other TCEQ water programs to implement the standards through permits, TMDLs, and monitoring and assessment.
- 

*The Surface Water Quality Monitoring (SWQM) Program:*

- Coordinates the monitoring and assessment of surface water resources and oversees the statewide network of monitoring sites.
- Reports the status of water quality in the biennial Texas Integrated Report for Clean Water Act Sections 305(b) and 303(d) (formerly the Texas Water Quality Inventory and List).
- Develops guidelines that ensure data quality and scientifically sound assessment of water quality in relation to the standards.

*The Clean Rivers Program:*

- Coordinates with the SWQM program and a partnership of regional governmental agencies to monitor water quality and establish priorities for future monitoring and corrective action.
- Promotes cooperative watershed planning and recommends effective water-quality management strategies.

*The Water Data Management and Analysis Team:*

- Develops and revises the Data Management Reference Guide.
- Manages the Surface Water Quality Monitoring Information System and coordinates data management and analysis with all monitoring partners.

*Houston Laboratory*

Sixteen TCEQ regional field offices and EPA Region VI submit samples to the TCEQ's Houston Laboratory for analysis. This lab:

- Analyzes samples of water, wastewater, soils, sediments, and sludge.
- Develops analytical procedures and supports special investigations, projects, and monitoring activities through cooperative agreements with other agencies.
- Is accredited by the NELAP Institute as meeting national standards developed by the National Environmental Laboratory Accreditation Program.

**Water Supply**

The Water Supply Division is responsible for programs that ensure the efficient administration of surface water use; the production, treatment, delivery and protection of safe and adequate drinking water; and the provision of dependable, viable utility service at fair levels of compensation. The division performs the following functions:

- Oversees the production, treatment, quality and delivery of drinking water for the public by implementation of the Safe Drinking Water Act.
- Assesses and protects sources of public drinking water.

**Organizational Structure**  
**85<sup>th</sup> Regular Session, Agency Submission**

---

Agency Code: 582

Agency Name: Commission on Environmental Quality

---

- Offers technical assistance on the design and operation of public water systems.
- Guides public water systems on homeland-security preparation, response, and recovery.
- Reviews applications for district creation and district bond issues.
- Reviews engineering plans for new or significantly modified public water systems or exceptions to TCEQ rules.
- Assesses the financial, managerial, and technical capabilities of public water systems.
- Manages the Water Utilities Database and the Water Availability Modeling Database.

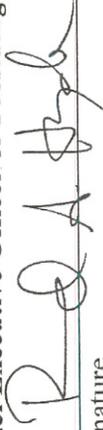

## CERTIFICATE

Agency Name Texas Commission on Environmental Quality

This is to certify that the information contained in the agency Legislative Appropriation Request filed with the Legislative Budget Board (LBB) and the Office of the Governor, Budget Division, is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's office will be notified in writing in accordance with Article IX, Section 7.01 (2016-17 GAA).

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

TCEQ collects, measures, and analyzes air pollutant data to monitor air quality, determine the amount of emissions, assess the impacts of emissions, assess progress toward meeting or maintaining air quality standards, and develop solutions to address air quality issues. This is done to determine attainment or nonattainment of the National Ambient Air Quality Standards (NAAQS) established by the EPA pursuant to the Federal Clean Air Act (FCAA) for six criteria pollutants (carbon monoxide, sulfur dioxide, ozone, particulate matter, lead, and nitrogen dioxide). For nonattainment areas, federal law requires states to develop and implement a State Implementation Plan (SIP) to detail the state's efforts to implement required elements of the FCAA and other requirements as needed for an area to be reclassified as attainment. State strategies to enhance air quality include, but are not limited to, Texas Emissions Reduction Plan, Vehicle Emissions Testing, point source reductions, and cleaner fuels. The 2008 ozone standard nonattainment areas are: Houston-Galveston-Brazoria and Dallas-Fort Worth. El Paso is designated nonattainment for particulate matter of 10 micrometers or less. A portion of Collin County is nonattainment for lead. Federal rules also require TCEQ to address nitrogen oxides and sulfur dioxide emissions transported to other states from electric generating facilities and to improve visibility in federal Class I areas (national parks and wilderness areas).

------	-------------	----------	----------	----------	---------	---------

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Air Quality activities are mandated by federal and state statutes. The FCAA establishes timetables to direct the development of the SIP to address nonattainment, infrastructure, interstate transport, and visibility. Failure to meet requirements could result in sanctions, including withdrawal of highway funding. By October 2017, EPA is anticipated to make nonattainment designations for the 2015 ozone NAAQS, which may include new nonattainment areas in the state. By December 2017, EPA is anticipated to make additional nonattainment designations for the 2010 SO2 NAAQS, which may include new nonattainment areas in Texas. The state will need to address issues for regional haze,, federal utility rules, transport, infrastructure, and any potential attainment demonstration for any of the six criteria pollutants. EPA’s approach to phase in implementation of more stringent standards will impact TCEQ and regulated entities. Furthermore, maintenance and/or changes to the composition of the ambient air monitoring network required by federal initiatives are vulnerable to fluctuations in federal funding. In instances where federal monitoring requirements are accompanied by no additional federal funds or reduced federal funds, TCEQ may be forced to reallocate funds away from other air monitoring programs. Reallocation could negatively impact TCEQ’s ability to monitor for air pollutants, air toxics, ozone, and other criteria pollutants, determine the effectiveness of control strategies, and monitor for the fate and transport of air pollutants into and within the state.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

Texas Water Code (TWC) Ch. 5, 26, 35, and 36 require the TCEQ to protect water quality and develop water quality standards (WQS). TCEQ establishes WQS, monitors/assesses and develops plans to maintain/restore water quality, coordinates the implementation/oversight of plans developed by Texas’ National Estuary Programs, and implements provisions of the Clean Water Act. These activities protect water quality for aquatic life, drinking water, and recreation. When applicable WQS are not met, the TCEQ assesses point/nonpoint sources of pollution. Total Maximum Daily Loads/ Implementation Plans, watershed protection plans or other watershed based plans address impairments. TWC Ch. 26, 35, and 36 outline requirements for TCEQ’s groundwater programs. TCEQ chairs the Texas Groundwater Protection Committee, helps develop and implement the Texas Groundwater Protection Strategy, develops groundwater quality protection plans, prepares Priority Groundwater Management Area studies, and reviews proposals to create Groundwater Conservation Districts. TCEQ also provides limited oversight of GCDs related to the adoption and implementation of management plans. TWC Chap. 11 and 12 contain requirements for Dam Safety. TCEQ has developed rules and monitors/regulates both private and public dams, inspecting those classified as high or significant hazard (dams that could have loss of life or other significant effects if the dam failed). The program ensures dams are constructed, maintained, repaired and removed safely, and provides reports and recommendations to assist owners maintain safe dams.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Changes to state law, federal requirements and initiatives, environmental factors such as drought or flood, projected state population growth, local development conditions throughout the state, and competing habitat conservation initiatives aimed at protecting existing uses of Texas’ water bodies affect this strategy. The Texas Surface Water Quality Standards are periodically required to add new data about bodies of water and update pollutant effects information. EPA and the US Fish & Wildlife Service’s timelines for reviewing these standards continue to increase, and long delays in receiving approval of the standards have affected permitting, the Watershed Action Planning process, Total Maximum Daily Loads (TMDLs) development, and assessment of water bodies. Monitoring performed by the TCEQ and partner agencies may target water bodies with suspected attainment issues resulting in an increase in the number of water bodies not meeting the standards. EPA guidance affecting water quality standards, assessment, and nonpoint source pollution continues to become more prescriptive thereby increasing the need for agency resources. Increased population in the state and aging dam infrastructure require TCEQ to focus its inspections on high and significant hazard dams and emergency management situations.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

TCEQ monitors and assesses municipal solid waste disposal capacity, identifies waste management trends, and assesses future waste management needs across the state. TCEQ also provides financial, technical, and planning assistance to Councils of Governments (COGs) and local governments. TCEQ reviews and analyzes annual reports submitted by permitted municipal solid landfills in Texas to perform capacity assessments. These reports contain information regarding waste types and amounts of waste disposed. The analysis is used to assess the available capacity of municipal solid waste landfills to handle future waste disposal needs and to determine trends in waste management on a regional and statewide basis. The results of capacity analyses are documented in a summary report published annually under TCEQ publication number AS-187. Section 361.014(b) of the Texas Health and Safety Code requires TCEQ to provide grants to COGs for local and regional municipal solid waste planning and management activities. Grant funding is provided to the state's 24 COGs. The COGs use these funds to conduct short and long range regional planning as it relates to the management of municipal solid waste.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Due to the population growth in Texas and the state of the economy in general, changes in waste management can have a significant impact on a community or an industry, particularly if such changes are not anticipated and plans have not been developed to help identify existing conditions, existing needs or alternative management strategies. Economic growth, population growth, and trends in per capita waste generation are the most basic variables affecting waste disposal capacity. Hurricanes and other natural disasters also affect the state's landfill and waste processing operations. Capacity planning can also be significantly impacted by changes in state or federal rules that affect the options for disposing of certain types of waste materials. By regularly evaluating waste management trends and available capacity, significant trends can be identified, and planning efforts can be appropriately adjusted and implemented.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

This strategy includes two permitting programs required by the Federal Clean Air Act (FCAA) to safeguard air quality: the New Source Review (NSR) Program and the federal Operating Permit (Title V) Program. Both programs are implemented under the Texas Health and Safety Code (THSC), Chapter 382. The NSR permitting program includes state and federal requirements (including the federal greenhouse gas prevention of significant deterioration permits program) and has long been an essential part of the state's efforts to prevent or control air pollution. Texas statute mandates that applicants seeking a permit to construct or modify facilities demonstrate that they will use best available control technology (BACT) to control emissions to the air and protect public health and welfare. The use of BACT often reduces emissions by 90% or more compared to emission levels from an uncontrolled facility. The Title V Program requires all major industrial sites to apply for an operating permit that codifies all regulations at that site into an operating permit. Included within operating permits are: federal and state regulations, federal toxic emission control, compliance assurance monitoring, and state NSR permit requirements. The federal operating permit is the only single document which codifies all the federal requirements that apply to each emission unit at a site.

------	-------------	----------	----------	----------	---------	---------

Major factors affecting this strategy are: EPA objections/petitions on specific Title V permits for overall programmatic issues within the SIP; the overall high number of applications received for new and modified facilities; and implementation, attainment, and maintenance of new and revised National Ambient Air Quality Standards (NAAQS). Any EPA-directed changes to the SIP could significantly impact issuance of air permits in the future. Furthermore, EPA's aggressive schedule to review and promulgate revised NAAQS, new Maximum Available Control Technology (MACT) standards, New Source Performance Standard (NSPS), and new federal requirements for existing facilities requires a great deal of technical and regulatory work by the agency to implement. The sulfur dioxide standard was notable because states are now being required to use modeling demonstrations, in addition to monitoring, in order to show attainment of the standard. Additional examples are: EPA's finalized changes to the particulate matter NAAQS and the new ozone NAAQS. These federal requirements pose significant challenges for TCEQ and permit applicants.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

The TCEQ issues permits and other authorizations relating to the quality and use of the state’s water resources. Wastewater permits are issued to municipalities, industries, and concentrated animal feeding operations (CAFOs) under the provisions of Chapters 5, 26, and 32 of the Texas Water Code (TWC). Storm water discharges are permitted through general and individual permits under TWC Chapters 5 and 26. Registrations for land application of domestic septage and water treatment plant sludge and permits for the beneficial use, and processing and disposal of sewage sludge are issued under Chapters 5 and 26 of the TWC. Edwards Aquifer (EA) Protection Plans are reviewed under provisions of Chapter 26 of the TWC. The On-Site Sewage Facility program (OSSF) is administered under Texas Health & Safety Code, Chapter 366. The wastewater permitting process involves assessment of the available technology to treat wastewater to reduce pollutants, groundwater assessment, and the assurance that Texas surface water quality standards are met. Under TWC Chapter 11, the TCEQ administers water rights for surface water, which involves the issuance and amendment of surface water use permits, evaluation of water availability, evaluation of potential environmental impacts of the proposed diversion of state water from a stream or other body of water, review of conservation and drought contingency plans, and administration and enforcement of water rights.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The TCEQ has administered the Texas Pollutant Discharge Elimination System (TPDES) program, including wastewater, storm water, sludge and pretreatment since delegation in 1998. Increasing federal oversight of the TPDES program has led to more objections by EPA to TCEQ developed draft permits. The TCEQ continues to work with EPA Region VI to resolve these issues. However, this strategy of increased federal oversight and additional regulation will continue to delay the issuance of future permits. Changes have been made to the CAFO, industrial and stormwater programs at the federal level and impact Texas permitting requirements and processes. EPA is proposing revised regulations under the National Pollutant Discharge Elimination System (NPDES) Program Updates Rule which will likely increase workload and impact permit processing times. Water right applications are increasing in number, are becoming more complex and controversial, and include new technical, legal, and policy issues. TCEQ also responds to drought issues, which can divert permitting resources to deal with this critical issue. Expanding development of both commercial and residential property in the Austin and San Antonio regions has increased the number of EA protection plans being submitted to the TCEQ. An upward trend has continued through FY 2016, straining existing resources and impacting plan approval efficiency. Projections continue to anticipate an increased workload due to a high volume of plan submissions, along with more complexity of plan locations.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The TCEQ regulates industries engaged in the processing, storage, and disposal of hazardous, industrial, and municipal waste as well as the disposal of hazardous and industrial waste through wells regulated under the Underground Injection Control (UIC) program. The agency also issues radioactive material licenses, which authorize in situ uranium recovery, conventional uranium recovery tailings impoundment, and low-level radioactive waste disposal. These industries represent active authorizations for 166 hazardous waste permitted facilities, 13 industrial solid waste facilities, 1135 municipal solid waste facilities, 168 UIC Class I wells, 5,874 Class III wells, 45,100 Class V wells, and 15 radioactive material licenses.

Hazardous, industrial, and municipal waste processed, stored, and/or disposed of by a facility is monitored through self-reporting, permitting and remediation activities, as well as other monitoring actions. Hazardous and industrial waste facilities are permitted under Chapter 361 of the Texas Health and Safety Code (THSC), and the federally delegated Resource Conservation and Recovery Act (RCRA) Subtitle C program (hazardous only), whereas municipal waste facilities are permitted under Chapter 361 of THSC and RCRA Subtitle D. Injection wells are regulated under Chapter 27 of the Texas Water Code and the federally authorized Underground Injection Control program of the Safe Drinking Water Act (SDWA). Radioactive material disposal is regulated under Chapter 401 of THSC.

------	-------------	----------	----------	----------	---------	---------

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Texas currently has active authorizations for 1135 active landfills, processing facilities, and transfer stations that are available for municipal solid waste management. Due to the complexity of siting new facilities and the high cost of constructing a Subtitle D landfill, many of the owner/operators applied for major amendments to expand their existing landfills in order to maximize space and economize operational costs. Processing permit amendments and modifications associated with expansion continues to be an important activity within the program.

Since 2000 the price of uranium has fluctuated dramatically, from \$7 per pound to \$139 per pound in 2007. If the price of uranium rises, the agency may experience a corresponding increase in the number of permit applications submitted for Class III In Situ Uranium Mines and radioactive material license applications for In Situ Uranium recovery facilities.

Passage of new or amendments to existing regulations by EPA and the Nuclear Regulatory Commission may require authorized facilities to amend their permits and/or licenses to include the new requirements, or may bring in additional facilities for authorizations.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The TCEQ is responsible for the management of approximately 54,000 environmental professionals and companies. The agency issues new and renewed licenses and registrations; reviews licensing applications, administers examinations; responds to citizen's complaints, conducts investigations, and enforces regulations as needed. Licenses and registrations issued by the TCEQ help ensure that water, wastewater and municipal solid waste facilities are operated in a manner that complies with state and federal requirements to protect human health and the environment. The programs help ensure that underground storage tanks, point of use water treatment equipment, landscape irrigation systems, and on-site sewage facilities are properly installed, maintained, repaired or removed; corrective actions on leaking petroleum storage tanks are performed in accordance with agency rules; backflow prevention assemblies are tested; and water distribution lines are inspected to identify cross connections, potential contaminant hazards, and illegal lead materials so as to protect public water supplies.

------	-------------	----------	----------	----------	---------	---------

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Issuance of new and renewal licenses is an on-demand activity that can vary widely and is based upon the number of applications submitted and deficiencies occurring. The overall local and state economic status can have a direct impact on number of licensed professionals. During slower economic periods the number of licensed professionals may decrease due to downsizing by entities that employ individuals that perform duties requiring licenses. Whereas, during strong economic periods, additional licensed individuals may be needed to meet public and industry demands.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The TCEQ and DSHS both regulate all radioactive substances. TCEQ regulatory authority includes waste processing, storage, and disposal and surface/subsurface uranium mining operations. Federal law requires states to manage the Low-Level Radioactive Waste (LLRW) generated within their borders. THSC, Ch. 401 delegates regulation of LLRW management and disposal to TCEQ. Texas is an "Agreement State" for the regulation of source material recovery, radioactive waste management, and disposal per the Atomic Energy Act of 1954. Texas entered into an agreement with Maine and Vermont in 1998 to provide a LLRW disposal facility but Maine has withdrawn from the Compact. State laws allow a proposed disposal facility to accept party and non-party compact waste and federal facility waste at a separate, adjacent facility under one TCEQ license. In addition, the federal waste disposal facility may accept mixed waste (LLRW and hazardous constituents). In 2004 Waste Control Specialists submitted a license application for near-surface land disposal of LLRW and a license was issued by TCEQ in 2009. Waste Control Specialists submitted a license application for near-surface land disposal of byproduct waste (from source material recovery) to the Texas Department of Health. After the byproduct regulatory program was transferred to TCEQ, a license was issued and authorization granted for disposal of a certain byproduct waste stream in 2008. The facility was officially authorized to accept waste on April 25, 2012; the first delivery was received on April 27.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

Prior to the opening of the LLRW disposal facility in April 2012, Texas was dependent on disposal sites in other states. Events have demonstrated that the availability of those sites for disposal was increasingly uncertain, and as a consequence, medical institutions, research facilities, and industries in Texas have stored waste on site. The costs of LLRW management are generally high and have become increasingly variable and difficult to project.

After many years of depressed uranium prices, the uranium market reached an all-time high in 2007 and was expected to remain at a higher level. Although a flurry of activity in the South Texas Uranium District followed that market rise, world events intervened and the uranium market is currently depressed. Texas uranium licensees have cut back some activities, but moved on to secure certain license amendments in preparation for a return of the uranium market. Some of these Texas licensees have also decommissioned and closed some of the older uranium recovery sites, and TCEQ staff members have responded to facilitate these strategic industry responses.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

This strategy operates under the Federal Safe Drinking Water Act (SDWA) through a primacy agreement with the EPA. State authority is granted under Texas Health and Safety Code Chapter 341. The program sets in place public health protection measures to ensure safe drinking water for Texans served by public drinking water supplies. These supplies are defined as water systems serving at least 15 connections, or at least 25 persons, at least 60 days per year. Approximately 7,000 public water systems serve approximately 26 million Texans. The key condition of the primacy agreement is the adoption and enforcement of federal drinking water regulations in a form that is no less stringent than the national regulations. If Texas fails to provide timely adoption and implementation of SDWA regulations, EPA could revoke primacy and directly implement federal requirements. The population of Texans who are served by public water systems meeting all health based standards is expected to be 95 percent in 2016 and 95 percent in 2017; however, systems are still challenged by the following federal rules: the Groundwater Rule, the Disinfection Byproducts Phase 2 rule, Revised Total Coliform Rule, Lead and Copper Rule and the Long Term 2 Enhanced Surface Water Treatment Rule. Chapters 49-66 of the Texas Water Code (TWC) provide TCEQ the supervision and oversight of water districts and authorities, as well as the authority to review bond applications and financial reports for most of the 2,137 districts which is consistent with the Capacity Development Strategy as required by the SDWA.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

The most recent SDWA Amendments include mandates for contaminant monitoring and surface water treatment. These amendments have also ushered in dramatic change in the form of initiatives and regulatory requirements. The U. S. Environmental Protection Agency promulgated major rules affecting public water systems beginning in 2006, the Groundwater Rule, Disinfection Byproducts Phase 2, Revised Total Coliform Rule, Lead and Copper Rule and Long Term 2 Enhanced Surface Water Treatment Rule. The adoption of these rules at the federal level continues to have a significant impact on the resources of the Water Supply Division to implement these rules at the state level. As public water systems try to understand and implement the federal rules, additional Water Supply Division resources are also required to provide public water systems the financial, managerial and technical assistance to become compliant.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The principal activities of this strategy are to inspect and investigate regulated facilities and to respond to complaints. The agency maintains 16 regional offices, three satellite offices, and two laboratories. The TCEQ central office staff and regional offices perform over 100,000 investigations which includes approximately 4,000 investigations in response to citizen complaints each year. This is accomplished through different types of compliance and complaint investigations. By using risk assessments to assist in prioritizing the use of resources, the agency can better address those situations posing the greatest threat to environmental quality or public health.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

A strong agency presence is needed to maintain and increase compliance throughout the regulated community. Without a constant presence in the field, many of the regulated facilities might lack incentive to achieve and maintain compliance. The state conducts almost all environmental inspection, investigation, and enforcement activity, while EPA maintains an active oversight role. Inspections, investigations, and enforcement activities are resource intensive. Due to the size of Texas, extensive travel is required to conduct inspections and investigations and coordinate enforcement activities. Population and business growth have also increased the demands upon the agency in pursuing its mission – clean air, clean water, and the safe management of waste. Increases in the number of severe weather events also contribute to an increased number of investigations and increased demand on agency resources.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Most violations of environmental regulations discovered during investigations are quickly corrected. Formal enforcement actions occur only when the violator does not comply in a timely fashion or when the nature of the violation is considered significant. Where possible, TCEQ encourages expeditious settlement of enforcement actions by extending a settlement offer. If settlement does not occur, TCEQ starts a process that can lead to an administrative hearing. TCEQ works closely with the Attorney General's Office in pursuing legal action where administrative orders are not a viable option. Formal enforcement assesses administrative or judicial penalties and requires any corrective actions necessary to resolve violations. In FY 2015, TCEQ issued 1,681 administrative enforcement orders. The orders required payments of over \$12.6 M in penalties and over \$3.2 M as supplemental environmental projects. Also, 46 court orders were issued assessing over \$16.1 million in civil penalties. If funding were reduced or eliminated from this strategy, TCEQ may be unable to effectively initiate enforcement actions necessary for the protection of human health and the environment. Enforcement actions are expected to increase due to the increase in the number of enforcement actions against public water supply systems and an increase in the number of investigations of Underground Storage Tanks (USTs). Environmental sample data must come to the TCEQ from an accredited laboratory. In FY 2015, TCEQ accredited 278 such environmental laboratories.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

This strategy implements pollution prevention, recycling and waste minimization programs through a combination of technical assistance, performance-based regulation, and public education. Specific statutory requirements are found in the Health and Safety Code, Chapter 361. In addition, the Texas Water Code, Chapter 5, requires the Commission to develop and promote innovative and performance-based regulatory programs. TCEQ also develops and maintains multimedia programs to reduce pollution at the source and to minimize the impact of pollution on the environment and human health. These activities include efforts to reduce, reuse, recycle, and to ensure the proper disposal of wastes. Texas Tax Code, Section 11.31 along with 30 Texas Administrative Code Chapter 17 also provides ad valorem tax relief for an owner of pollution control property used to meet a federal, state, or local requirement.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Texas Water Code, Chapter 5, requires the Commission to develop innovative programs that provide incentives for enhanced environmental performance. Further, Texas Health and Safety Code, Chapter 361, requires the Commission to implement the pollution prevention and waste minimization program, which requires certain regulated entities to reduce hazardous wastes and Toxic Release Inventory chemicals. The ability of the state to achieve increased pollution prevention, recycling and waste reduction depends upon voluntary participation in recycling programs and waste minimization efforts by citizens, industry, small business, and local government. State pollution prevention efforts support state priorities, including efforts to maintain good air quality and efforts to protect surface water quality through the Total Maximum Daily Load (TMDL) program, the coastal management plan implementation, and initiatives along the Texas-Mexico border. The ability to provide ad valorem tax relief for pollution controls was an amendment to the Texas Constitution, Article 8, Section 1-1.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The TCEQ seeks to ensure that human health, safety and the environment are protected from harmful effects of contamination and release of petroleum or hazardous substances stored in tanks. Currently, Texas is responsible for approximately 48,000 active underground storage tanks (USTs) and 20,500 active aboveground storage tanks (ASTs) registered at 30,000 facilities. Tank owners/operators are required to annually self-certify compliance with Petroleum Storage Tank (PST) requirements. TCEQ provides technical assistance, interprets rules, and reviews requests for variance from rule requirements. As of June 2016, Texas has an estimated 1504 Leaking PST (LPST) sites. TCEQ ensures that LPSTs are identified and soil and water contamination are remediated per state/federal health and safety standards. Since the program began in 1987, 27,445 contaminated sites have been identified, of which 25,941 have been cleaned up; however, an estimated 22 new contaminated sites are reported each month. HB 3554, 80th Leg., 2007 eliminated the annual facility registration fee for USTs and ASTs. HB 2694, 82nd Leg., 2011, continued the petroleum product delivery fee.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Funding for the regulation of underground and above ground storage tanks is directly related to the Petroleum Storage Tank Remediation (PSTR) Account. The Petroleum Product Delivery Fee is set in rule and was reduced by 27% starting July 2012, and then reduced an additional 37% by House Bill 7 (84th Legislature). Revenue from the fees deposited in the PSTR Account 0655 may be used to administer the program and to address state-lead remediation sites where a responsible party cannot be found, is unable or unwilling to remediate the site or was eligible to transfer into the State Lead Remediation Program. The Energy Policy Act of 2005 amended the original federal legislation that created the UST program, and federal rules significantly affect storage tank programs. Federal law expanded eligible uses of the Leaking Underground Storage Tank (LUST) Trust Fund, and included provisions regarding inspections, operator training, delivery prohibition, secondary containment and financial responsibility. Funds are needed to meet both federal and state requirements and for cleanup of sites in the State Lead Remediation Program.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

Federal and state Superfund programs address contamination from closed and abandoned sites. As of June 2016, Texas has 53 sites on the National Priority List (NPL) and 46 sites on the state registry. Approximately \$207M in state funds has been expended for the cleanup of state sites. Through FY 2016, 119 state and federal sites have been cleaned up. The Voluntary Cleanup Program (THSC, Ch 361) provides incentives for owners to voluntarily clean up contaminated sites. As of June 2016, 2,692 applications for voluntary cleanup have been submitted and 2,116 certificates of completion have been issued. The Texas Health and Safety Code (THCS, Ch 374) established the Dry Cleaner Remediation Program (THSC, Ch 374) and a fund to pay for assessment and cleanup of contamination resulting from dry cleaner facility solvent releases. As of June 2016, 279 applications for ranking have been submitted, 258 sites have been prioritized for cleanup, and 63 sites have been cleaned up. TCEQ administers the Innocent Owner/Operator Program (THSC, Ch 361). As of June 2016, 1017 applications have been submitted and 938 certificates have been issued. Municipal Setting Designations (MSDs) (THSC, Ch 362) Subchapter W, provides for an official state designation that contaminated groundwater under certain properties is prohibited for current or future use as potable water. Currently, 332 applications have been submitted and 305 MSDs have been issued.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The Superfund program is responsible for identifying and remediating abandoned and inactive hazardous waste sites. TCEQ will continue to evaluate the sites and rank them for consideration for listing on either the National Priority List (NPL) or the state registry. Current trends indicate increased cost-sharing obligations with EPA at Federal Superfund sites, and increased cost to maintain long term remedies at Federal and State Superfund sites. The Voluntary Cleanup Program (VCP) returns land to productive use. The incentive to enter the VCP continues to be effective, with six sites/month currently submitted to the program. The Dry Cleaner Remediation Program is responsible for handling the investigation and cleanup of eligible sites. Funding for the Dry Cleaner Program is supported by fees from the registration of dry cleaner facilities and from the sale of dry cleaner solvents. The Innocent Owner/Operator Program has eased the concerns of lenders and developers who are considering investing in property. The innocent owner/operator has shown to be an effective property development tool, with five sites/month currently submitted to the program. The Municipal Setting Designations program has expedited the cleanup and development of properties with groundwater contamination where the groundwater is not used for potable purposes.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Canadian River Compact Commission is directed by Chapter 43 of the Texas Water Code to protect Texas' rights under the Canadian River Compact. The Canadian River Compact Commission meets with New Mexico, Oklahoma, and federal agencies to conduct business and resolve issues associated with the Compact. To ensure compliance with the Compact, an annual accounting of water stored by each state is completed. The releases of water from New Mexico's reservoirs pursuant to the U.S. Supreme Court Decree have benefited Texas and Lake Meredith in particular which supplies water to eleven cities in the Texas panhandle.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The amount of water available to Texas is directly related to the activities in the other compacting states. The annual accounting of water stored determines each state's compliance with the Compact. Also, the operation of upstream reservoirs by New Mexico or the federal government and the listing of endangered species can have a significant impact on water deliveries to Texas. Also, Oklahoma's interpretation of the Compact regarding Texas' construction and operation of Palo Duro Reservoir raises serious Compact compliance issues which must be addressed. The Texas Commissioner must have resources available to ensure Texas' water supplies are protected. If this issue is not resolved, expensive litigation could occur if Oklahoma files suit against Texas for violation of the Compact.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Pecos River Compact Commission is directed by Chapter 42 of the Texas Water Code to protect Texas' rights under the Pecos River Compact. The Pecos River Compact Commission meets with New Mexico and federal agencies to conduct business and resolve issues associated with the Compact. To ensure compliance with the Compact, an annual accounting of water deliveries is completed by the states and the Pecos River Master appointed by the U. S. Supreme Court as the result of the Texas vs. New Mexico litigation involving the Compact. Texas and New Mexico equally pay the expenses of the River Master. The Commission has initiated salinity control efforts with federal agencies and salt cedar eradication efforts to maximize the water resources of the region.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The amount of quality water available to Texas is directly related to the activities initiated by New Mexico, as well as the federal water agencies. The annual accounting of water deliveries determines each state's compliance with the Compact and Court Decree. To complete this accounting, it is necessary to maintain stream-flow gages throughout the Pecos River. The gages are maintained by the U.S. Geological Survey (USGS) which pays for a portion of the cost, while Texas and New Mexico pay the remainder of the expenses. The costs borne by the USGS vary annually and are usually less than 50% of the total costs. The USGS normally increases the total cost about 5 percent each year. Also, the operation of upstream reservoirs by federal entities and the listing of endangered species can have a significant effect on water deliveries to Texas.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Red River Compact Commission is directed by Chapter 46 of the Texas Water Code to protect Texas' rights under the Red River Compact. A successful working relationship with other compacting states is critical to resolving issues as they arise. The Red River Compact has not experienced significant critical water short periods historically. To ensure compliance with the Compact and for effective administration should water shortages occur, the interstate Red River Compact Commission has adopted rules to administer the different reaches designated by the Compact. The Compact has established a standing Environmental and Natural Resources Committee to address interstate water quality issues which have limited the available supplies to the member states and an Engineering Advisory Committee to address low flow compliance issues and flooding concerns within the basin.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

**582 Commission on Environmental Quality**

GOAL: 5 Ensure Delivery of Texas' Equitable Share of Water  
 OBJECTIVE: 1 Ensure Delivery of 100% of Texas' Equitable Share of Quality Water Service Categories:

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

The amount of water available to Texas is directly related to the amount of quality inflows from upstream tributaries, to the activities of the other member states, and to operations of the basin's reservoirs such as Lake Texoma on the main stem of the river and other tributary reservoirs. The amount of weekly stream flow in the main stem delivered at specific gage locations determines each state's compliance with the Compact. Currently, the stream flow gages necessary to determine compliance are maintained by the U.S. Geological Survey (USGS) and other cooperating partners, reducing the amount required by the Compact's member states. However, the costs to maintain the gages vary annually, depending on federal funding available and increase about 5 percent each year. The USGS has already discontinued gages which were not essential to their network, but were included in the Red Compact compliance rules. The Texas Commissioner must have resources available to ensure Texas' water supplies are protected and to maintain compliance with the Compact.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Rio Grande Compact Commission is directed by Chapter 41 of the Texas Water Code to protect Texas' rights under the Rio Grande Compact. To ensure compliance with the Compact, an annual accounting of water deliveries is completed. Efforts have been initiated to study the most effective way to develop the waters of the Rio Grande to meet future demands of the region under the limits imposed by the Compact, state and federal regulations, and existing water rights. As the City of El Paso continues to grow, more and more demands will be placed on the Rio Grande to supply water for municipal needs. The Commission has initiated interstate salinity efforts with federal agencies to maximize the resources on the Rio Grande for Texas' users.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The amount of quality water available to Texas is directly related to the activities in the other compact member states and by the federal water agencies. The annual accounting of water deliveries determines each state's compliance with the Compact. To complete this accounting, it is necessary to maintain streamflow gages throughout the Rio Grande basin. The gages are primarily maintained by the U.S. Geological Survey (USGS) which pays half the cost. Texas, Colorado, and New Mexico equally pay the other cost of the gages. The gages costs increase about 5 percent each year. Also, the operation of upstream reservoirs by federal entities and the listing of endangered species can have a significant effect on water deliveries to Texas. The operation of Elephant Butte Reservoir and water deliveries to Texas' water users continues to be an issue of significant concern. The outcome of a lawsuit brought by Texas against New Mexico and Colorado before the U.S. Supreme Court in 2013 asserting that the upstream states have violated the Compact may impact the future of water deliveries to Texas.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Sabine River Compact Commission is directed by Chapter 44 of the Texas Water Code to protect Texas' rights under the Sabine River Compact between the states of Texas and Louisiana. The current activities include a cooperative program with the U. S. Geological Survey for the streamflow and water quality gaging stations necessary to administer the Compact and to complete the annual water accounting. A successful working relationship with Louisiana is critical to resolving issues as they arise and to maximize water use from the Sabine River basin.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The amount of quality water available to Texas is directly related to the activities in the other compacting states and the federal water agencies. The expenses related to the establishment and monitoring of streamflow and water quality gages are established by the U. S. Geological Survey. The expenses typically increase approximately 5 percent annually. These increased expenses are passed on to the member states, which share the costs equally.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Central Administration strategy includes the Offices of the Commissioners, the Executive Director, Administrative Services and Legal Services. The Commissioners’ Office consists of the following divisions: General Counsel, Public Interest Counsel, Chief Clerk, and Chief Auditor. The divisions within the Executive Director’s Office included in this strategy are the Take Care of Texas Program, Agency Communications, Environmental Assistance, Intergovernmental Relations, and Toxicology. The Office of Legal Services’ General Law Division is included in the Central Administration strategy. Additionally, the divisions of the Office of Administrative Services included in this strategy are Chief Financial Officer, Budget & Planning, portions of Financial Administration, and portions of Human Resources and Staff Services.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The amount of money appropriated to the Central Administration strategy directly affects the program performance reflected in other strategies. The divisions included in this strategy either provide executive leadership or support services to the other strategies. This strategy includes those administrative costs which are both common for a large state agency and those unique to the TCEQ. Because of the relationship between this and TCEQ’s other strategies, any change in funding for this strategy will affect the performance of the agency’s other strategies.

------	-------------	----------	----------	----------	---------	---------

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The amounts included in this strategy are budgeted in sections of the Financial Administration and Human Resources and Staff Services Divisions. These areas provide underlying enterprise support necessary to ensure that program responsibilities are met. The divisions are responsible for the provision of core business services, among them, services related to the historically underutilized business program, procurement and contracting, mail and messenger services, safety, and fleet, asset and risk management. TCEQ centralizes management of payment for rent and utilities within this strategy.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The amount of money appropriated in this strategy directly affects the ability of the agency to achieve its objectives, outcomes, and outputs. This strategy is impacted by different factors, including economic conditions affecting the unit cost of services provided, the nature and extent of customer needs across TCEQ programs, changing customer demands, legislative and/or regulatory requirements. If basic operational costs increase, the agency will have to spend more funds to provide this support unless it can use alternate methods to provide necessary services.

**EXPLANATION OF BIENNIAL CHANGE (includes Rider amounts):**

<u>STRATEGY BIENNIAL TOTAL - ALL FUNDS</u>		<u>BIENNIAL</u>	<u>EXPLANATION OF BIENNIAL CHANGE</u>	
Base Spending (Est 2016 + Bud 2017)	Baseline Request (BL 2018 + BL 2019)	CHANGE	\$ Amount	Explanation(s) of Amount (must specify MOFs and FTEs)
\$17,574,731	\$16,058,702	\$(1,516,029)	\$(1,516,029)	The difference in General Revenue Dedicated is attributed a realignment of funds with the Central Administration Strategy.

		<i>Changed for 2018-2019 to reflect the Capital Budget request.</i>		
3	VI-18	<p><b>Authorization: Aircraft Chartering.</b> Notwithstanding any other provision of this Act, the Texas Commission on Environmental Quality is authorized to spend appropriated funds for the chartering of aircraft for the purposes of monitoring environmental quality and the enforcement of environmental and water rights laws of the State.</p> <p><i>No change.</i></p>		
4	VI-18	<p><b>Local Air Pollution Grants Allocation.</b> Out of the amounts appropriated above, no less than \$2,658,228 in each fiscal year out of the Clean Air Account No. 151 in Strategy A.1.1, Air Quality Assessment and Planning, shall be utilized to fund grants or cooperative agreements with eligible local air pollution programs under Health and Safety Code, § 382.0622. The combined federal and state share of the funding for any such local air pollution programs shall not exceed 67 percent of the total allocation to the programs, with the local share being based on the local dollars allocated pursuant to maintenance-of-effort requirements for federal air pollution grants.</p> <p><i>No change.</i></p>		
5	VI-18	<p><b>Fee Revenue: Pollution Control Equipment Exemptions.</b> Amounts appropriated above include <del>\$225,116</del><u>\$229,424</u> each fiscal year from fee revenue collected pursuant to Tax Code, §11.31, beginning with the effective date of this Act out of the General Revenue Fund in Strategy C.1.3, Pollution Prevention, Recycling, and Innovative Programs, for the purpose of determining whether pollution control equipment is exempt from taxation.</p> <p>In addition to amounts appropriated above, any amounts collected by the Texas Commission on Environmental Quality pursuant to Tax Code, §11.31 on or after September 1, 201<u>5</u><del>17</del>, in excess of \$229,424 in each fiscal year of the biennium are appropriated to the agency.</p> <p><i>The allocation was increased as a result of the 2.5% increase.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
6	VI-18	<p><b>Authorization: Operating Fund.</b> The Texas Commission on Environmental Quality (TCEQ) is authorized to make transfers from any appropriation made to TCEQ into a single account in the General Revenue Fund known as the "Texas Commission on Environmental Quality Operating Fund" for the purpose of making expenditures for which appropriations were made in this Act. After the expenditures have been made from the fund and as soon as the proper strategies have been identified, TCEQ shall process adjustments to the Comptroller in summary accounts to facilitate accurate cost allocations; provided, however, that each special account and fund shall be used for the purposes in current law and nothing shall be done to jeopardize or divert the special accounts and funds or any portion thereof including federal aid.</p> <p><i>No change.</i></p>		
7	VI-18	<p><b>Appropriation: Air Quality Planning.</b> Amounts appropriated above include \$6,000,500 for the biennium out of the Clean Air Account No. 151 in Strategy A.1.1, Air Quality Assessment and Planning, for air quality planning activities to reduce ozone in areas not designated as nonattainment areas during the <del>2014-15</del> <u>2016-17</u> biennium and as approved by the Texas Commission on Environmental Quality (TCEQ). These areas may include Waco, El Paso, Beaumont, Austin, Corpus Christi, Granbury, Killeen-Temple, Longview-Tyler-Marshall, San Antonio, and Victoria. These activities may be carried out through interlocal agreements and may include: identifying, inventorying, and monitoring of pollution levels; modeling pollution levels; and the identification, quantification, implementation of appropriate locally enforceable pollution reduction controls; and the submission of work plans to be submitted to the TCEQ. The TCEQ shall allocate \$350,000 to each area and the remaining funds to each area based on population in excess of 350,000. The grant recipients shall channel the funds to those projects most useful for the State Implementation Plan (SIP).</p> <p><i>No change.</i></p>		
8	VI-19	<p><b>Contract with the State Office of Administrative Hearings.</b> Amounts appropriated above include \$816,000 in each fiscal year of the biennium to cover the cost of contracting with the State Office of Administrative Hearings (SOAH) for funding SOAH's Natural Resources Division for the purpose of conducting administrative hearings and for related expenses. The Texas Commission on Environmental Quality (TCEQ) and the (SOAH) may not enter into a contract for an amount less than the amounts specified SOAH. If the SOAH determines, at the end of each fiscal year, that the amount paid under the contract exceeds the necessary funding, it shall refund the difference to TCEQ. If the SOAH determines that the amounts are insufficient to fund the Natural Resources Division, the SOAH may enter into negotiations with TCEQ in order to renegotiate the interagency contract to provide additional funds for administrative hearings. The SOAH is not appropriated any state funds from such renegotiated contracts until it gives written notice to the Legislative Budget Board and the Governor, together with written permission of the agency.</p> <p><i>No change.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
9	VI-19	<p><b>Texas Parks and Wildlife Environmental Special Investigations Unit.</b> Amounts appropriated above include \$225,000 each fiscal year out of the Waste Management Account No. 549 in Strategy C.1.2, Enforcement and Compliance Support, for the purpose of supporting the Texas Parks and Wildlife Department's Environmental Special Investigations Unit to enforce state and federal laws on illegal dumping. This appropriation is contingent on a memorandum of understanding and an interagency transfer of the funds between the Texas Parks and Wildlife Department and the Texas Commission on Environmental Quality to jointly administer the program. Any unexpended balance of this appropriation from fiscal year 2046<u>18</u> is appropriated for the same purpose for fiscal year 2047<u>19</u>.</p> <p><i>No change.</i></p>		
10	VI-19	<p><b>Federal Funds and Capital Budget Expenditures.</b> To comply with the legislative intent to maximize the use of federal funds and to fulfill grant requirements required for the receipt and expenditure of federal funds, the Texas Commission on Environmental Quality (TCEQ) is exempted from the Capital Budget Rider Provisions contained in Article IX of this Act, "Limitations on Expenditures - Capital Budget", when federal funds are received in excess of amounts identified in the agency's Capital Budget Rider and such funds are federally designated solely for the purchase of specific capital items. In addition, TCEQ is exempted from the Capital Budget Rider provisions within Article IX of this Act when funds are received in the form of gifts to the agency in excess of amounts identified in the agency's Capital Budget Rider and such funds are designated solely for the purchase of specific capital items. The TCEQ shall notify the Legislative Budget Board and the Governor upon receipt of such federal funds or gift proceeds, of the amount received and items to be purchased.</p> <p><i>No change.</i></p>		
11	VI-19	<p><b>Appropriation: Refinement and Enhancement of Modeling to Demonstrate Attainment with the Clean Air Act.</b> Amounts appropriated above include \$750,000 in fiscal year 2046<u>18</u> out of the Clean Air Account No. 151 in Strategy A.1.1, Air Quality Assessment and Planning, for research to obtain the data and information to refine and enhance any model used to demonstrate attainment with the National Ambient Air Quality Standard (NAAQS) and to assess air quality associated with other pollutants under the Federal Clean Air Act during the biennium beginning on September 1, 2045<u>17</u>. These funds may also be used to collect and analyze data and procure appropriate computing tools for modeling to demonstrate attainment with the National Ambient Air Quality Standard for Ozone and other pollutants. The Commission on Environmental Quality may contract as necessary to carry out these activities.</p> <p><i>No change.</i></p>

12	VI-19	<p><b>Reallocation of Revenue and Balances for Certain Accounts.</b> Pursuant to Water Code, § 5.707, and notwithstanding provisions of Article IX, Sec 14.01, Appropriation Transfers, in this Act, the Texas Commission on Environmental Quality is authorized to reallocate not more than 7 percent of the All Funds amount identified in the Method of Finance above from the following accounts (consisting of revenues and balances) to be used for purposes identified in the above strategies.</p> <p style="margin-left: 40px;">Used Oil Recycling Account No. 146  Clean Air Account No. 151  Water Resource Management Account No. 153  Watermasters Administration Account No. 158  Occupational Licensing Account No. 468  Waste Management Account No. 549  Hazardous and Solid Waste Remediation Fee Account No. 550  Petroleum Storage Tank Remediation Account No. 655  Solid Waste Disposal Account No. 5000  Dry Cleaning Facility Release Account No. 5093  Operating Permit Fee Account No. 5094</p> <p>The Commission shall notify the Governor and the Legislative Budget Board of any decision to reallocate funds between accounts prior to any such reallocations.</p> <p><i>No change.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
13	VI-20	<p><b>Appropriations Limited to Revenue Collections: Automobile Emission Inspections.</b> Amounts appropriated above out of the Clean Air Account No. 151 in Strategy A.1.1, Air Quality Assessment and Planning, include <del>\$1,985,484</del> <u>\$2,002,657</u> in each fiscal year of the <del>2016-17</del> <u>2018-19</u> biennium for the operation of the vehicle emissions inspection and maintenance program pursuant to §382.202, Health and Safety Code. These funds are for the purpose of developing, administering, evaluating, and maintaining the vehicle emissions inspection and maintenance program, including federally required reporting measures to demonstrate compliance with applicable federal and state laws.</p> <p>In addition, if additional counties enter the vehicle emissions inspection and maintenance program during fiscal years <del>2016-17</del> <u>2018-19</u>, 20 percent of revenues generated from the vehicle emissions and inspections fee established in Health and Safety Code, §382.202(e) in the additional counties in each fiscal year are hereby appropriated to the Texas Commission on Environmental Quality for the same purposes.</p> <p>It is the intent of the Legislature that 20 percent of the fees authorized and generated by the operation of the vehicle emissions inspection and maintenance program cover, at a minimum, the costs of the appropriations made above, as well as the "Other direct and indirect costs" associated with the program, appropriated elsewhere in this Act. "Other direct and indirect costs" for the vehicle emissions inspection and maintenance program are estimated to be \$261,048 for fiscal year <del>2016</del> <u>18</u> and \$271,408 for fiscal year <del>2017</del> <u>19</u>. In the event that actual and/or projected revenue collections are insufficient to offset the costs identified by this provision, the Legislative Budget Board may direct that the Comptroller of Public Accounts reduce the appropriation authority provided above to be within the amount of revenue expected to be available.</p> <p><i>The allocation was increased as a result of the 2.5% increase.</i></p>		
14	VI-20	<p><b>Appropriation: Administration Costs for the Texas River Compact Commissions.</b> Out of the amounts appropriated above, except amounts appropriated above in Goal E, River Compact Commissions, the Texas Commission on Environmental Quality shall allocate at least \$43,750 for fiscal year <del>2016</del> <u>18</u> and \$49,750 for fiscal year <del>2017</del> <u>19</u> to provide for operating costs for the Texas River Compact Commissions. In addition, \$10,700 each fiscal year out of amounts appropriated above, except from amounts appropriated in Goal E, shall be used for support and administrative services for the commissions.</p> <p><i>No change.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
15	VI-20	<p><b>Appropriation: Environmental Radiation and Perpetual Care.</b> In the event of an incident involving the release of radioactive material at a disposal, source material recovery, processing, or storage facility licensed by the Texas Commission on Environmental Quality (TCEQ), the TCEQ is appropriated any revenues from TCEQ licensees, including the proceeds of securities and interest earned, deposited to the credit of the General Revenue Fund pursuant to Health and Safety Code, §401.306 (b) and §401.301 (d) during the biennium beginning September 1, 2045<u>17</u>(estimated to be \$0). The funds shall be used in Strategy A.3.1, Radioactive Materials Management, to mitigate radioactive pollution resulting from activities of a TCEQ licensee as provided in Health and Safety Code, §401.306 (c)-(e).</p> <p>Contingent on enactment of legislation by the Eighty-fourth Legislature re-creating the Environmental Radiation and Perpetual Care Account within the General Revenue Fund, the TCEQ is appropriated any revenue deposited or transferred to that account from TCEQ licensee, including the proceeds of securities and interest earned, pursuant to Health and Safety Code, §401.306 (b) and §401.301 (d) during the biennium beginning September 1, 2045<u>17</u> (estimated to be \$0). The funds shall be used in Strategy A.3.1, Radioactive Materials Management, to mitigate radioactive pollution resulting from activities of a TCEQ licensee as provided in Health and Safety Code, §401.306 (c)-(e), or as provided by the legislation.</p> <p><i>No change.</i></p>		
16	VI-21	<p><b>Nuisance Surveys for the Economically Distressed Areas Program.</b> Out of amounts appropriated above out of the General Revenue Fund in Strategy A.1.2, Water Resource Assessment and Planning, the Texas Commission on Environmental Quality shall reimburse the Department of State Health Services (DSHS) for costs incurred by DSHS in conducting nuisance surveys for applicants for financial assistance through the Economically Distressed Areas program administered by the Water Development Board. The Commission shall reimburse such costs through Interagency Contracts with (DSHS) in an amount not to exceed a total of \$250,000 for the biennium beginning on September 1, 2045<u>17</u>.</p> <p><i>No change.</i></p>

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
21	VI-21	<p><b>Contingency Appropriation: Revenue from Increased Fee Rates at Watermaster Offices.</b> In addition to amounts appropriated above in Strategy A.2.2, Water Resource Permitting, fee revenues collected and deposited to the credit of the Watermaster Administration Account No. 158 from additional fees generated pursuant to Water Code, §11.329 due to the implementation of increased fee rates at the watermaster offices and in excess of the Comptroller's Biennial Revenue Estimate for <del>2016-17</del><u>2018-19</u> (estimated to be \$0) are appropriated to the Commission on Environmental Quality (TCEQ) for the biennium beginning on September 1, <del>2015</del><u>17</u>. These funds shall be used for operating costs of the watermaster offices.</p> <p>This appropriation is contingent upon the TCEQ and the watermaster offices assessing fees sufficient to generate, during the <del>2016-17</del><u>2018-19</u> biennium, revenue to cover the appropriations out of the Watermaster Administration Account No. 158. In the event that actual and/or projected revenue collections are insufficient to offset the costs identified by this provision, the Comptroller of Public Accounts shall reduce the appropriation authority provided above to be within the amount of revenue expected to be available. The TCEQ and the watermaster offices, upon completion of necessary actions to assess or increase additional fees, shall furnish copies of minutes and other information supporting the estimated revenues to be generated for the <del>2016-17</del><u>2018-19</u> biennium under the revised fee structure to the Comptroller of Public Accounts. If the Comptroller finds the information sufficient to support the projection of increased revenues in excess of those estimated in the Biennial Revenue Estimate for <del>2016-17</del><u>2018-19</u>, a finding of fact to that effect shall be issued and the contingent appropriation shall be made available for the intended purpose.</p> <p><i>No change.</i></p>		
22	VI-22	<p><b>Aggregate Operations.</b> Amounts appropriated above in Strategy C.1.1, Field Inspections and Complaint Response, the Commission on Environmental Quality shall be used to conduct aerial observations at least twice per fiscal year to ensure enforcement of existing statutes and rules relating to aggregate operations.</p> <p><i>No change.</i></p>		
23	VI-22	<p><b>Petroleum Storage Tank Administration: Temporary and Contract Worker Exemption from the Limitation on Full-Time Equivalent (FTE) Positions.</b> For the purposes of implementing Petroleum Storage Tank activities identified in Water Code, §26.3573 (d), the TCEQ is exempt from provisions of Article IX relating to the inclusion of temporary or contract workers in the calculation of the number of Full-Time Equivalent (FTE) positions by a state agency.</p> <p><i>No change.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
24	VI-22	<p><b>Low-Income Vehicle Repair Assistance, Retrofit, and Accelerated Vehicle Retirement Program (LIRAP).</b> Amounts appropriated above out of the Clean Air Account No. 151 in Strategy A.1.1, Air Quality Assessment and Planning, include <del>\$43,467,055</del> \$43,468,055 in each fiscal year of the <del>2016-17</del><u>2018-19</u> biennium in estimated fee revenues from vehicle inspection and maintenance fees generated pursuant to Health and Safety Code, §§382.202 and 382.302, to fund the Low-income Vehicle Repair Assistance, Retrofit, and Accelerated Vehicle Retirement Program (LIRAP). Out of these amounts, not more than <del>\$252,903</del>\$253,893 in each fiscal year shall be used by the Texas Commission on Environmental Quality (TCEQ) for costs associated with administering the LIRAP as authorized in Health and Safety Code, §382.202, and all remaining funds shall be used as LIRAP grants to local governments.</p> <p>Amounts appropriated above in Strategy A.1.1, Air Quality Assessment and Planning, also include \$4,829,673 in each fiscal year of the <del>2016-17</del><u>2018-19</u> biennium out of the Clean Air Account No. 151 to be used only for purposes authorized in Chapter 382 of the Health and Safety Code for county-implemented local initiatives projects to reduce air emissions.</p> <p>Amounts appropriated above for LIRAP grants and local initiative projects also include an estimated \$1,196,172 each fiscal year in estimated fee revenue generated from Travis County and \$483,736 each fiscal year in estimated LIRAP fee revenue generated from Williamson County. The TCEQ shall allocate, at a minimum, the estimated revenue amounts collected in each of the counties during the <del>2016-17</del><u>2018-19</u> biennium to provide LIRAP grants and local initiatives projects in those counties.</p> <p>In addition to the amounts appropriated above, any additional revenues from vehicle inspection and maintenance fees generated from additional counties participating in the LIRAP beginning on or after September 1, <del>2015</del><u>17</u> are appropriated to the TCEQ for the biennium. Such funds shall be used to provide grants to local governments and to cover administrative costs of the TCEQ in administering the LIRAP.</p> <p><i>The allocation was revised to reflect an increase as a result of the 2.5% increase.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
25	VI-22	<p><b>Petroleum Storage Tank Responsible Party Remediation.</b> It is the intent of the Legislature that the Commission on Environmental Quality (TCEQ) prioritize the use of funds appropriated above out of the Petroleum Storage Tank Remediation Account No. 655 to address the continued remediation and monitoring of sites transferred from the responsible party remediation program to the state lead program pursuant to Water Code, §26.3573, Subsection (r-1). Notwithstanding this provision, in prioritizing sites the TCEQ shall consider the risks associated with all sites requiring remediation and monitoring, as well as the availability of funds. In selecting contractors to perform remediation services at these transferred sites, the Executive Director of the TCEQ may make direct awards to existing contractors who are otherwise eligible for award to ensure that the continued remediation of these sites progresses in the most efficient and cost-effective manner which presents the least risk of disrupting ongoing remediation and monitoring activities.</p> <p><i>No change.</i></p>		
26	VI-23	<p><del><b>Appropriation: Fee Revenue for Brazos River Watermaster Program.</b> Appropriations made above to the Commission on Environmental Quality include an amount not to exceed \$736,799 in fiscal year 2016 and not to exceed \$460,820 in fiscal year 2017 in Strategy A.2.2, Water Resource Permitting, in fee revenues collected and deposited to the Watermaster Administration Account No. 158. This appropriation shall be limited to amounts deposited to the Watermaster Administration Account No. 158 in excess of the Comptroller's Biennial Revenue Estimate for 2016-17. The funds shall be used to cover costs related to operations of the Brazos River watermaster program.</del></p> <p><i>Propose deletion of rider. This rider was intended for initial set-up of the Brazos Watermaster program. Brazos funding will be incorporated into baseline appropriation for Fund 158 in FY18-19.</i></p>		
27	VI-23	<p><b>Appropriation: Unexpended Balances from Cost Recovery for Site Remediation and Cleanups.</b> In addition to amounts appropriated above, any unobligated and unexpended balances as of August 31, 2015<del>17</del> (estimated to be \$0), remaining in the Hazardous and Solid Waste Remediation Fee Account No. 550 which were received from responsible parties as cost recovery payments for site remediation's and cleanups undertaken by the Commission on Environmental Quality (TCEQ) are appropriated to the TCEQ for the biennium beginning September 1, 2015<del>17</del>. The funds shall be used to pay the cost of site cleanups and remediation's during the biennium.</p> <p><i>No change.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentes Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
28	VI-23	<p><b>Litigation Expenses for the Rio Grande Compact Commission.</b> Amounts appropriated above out of the General Revenue Fund in Strategy E.1.4, Rio Grande River Compact, include \$5,000,000 in fiscal year <del>2016</del><u>18</u> to be used to cover expenses incurred by the Rio Grande Compact Commission relating to investigations and legal expenses resulting from litigation between the State of Texas and the State of New Mexico over the equitable distribution of water according to the Rio Grande Compact. Any unobligated and unexpended balances remaining from this appropriation on August 31, <del>2016</del><u>17</u>, are appropriated for the fiscal year beginning on September 1, <del>2016</del><u>17</u>.</p> <p><i>The revision allows the carry forward of unexpended balances between biennia from FY 17 to FY 18.</i></p>		
29	VI-23	<p><b>Barnett Shale Permit By Rule Study.</b> The Texas Commission on Environmental Quality (TCEQ) is not authorized to expend any funds appropriated in this Act to implement a rule that would extend 30 Texas Administrative Code, §106.352, Oil and Gas Handling Production Facilities, Rule Project No. 2010-018-106-PR ("Barnett Shale permit by rule") to oil and gas sources located outside the 23-county area of the Barnett Shale identified in subsection (a)(1) of the Barnett Shale permit by rule region ("Barnett Shale Region") until after August 31, 2017 and until after the agency conducts a study and files a report with the Legislature on the economic impact of extending the provisions of the Barnett Shale permit by rule to other areas of the state. Such a study may be funded through (1) grants, awards, or other gifts made to the TCEQ for that purpose; (2) funds directed to this study through supplemental environmental projects; or (3) by the use of the Texas Emissions Reduction Plan funds, as available. The study shall:</p> <ul style="list-style-type: none"> <li>(a) Be based on data collected during the 18-month period following initial implementation of the Barnett Shale permit by rule in the Barnett Shale Region;</li> <li>(b) Assess the technical feasibility and economic reasonableness of the implementation of the Barnett Shale permit by rule in geographic areas outside of the Barnett Shale Region, including an assessment of the economic impacts on the oil and gas industry and the Texas economy; and</li> <li>(c) Assess any other factors the TCEQ deems relevant.</li> </ul> <p>Nothing in this rider shall be construed to limit the TCEQ's authority to develop a permit by rule or other authorization for planned maintenance, startup, and shutdown emissions from oil and gas sources located outside the Barnett Shale Region.</p> <p><i>No change.</i></p>		

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 582	<b>Agency Name:</b> Commission on Environmental Quality	<b>Prepared By:</b> E. Sifuentez Koch/L. Day	<b>Date:</b>	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2016-17 GAA</b>	<b>85th Proposed Riders Revisions and Additions</b>		
30	VI-23	<p><b>Appropriation: Expedited Processing of Permit Applications.</b> Included in amounts appropriated above out of the Clean Air Account No. 151 is <del>\$525,000</del><u>1,000,000</u> for the biennium for contract labor, overtime and compensatory pay, or other costs incurred to support the expedited processing of permit applications. The Commission on Environmental Quality is authorized to compensate employees who perform expedited air permits twice the hourly rate for time worked in excess of their regularly scheduled work hours. For the purposes of the expedited permit process, the TCEQ is exempt from provisions of Article IX relating to the inclusion of temporary or contract workers in the calculation of the number of Full-Time Equivalent (FTE) positions.</p> <p><del>Also included-</del> <u>In addition to the amounts appropriated above out of the Clean Air Account No. 151 in Strategy A.2.1, Air Quality Permitting, the TCEQ is appropriated (estimated to be \$0) an amount not to exceed \$475,000 in fiscal each year 2016 from fee revenues collected and deposited to the account from expedited permit review surcharges assessed in accordance with Health and Safety Code, § 382.05155 and in excess of the Comptroller's Biennial Revenue Estimate.</u> These funds are provided for costs incurred to support the expedited permitting process.</p> <p>Any unexpended balances remaining in this appropriation on August 31, 2016<del>18</del> <u>in this appropriation</u> are appropriated for the same purposes for the fiscal year beginning on September 1, 2016<del>18</del>.</p> <p><i>The allocation was revised to increase baseline appropriation based on expected increase in revenue and activity.</i></p>		
34	VI-24	<p><del><b>Targeted Salary Increase for Job Classifications with High Turnover Rates.</b> Amounts appropriated above include \$1,000,000 in each fiscal year from various methods of financing and in various strategies above to be used to provide salary increases for specialized job classifications with the highest turnover rates based on the most recent State Auditor's Office data available. These classifications may include accountants, attorneys, auditors, chemists, contract specialists, electronic technicians, engineers, engineering specialists, geoscientists, hydrologists, planners, systems analysts, and administrators. The amount identified in this rider for salary increases for positions with high turnover rates shall only be used by the agency for that purpose.</del></p> <p><i>Propose deletion of rider.</i></p>

**Description/Justification for continuation of existing riders or proposed new rider**

Rider 15 - The agency utilized Rider 15 Appropriation: Environmental Radiation and Perpetual Care to support a clean up at the Lamprecht mine site and the Zamzow mine site in Live Oak County. The TCEQ wants to decommission the former uranium mine sites. Before the Zamzow site can be decommissioned, six piles of material must be removed and properly disposed of at an appropriate disposal site. Once the piles are removed, the ground underneath the piles can be accessed for further decommissioning activities.

<b>TOTAL, METHOD OF FINANCING</b>		<b>\$2,721,356</b>	<b>\$2,721,356</b>

**DESCRIPTION / JUSTIFICATION:**

The Public Drinking Water (PDW) program is experiencing an increase in program needs and a reduction in federal funds. The PDW program has been able to utilize unexpended balances from the Drinking Water State Revolving Fund grant, as needed. These funds are dwindling and expect to be depleted by FY 2018. These funds support the PDW compliance program, PDW conference, and the TXWARN website which promotes statewide emergency preparedness.

The collection of water samples has increased due to additional water systems sampled, changes to sample collection schedules due to compliance decisions that increased monitoring requirements to protect public health, increased cost of sample collection, and additional EPA sampling requirements such as the expected EPA revision to the Lead and Copper Rule. The agency provides assistance to public drinking water systems with maintaining compliance through financial, managerial, and technical assistance (FMT) on-site visits. FMT assistance has increased due to emergency conditions (i.e., drought, hurricanes) and unfunded federal regulations.

The District program needs have increased due in-part to statewide economic growth. Funding will support reviews for administrative completeness before being assigned to the technical staff, review of minor miscellaneous applications, and track the receipt and review of water district audits.

The Public Drinking Water Conference provides compliance training on new rules to public water systems and other public entities to ensure water systems and operators are up to date on the latest information regarding technologies and best practices.

The TXWARN contract supports and promotes statewide emergency preparedness, disaster response, and mutual assistance matters for public and private water and wastewater utilities. Small and underfunded systems receive training on water security and cyber security.

**4.A. Exceptional Item Request Schedule**  
 85th Regular Session, Agency Submission, Version 1  
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **8/23/2016**  
 TIME: **4:50:04PM**

Agency code: **582**

Agency name:  
**Commission on Environmental Quality**

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2018</b>	<b>Excp 2019</b>
-------------	--------------------	------------------	------------------

**EXTERNAL/INTERNAL FACTORS:**

Include increases in Public Drinking Water System needs and a reduction in federal funds which support those needs for the expected EPA revision to the Lead and Copper Rule.

Increase in district applications, due in-part to statewide economic growth development (particularly involving water districts).

Compliance training on new rules to public water systems and other public entities associated with the Public Water System Supervision Program to ensure that the water systems and operators are up-to-date on the latest information regarding technologies and best practices.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

The out-year cost represents the estimated ongoing program cost.

**ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:**

	<b>2020</b>	<b>2021</b>	<b>2022</b>
	\$2,721,356	\$2,721,356	\$2,721,356

**APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM :** 100.00%

**CONTRACT DESCRIPTION :**

The funding is for existing contracts of professional services that will continue indefinitely with 50% as direct award contracts and the other 50% as Request for Proposal contracts. TCEQ does not have the resources to provide these services or it allows our resources to focus on other major areas within the program.

153	Water Resource Management	536,641	549,141
<b>TOTAL, METHOD OF FINANCING</b>		<b>\$536,641</b>	<b>\$549,141</b>

**DESCRIPTION / JUSTIFICATION:**

The Water Quality Needs provides funding for continuous water quality monitoring instruments, Total Maximum Daily Loads (TMDL) contract, wastewater permitting support, and Clean Rivers program.

The operation and maintenance of the Water quality monitoring instruments are required for the collection and analysis of surface water quality monitoring data for the Continuous Water Quality Monitoring Network (CWQMN), the Surface Water Quality Monitoring Program (SWQM), and the Sugar Land Laboratory. The water quality data collected supports programs such as: the Texas Surface Water Quality Standards, the Total Maximum Daily Load, and the Nonpoint Source programs, Clean Rivers Program.

The Total Maximum Daily Loads (TMDLs) contracts provide valuable expertise, equipment, and resources for the TCEQ in various watersheds across the state of Texas. Section 303(d) of the Federal Clean Water Act requires states to identify waters that do not or will not meet applicable water quality standards and to establish Total Maximum Daily Loads (TMDLs) for pollutants that are causing non-attainment of water quality standards.

The Wastewater Permitting program requires support for statewide public notices for general permit renewals and to process permits, especially in the stormwater categories.

**4.A. Exceptional Item Request Schedule**  
 85th Regular Session, Agency Submission, Version 1  
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **8/23/2016**  
 TIME: **4:50:04PM**

Agency code: **582**

Agency name:  
**Commission on Environmental Quality**

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2018</b>	<b>Excp 2019</b>
-------------	--------------------	------------------	------------------

The Clean Rivers program operating expenses have increased every year while funding has remained the same. In 1991, the Texas Legislature enacted Texas Water Code Sec 26.0135, the Texas Clean Rivers Act, which provides for strategic and comprehensive monitoring, and periodic assessment, of water quality.

**EXTERNAL/INTERNAL FACTORS:**

Includes compliance with Federal Clean Water Act Sections 106, 303 (d), 305 (b) and 402. Compliance with Texas Water Code, Sections 26.011, 26.027, 26.0135 and 26.127.

TMDL contracts are developed to support the program. These contracts provide valuable expertise, equipment and resources for the TCEQ in various watersheds across the state of Texas.

The wastewater applications are mandated by both state and federal statutes and is carried out under a Memorandum of Agreement with EPA.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

The out-year cost represents the estimated ongoing program cost.

**ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:**

<b>2020</b>	<b>2021</b>	<b>2022</b>
\$558,641	\$569,641	\$569,641

**APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM :** 36.00%

**CONTRACT DESCRIPTION :**

The funding is for existing contracts of professional services that will continue indefinitely as direct award contracts. TCEQ does not have the resources to provide these services or it allows our resources to focus on other major areas within the program.

-------	-------

**DESCRIPTION / JUSTIFICATION:**

The federal Revised Total Coliform Rule (RTCR) protects public health by reducing potential pathways for fecal contamination into public drinking water distribution systems. All public water systems (PWS) must comply with the new Revised Total Coliform Rule requirements.

Staff will be responsible for thorough review and approval of RTCR assessments, corrective actions, tracking of compliance, revisions to 6,900 PWS site sampling plans, and seasonal start-up procedures. Funding will support compliance training, outreach events, increased Financial, Managerial, and Technical Assistance (FMT) compliance support, and additional operator training.

Staff will also conduct enhanced investigations of community distribution systems at a minimum of once every five years in addition to the currently required Comprehensive Compliance Investigations (CCIs) conducted at public water supply systems once every three years. The enhanced evaluation of the distribution system would include a review of monitoring plans, sample analysis, sampling locations, and monthly operating reports. Investigations will be conducted based on findings of previous investigations, compliance with distribution requirements, sampling results, complaints, and regional staff knowledge.

-------------	--------------------	------------------	------------------

**DESCRIPTION / JUSTIFICATION:**

The agency has historically funded shortfalls in operational needs with salary savings. The agency seeks to sustain continuity and equalize these costs while ensuring retention of a qualified workforce. Examples of operational needs funded by salary savings include:

- Community response by providing services for failing septic tanks, and conducting soil and water samples when the public has concerns with contamination;
- Management of the Central File Room and conversion to electronic records which supports the agency’s primary regulatory records for access by the public;
- Response to technology changes for increased cyber security standards, accessibility requirements, monitoring and data collection methods; and
- Repair of a leaking roof that houses lab equipment.

**EXTERNAL/INTERNAL FACTORS:**

The agency has historically funded shortfalls in operational needs with salary savings. The agency seeks to sustain continuity and equalize these costs while ensuring retention of a qualified workforce.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

The out-year cost represents the estimated ongoing program cost.

<b>TOTAL, METHOD OF FINANCING</b>		<b>5,008,000</b>	<b>5,008,000</b>

**DESCRIPTION / JUSTIFICATION:**

The Critical Technology Upgrade (CTU) project will migrate legacy CA Gen applications to a modern, supportable web-based technology, retaining mission critical agency business functionality to support TCEQ's licensing, permitting, registration, monitoring, and enforcement imperatives.

TCEQ developed critical information technology enterprise applications with Central Registry (CR) as the backbone of the application cluster. CR supplies integrated and standardized information about the entities we regulate in support of the agency's core functions in air, water, and waste as well as a central access point to review and update entities core data.

The legacy technology that CR and its associated application cluster runs poses a risk to agency business. Many applications are now 17 years old, are large and complex, and were written before current code standard practices. There are still tool sets available for the code conversion, the converted code will be a poor development base and will not be user readable or supportable.

The CTU Phase 1 approach, includes modernization of CR, Commissioners' Integrated Database (CID), and Occupational Licensing (OL). CID is a centralized source of agency information from the Commissioners and Executive Director for internal and external communications related to resolutions, final orders on permit applications,

Agency code: 582

Agency name:

**Commission on Environmental Quality**

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2018</b>	<b>Excp 2019</b>
-------------	--------------------	------------------	------------------

enforcement cases and other orders issued by the Commission and Executive Director. There is a high level of public interest in CID because it provides transparency into Commission actions and customer service benefits to the regulated community, public, and oversight bodies. OL is the application for license information of individuals whose occupations are regulated by TCEQ. The Phase 1 project also includes starting on the analysis and documentation of requirements for additional legacy applications. The remaining legacy applications have been prioritized for modernization in future project phases.

**EXTERNAL/INTERNAL FACTORS:**

Mission critical failure of legacy systems would compromise the agency's responsibility to implement federal and state mandates designed to protect the public by ensuring clean air, clean water, and the safe management of waste. Failure would be prohibitively costly, both financially and in terms of potential harm to the public and the environment.

**DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:**

TCEQ has developed critical information technology enterprise applications with Central Registry (CR) as the backbone of the application cluster. CR supplies integrated and standardized information about the entities we regulate in support of the agency's core functions in licensing, permitting, registration, monitoring, and enforcement in air, water, and waste. CR provides the regulated community with a central access point to review and update core data.

The legacy technology that CR and its associated application cluster runs poses a risk to agency business. Many of these legacy CA Gen applications are now 17 years old, are large and complex, and were written before a rigorous development approach and re-use of code across applications became standard practice. While there are still tool sets available for the code conversion, the converted code will be a poor development base and will not be user readable or supportable. The CTU project will migrate legacy CA Gen applications to a modern, supportable web-based technology, retaining mission critical agency business functionality to support TCEQ's licensing, permitting, registration, monitoring, and enforcement imperatives.

The CTU LAR Phase 1 project approach, FY18/19, includes the modernization of CR and two additional legacy applications, Commissioners' Integrated Database (CID) and Occupational Licensing (OL). CID provides a centralized source of agency information from the Commissioners and Executive Director for internal and external communications related to resolutions, final orders on permit applications, enforcement cases and other orders issued by the Commission and Executive Director. There is a high level of public interest in CID because it provides transparency into Commission actions and customer service benefits to the regulated community, public, and oversight bodies. OL is the application for license information of individuals whose occupations are regulated by TCEQ. The Phase 1 project also includes starting on the analysis and documentation of requirements for additional legacy applications. The remaining CA Gen legacy applications have been prioritized for modernization in future project phases.

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2018</b>	<b>Excp 2019</b>
-------------	--------------------	------------------	------------------

Summary of quantitative financial analysis over the 10-year Business Case timeline for CTU Phase 1:

- Agency Benefits (Cash Inflow) = \$82 million
- Business Case Costs (Cash Outflow) = \$22 million
- Cumulative Net Benefits (Cumulative Net Cash Flow) = \$60 million
- Breakeven Point = 2.79

**TYPE OF PROJECT**

Enterprise Resource Planning (ERP)

**ALTERNATIVE ANALYSIS**

Alternative project solutions identified, evaluated and rejected:

- Maintain the status quo (no project): Not modernizing would cost an estimated \$74 million and compromise TCEQ’s ability to perform its mission, harming Texans and the environment.
- Commercial Off The Shelf (COTS) application: There are no COTS options for these specialized applications, significantly customized to meet successive federal and state mandates.
- Convert CA Gen applications to Java via an automated process: Many of these legacy CA Gen applications are large, complex, and approaching 17 years old, written before a standardized development approach and re-use of code across applications became standard practice. While there are code conversion tool sets available, the converted code would be a poor development base and not be user readable or maintainable.

550	Hazardous/Waste Remed Acc	1,250,000	1,250,000
<b>TOTAL, METHOD OF FINANCING</b>		<b>1,250,000</b>	<b>1,250,000</b>

**DESCRIPTION / JUSTIFICATION:**

Additional funding is requested to support the monitoring, maintenance, and installation of filtration systems on private water wells impacted with total chromium contamination above the federal maximum contaminant level at the West County Road 112 Ground Water Plume Federal Superfund Site. This funding will ensure that private well users have access to potable water and filter replacements for the filtration systems. The TCEQ has installed and maintained anion exchange filtrations systems at this site since 2009. Between Fiscal Years 2009 and 2016, the TCEQ has expended over \$8.6 million in state funds for this purpose. In prior years, the program had sufficient cost recovery funds to support these filtration activities, but recently there has been a reduction in the amount of available cost recovery funds.

**EXTERNAL/INTERNAL FACTORS:**

The Environmental Protection Agency is the lead on the West County Road 112 Federal Superfund Site and is spearheading discussions with Midland County regarding an alternate supply of potable water for affected private well owners. EPA argues, however, that it is precluded from funding maintenance and monitoring of the filtration systems pursuant to federal regulations.

**APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM :** 100.00%

**CONTRACT DESCRIPTION :**

The funding is for existing contracts of professional services that will continue indefinitely and were procured through Request for Proposal process. TCEQ does not have the equipment or expertise to perform to provide these services.

**DESCRIPTION / JUSTIFICATION:**

Consistent with public education requirements, the Take Care of Texas (TCOT) statewide campaign encourages all Texans to help keep our air and water clean, conserve water and energy, reduce waste, and save a little money in the process. The Take Care of Texas initiative ensures the agency educates constituents on the importance of conserving and protecting the state's natural resources. Initiative goals are achieved by a dual-language website, exhibiting at statewide conferences and events, and bilingual publications. The campaign provides helpful information on Texas' successes in environmental protection.

**EXTERNAL/INTERNAL FACTORS:**

Without proper education, the state's resources will be depleted and the environment will be adversely affected. There will be more ozone action days, impaired water bodies, water restrictions, overflowing landfills, and less environmental awareness by the public.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

The out-year cost represents the estimated ongoing program cost.

<b>TOTAL, METHOD OF FINANCING</b>		<b>\$524,000</b>	<b>\$524,000</b>

**DESCRIPTION / JUSTIFICATION:**

Additional funding is requested to address funding reductions in the Federal Resource Conservation and Recovery Act (RCRA) Program. EPA announced a new methodology for allocating hazardous waste grants to states for fiscal years 2016-2020. The new methodology reflects shifts in program priorities since the previous formula was developed in 1996. As a result of the new methodology, grant funding for the TCEQ will be reduced over a five year period. Reductions will impact core permitting, compliance and remediation activities related to hazardous waste facilities. The agency will be reduced by approximately \$1.3 million by fiscal 2019.

**EXTERNAL/INTERNAL FACTORS:**

The TCEQ has received delegated authority for implementing the federal RCRA program and its requirement in the state of Texas. RCRA activities are managed through a federal Performance Partnership Grant that funds the state's hazardous waste activities.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

The out-year cost represents the estimated ongoing program cost.

<b>TOTAL, METHOD OF FINANCING</b>		<b>\$890,114</b>	<b>\$1,287,734</b>

**DESCRIPTION / JUSTIFICATION:**

The request is for increases to leases in Austin, Corpus Christi, and Lubbock, and for storage of boats in Houston. These leases were executed by the Texas Facilities Commission (TFC) based on TCEQ's needs due to expiring leases, some as long as ten years.

The lease for Building F at TCEQ headquarters will expire in the fall of FY 2018. The lease was renegotiated for an additional 10 years with an increased cost per square foot. The building houses key personnel, such as, the Commissioner's Office, the Executive Office, and the Offices of Water and Waste.

The Corpus Christi Region is currently located at a state-owned building. The region is required to relocate by February 2018, as the space will no longer be available. Given that the regional office is in a state-owned building, the agency does not have funding to lease new space.

The Houston Laboratory has been relocated to Sugarland. However, Region 12 had a business need to store their boats and equipment near the coast and the regional office, necessitating the execution of a five-year lease and the funding to maintain the leased space.

**EXTERNAL/INTERNAL FACTORS:**

These leases were executed by Texas Facilities Commission (TFC) based on TCEQ's needs after existing leases had expired, some as long as ten years.

**METHOD OF FINANCING:**

1	General Revenue Fund	488,392	488,392
<b>TOTAL, METHOD OF FINANCING</b>		<b>\$488,392</b>	<b>\$488,392</b>

**DESCRIPTION / JUSTIFICATION:**

The DCS budget includes costs for the TCEQ to participate in the managed statewide data centers. In addition the budget includes all TCEQ hardware, storage, software licensing, backup recovery, databases, and agency applications. Any loss of funding will either impact the availability of applications or data center services. A reduction in funding would have one or more of the following impacts: reduce ability for programs such as GIS and electronic records management to store data; reduced application development due to reassignment for infrastructure consolidation; or reduced agency backup schedules which would impact agency continuity of operations.

**EXTERNAL/INTERNAL FACTORS:**

The information technology infrastructure services provided by the Data Center Services project are essential to every regulatory, environmental, and administrative function of the agency. Under the law, TCEQ is required to get its information technology infrastructure services from the contract by virtue of its having been prioritized by the Department of Information Resources to do so.

**DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:**

The TCEQ participates in consolidated data center services as required by the Texas Department of Information Resources and HB1516, 79th Legislature, Regular Session. In December 2011, the Texas Department of Information Resources (DIR) signed three multi-year contracts to provide consolidated data center services to 29 state agencies. The first of the contracts was awarded to Capgemini North America, Inc. to act as a services integrator enabling the State to standardize processes and maximize the value of its information technology services. The six-year, approximately \$127 million contract includes service level management, service desk support, project management, IT security, business continuity, disaster recovery testing & planning, and financial management.

A second contract was signed with ACS State and Local Solutions, Inc., a wholly-owned subsidiary of Xerox Corporation, to

Agency code: **582**

Agency name:  
**Commission on Environmental Quality**

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2018</b>	<b>Excp 2019</b>
-------------	--------------------	------------------	------------------

provide infrastructure services in four areas: mainframes, servers, networks and data center operations. They were later acquired by XBS Disposition Subsidiary Two, LLC and ATOS S.E and the contract was amended on April 22, 2015 to reflect this. This eight-year, approximately \$1.1 billion contract emphasizes delivering improved customer services, stabilizing the State’s IT infrastructure environment, and consolidating computer servers from legacy agency data centers to the State’s two consolidated data centers.

The third contract was awarded to Xerox Corporation to provide bulk printing and mailing services. The six-year, approximately \$56 million deal will leverage the State’s significant mail volumes to keep costs low, while providing more flexibility to state agencies to meet their business needs.

**IS THIS IT COMPONENT RELATED TO A NEW OR CURRENT PROJECT?**

CURRENT

**PROPOSED SOFTWARE EXAMPLES (Client-side, server-side, Midrange and Mainframe)**

The Data Center Services program includes transformation and consolidation of facilities, server platforms, mainframes, data storage management, and data center print and mail. Key objectives of this program are to:

- Consolidate disparate legacy agency facilities,
- Reduce statewide costs for services,
- Modernize aging equipment, and
- Increase security and disaster recovery capability.

The Data Center Services program supports the statewide technology vision of shared infrastructure services and 2008 – 2012 State Strategic Plan for Information Technology Management: The Texas Transformation. DCS program goals include:

- Increase visibility into statewide technology infrastructure operations,
- Leverage standardization for improved management and control,
- Improve reporting and manage to defined, required service levels,
- Define a statewide technology plan and move toward more strategic IT platforms, and
- Increase statewide security and disaster recovery capability.

**PROPOSED HARDWARE EXAMPLES (Desktop, Laptop, Tablets, Servers, Mainframes, Printers and Monitors )**

None

**DEVELOPMENT COST AND OTHER COSTS**

This project costs just over twice what it cost the agency to provide the same services previously. However, the contract is expected to produce overall savings for the state.

**TYPE OF PROJECT**

Data Center Consolidation

**ALTERNATIVE ANALYSIS**

The Department of Information Resources prioritized the TCEQ to participate in the Data Center Consolidation under the provisions of HB 1516, 79R. Therefore, the TCEQ considered no alternatives to the implementation of this project.

	<b>FULL-TIME EQUIVALENT POSITIONS (FTE):</b>	5.00	5.00

**DESCRIPTION / JUSTIFICATION:**

Requesting additional staff to process Area and Mobile Source Emissions Credit Applications and support the Emissions Banking and Trading Program. TCEQ plans to revise rules that will result in an increased number of emissions credit generation from area and mobile sources as well as additional use applications. The rulemaking and staff will help provide market incentives to lower emissions from these source categories while assisting increased demand for emission credits needed for future economic growth. The additional staff will support an increased workload and minimize a backlog that could potentially slow economic development. The FTEs tasks will include: evaluating and monitoring credits available under the state implementation plan, reviewing credit generation and use applications; responding to increased emissions inventory reporting; analyzing activities to prevent double-counted emissions; issuing new and amended air quality authorizations to ensure credited emissions reductions are permanent and enforceable; and maintaining electronic certification process for area source applications.

**EXTERNAL/INTERNAL FACTORS:**

The EBT rules in 30 Texas Administrative Code Chapter 101(H), defines the market-based programs. The current EBT rules allow the generations of emission reduction credits and discrete emission reduction credits. The commission received significant public comment opposing the removal of area and mobile source credit provisions. The commission directed staff to determine a method that area and mobile sources can be used to generate and use credits while meeting federal requirements.

**4.A. Exceptional Item Request Schedule**  
85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

DATE: **8/23/2016**

Category Number:	<b>5005</b>	Category Name:	<b>ACQUISITN INFO RES TECH.</b>
Project number:	<b>1</b>	Project Name:	<b>Personal Computer Replacement</b>

**PROJECT DESCRIPTION**

**General Information**

This project replaces personal computer workstations throughout the agency on an approximate 5 year lifecycle. Because of no funds for FY12/13 this will be replacing pc's approaching the 7 year lifecycle, to bring them back to a 5 year lifecycle. We replace approximately 20% of the agency's workstations each year. We purchase a four-year extended warranty with each system, the vendor installs a standard software image on each machine, tags each machine with an agency inventory control number, and installs the equipment. The replaced computers must be surplusd so they may not remain in use due to memory limitations, speed of CPU, etc.

**REVENUE GENERATION / COST SAVINGS**

<b><u>REVENUE COST FLAG</u></b>	<b><u>MOF CODE</u></b>	<b><u>AVERAGE AMOUNT</u></b>
---------------------------------	------------------------	------------------------------

**Explanation:** The seat management contract costs for lease PCs are between 148% and 178% higher per workstation than the same hardware, software, and services supplied by TCEQ. This analysis shows that the periodic replacement of desktop computer workstations is a very cost-effective alternative, which also provides a planned environment within which critical agency applications can be reliably supported.

**Project Location:** Headquarters and Field Offices

**Beneficiaries:** TCEQ staff, general public, federal, state, and local agencies

**Frequency of Use and External Factors Affecting Use:**

Category Number:	<b>5005</b>	Category Name:	<b>ACQUISITN INFO RES TECH.</b>
Project number:	<b>2</b>	Project Name:	<b>Printer Replacement</b>

**PROJECT DESCRIPTION**

**General Information**

This project replaces printers on an approximate 8 year lifecycle. Because of no funds for FY12/13 this will be replacing printers approaching the 10 year lifecycle. The agency replaces approximately 10% of its printers each year. We purchase a four-year extended warranty with each printer. The agency has a printer management plan that establishes a ratio of 4 staff member to 1 printer in order to maximize printer resources effectively.

<b>Number of Units / Average Unit Cost</b>	Varies

<b><u>REVENUE GENERATION / COST SAVINGS</u></b>		
<b><u>REVENUE COST FLAG</u></b>	<b><u>MOF CODE</u></b>	<b><u>AVERAGE AMOUNT</u></b>

**Explanation:** We compared our current method for renewing our printer inventory with a leasing option service offered under the Department of Information Resources' contracts with vendors. These are four-year leases, at the end of which the agency would have no residual interest in the printers, and would have to enter into a new lease. The leasing contract costs is 100% - 150% more than the requested funds to purchase replacement printers.

**Project Location:** Headquarters and Field Offices

**Beneficiaries:** TCEQ staff, general public, federal, state, and local agencies

Project number:	<b>3</b>	Project Name:	<b>Technology Operations &amp; Security</b>

**PROJECT DESCRIPTION**

**General Information**

The Technology Operations and Security Infrastructure includes network and security hardware, software and management components, as well as providing for agency communications through internet, voice-over-IP (VoIP), video conferencing, collaboration and mobility services. This plan replaces, adds capacity or capability required to maintain agency wide technology demands and provide relevant security levels to the agency's technology and data needs. Major data and security hardware components have a typical life cycle between 5 and 7 years.

Planning for replacements includes consideration of the age and condition of the equipment, recent repair history, support status with the manufacturer, versions of software that are qualified for use on it and its role in the agency's information technology architecture, and audit and assessment outcomes. Planning also includes equipment that might be required due to office relocations. All of the equipment is purchased through Department of Information Resources cooperative contracts.

Category Number:	<b>5005</b>	Category Name:	<b>ACQUISITN INFO RES TECH.</b>
Project number:	<b>5</b>	Project Name:	<b>Critical Technology Upgrade</b>

**PROJECT DESCRIPTION**

**General Information**

The Critical Technology Upgrade (CTU) project will migrate legacy CA Gen applications to a modern, supportable web-based technology, retaining mission critical agency business functionality to support TCEQ's licensing, permitting, registration, monitoring, and enforcement imperatives.

TCEQ developed critical information technology enterprise applications with Central Registry (CR) as the backbone of the application cluster. CR supplies integrated and standardized information about the entities we regulate in support of the agency's core functions in air, water, and waste as well as a central access point to review and update entities core data.

The legacy technology that CR and its associated application cluster runs poses a risk to agency business. Many applications are approaching 17 years old, are large and complex, and were written before current code standard practices. There are still tool sets available for the code conversion, the converted code will be a poor development base and will not be user readable or supportable.

The CTU Phase 1 approach, includes modernization of CR, Commissioners' Integrated Database (CID), and Occupational Licensing (OL). CID is a centralized source of agency information from the Commissioners and Executive Director for internal and external communications related to resolutions, final orders on permit applications, enforcement cases and other orders issued by the Commission and Executive Director. There is a high level of public interest in CID because it provides transparency into Commission actions and customer service benefits to the regulated community, public, and oversight bodies. OL is the application for license information of individuals whose occupations are regulated by TCEQ. The Phase 1 project also includes starting on the analysis and documentation of requirements for additional legacy applications. The remaining legacy applications have been prioritized for modernization in future project phases.

<u>REVENUE COST FLAG</u>	<u>MOF CODE</u>	<u>AVERAGE AMOUNT</u>

**Explanation:** Mission critical failure of legacy systems would compromise the agency's responsibility to implement federal and state mandates designed to protect the public by ensuring clean air, clean water, and the safe management of waste. Failure would be prohibitively costly, both financially and in terms of potential harm to the public and the environment.

**Project Location:** TCEQ Park 35 campus

**Beneficiaries:** These enterprise applications serve the entire agency and our regulated businesses and individuals, and provide the information the public and our oversight bodies require.

**Frequency of Use and External Factors Affecting Use:**

Category Number:	<b>5006</b>	Category Name:	<b>TRANSPORTATION ITEMS</b>
Project number:	<b>6</b>	Project Name:	<b>Vehicle and Transportation Items</b>

**PROJECT DESCRIPTION**

**General Information**

In order to continue fulfilling the responsibilities within TCEQ, vehicles require replacement when the following criteria apply: mileage over 100,000, over 9 years, unsafe to operate, or deemed uneconomical to repair and operate. These vehicles include cars, vans, and other large vehicles.

The vehicles are used for field investigations, monitoring, and special investigations, which may require the transportation of equipment to the site.

TCEQ maintains a central motor pool for TCEQ Park 35 staff to use for traveling to various locations in the State. The rotation of older vehicles with newer vehicles is vital to ensuring safety and reliability of vehicles in the Central Motor Pool.

The Watermasters and Watermaster Specialists vehicles are used to reach areas of investigation, monitor stream flows and reservoir levels, and coordinate diversions. Their request is for one replacement vehicle in South Texas and one new-to-program vehicle in the Rio Grande.

Category Number:	<b>5007</b>	Category Name:	<b>ACQUISITN CAP EQUIP ITEMS</b>
Project number:	<b>7</b>	Project Name:	<b>Monitoring &amp; Analysis Equip</b>

**PROJECT DESCRIPTION**

**General Information**

To ensure Texas remains in compliance with the Federal Clean Air Act and federal air monitoring requirements under 40 Code of Federal Regulations Part 58, including monitoring for compliance with the NAAQS, the TCEQ seeks capital funding for the replacement of aging instrumentation and equipment within the Texas air monitoring network for the next biennium. The TCEQ operates numerous automated gas chromatographs for the collection and analysis of volatile organic compounds, known precursors to the formation of ozone. Instrumentation and equipment for sampling and analysis of volatile organic compounds has typical lifespan of 7 to 10 years, with replacement costs in excess of \$100,000. Without maintaining the network through regularly replacing and upgrading aging instrumentation and equipment, significant downtime and data loss may occur, thus precluding TCEQ from meeting its obligations to the EPA and the public.

Category Number:	<b>7000</b>	Category Name:	<b>Data Center Consolidation</b>
Project number:	<b>8</b>	Project Name:	<b>Data Center Consolidation</b>

**PROJECT DESCRIPTION**

**General Information**

The TCEQ participates in consolidated data center services as required by the Texas Department of Information Resources and HB1516, 79th Legislature, Regular Session. In December 2011, the Texas Department of Information Resources (DIR) signed three multi-year contracts to provide consolidated data center services to 29 state agencies. The first of the contracts was awarded to Capgemini North America, Inc. to act as a services integrator enabling the State to standardize processes and maximize the value of its information technology services. The six-year, approximately \$127 million contract includes service level management, service desk support, program management, business continuity, disaster recovery testing and planning, and financial management.

A second contract was signed with ACS State and Local Solutions, Inc., a wholly-owned subsidiary of Xerox Corporation, to provide infrastructure services in four areas: mainframes, servers, networks and data center operations. They were later acquired by XBS Disposition Subsidiary Two, LLC and Atos S.E and the contract was amended on April 22, 2015 to reflect this. This eight-year, approximately \$1.1 billion contract emphasizes delivering improved customer services, stabilizing the State's IT infrastructure environment, and consolidating computer servers from legacy agency data centers to the State's two consolidated data centers.

The third contract was awarded to Xerox Corporation to provide bulk printing and mailing services. The six-year, approximately \$56 million deal will leverage the State's significant mail volumes to keep costs low, while providing more flexibility to state agencies to meet their business needs.

**5.B. Capital Budget Project Information**  
85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

DATE: 8/23/2016  
TIME: 4:50:07PM

**Explanation:** The information technology infrastructure services provided by the Data Center Services project are essential to every regulatory, environmental, and administrative function of the agency. Under the law, TCEQ is required to get its information technology infrastructure services from the contract by virtue of its having been prioritized by the Department of Information Resources to do so.

**Project Location:** Services are delivered at the TCEQ offices in Austin before transformation. After transformation, services will be delivered from two statewide data centers located in Austin and San Angelo.

**Beneficiaries:** TCEQ, regulated community, the public, and other units of local, state, and federal government.

**Frequency of Use and External Factors Affecting Use:**

The information technology services provided under this project are used continuously by all agency units and programs, by the public, by the regulated community, and by other units of government. Usage is affected by the business cycles in agency programs and regulated industries, and by changes in regulatory and environmental statutes and rules at the state and federal levels.

**B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals**

**Attainment:**

The agency exceeded two of the three, or 66% of the applicable statewide HUB procurement goals in FY 2014 and 2015.

**Applicability:**

The "Heavy Construction", and "Building Construction" in FYs 2014 and 2015 were not applicable to agency operations. The agency does not have strategies or programs related to construction. Expenditures in Special Trade Services are contingent upon input from the Texas Facilities Commission (TFC), and/or private leaseholders. The vast majority of these services are handled by TFC and by private leaseholders for our leased buildings. TCEQ reports on this goal because the Comptroller continues to maintain Special Trades data as a TCEQ goal category in USAS.

**Factors Affecting Attainment:**

The Professional Services category was not met in FYs 2014 and 2015. Professional services at TCEQ consist mostly of environmental engineering services and HUB utilization has been derived predominately from direct contracts to HUB vendors. The completion of contracts previously awarded to HUB vendors have impacted the agency HUB performance in professional services in FY 2015. In addition, a factor that continues to impact and dilute the agency's HUB attainment is payments to governmental entities within this category. In FYs 2014 and 2015, government payments of \$422K and \$605K, respectively, were reflected in the agency's HUB data. Without these payments, the agency's actual HUB utilization was 21.30% and 13.44%, respectively. The agency makes every effort to outreach and include HUBs both in a direct and indirect (subcontracting) for all of procurement opportunities available at TCEQ.

**"Good-Faith" Efforts:**

The agency complies with the good faith effort requirements in accordance with Texas Government Code, Chapter 2161 and the Texas Administrative Code, Title 34. Compliance with the HUB requirements have been substantiated by the Texas State Auditor's Office (SAO) audit Report No. 15-036. TCEQ achieved "97% Fully

Compliant” on the SAO audit conducted in FY 2015. The agency continues to maintain an aggressive outreach plan that included attending 29 Economic Opportunity Forums in FY 14 and 33 Forums in FY 15 to educate HUB vendors on opportunities available through TCEQ. In addition, the agency sends out solicitation notifications to all certified HUB vendors of opportunities posted on the Electronic State Business Daily (ESBD) as well as invited HUB vendors to a "Meet the Primes" event that has been incorporated into all pre-solicitation conferences. The HUB Program conducts annual training to project and/or contract managers to ensure compliance with HUB contract requirements. TCEQ works closely with prime contractors to maintain HUB compliance throughout the duration of the agency's contracts.

**SUMMARY OF SPECIAL CONCERNS/ISSUES**

**Assumptions and Methodology:**

Federal funds are source of funding for the agency's environmental programs. The TCEQ anticipates future awards to be in line with the current biennium. The match rates for these grants varies considerably ranging from 0% to 50% state match obligation.

**Potential Loss:**

Federal grant program funding depends upon Congressional appropriations. The requirements of the Energy Act continue to place the agency in the difficult position of funding national mandates with insufficient funding. Over five years, beginning in 2016, the Resource Conservation and Recovery Act (RCRA) will be reduced by approximately \$1.6 million. This severely impacts the program overseeing and regulating waste management.

**Description and Justification for Continuation/Consequences of Abolishing**

The Dry Cleaner Advisory Committee (Committee) is composed of three representatives of the dry cleaning industry, one public representative of urban areas, and one public representative of rural areas. The Committee provides input to the TCEQ on the development of rules to implement the Dry Cleaner Remediation Program (DCRP). In addition, the Committee provides input on the Annual DCRP Report and the Biennium Report that is submitted to the Governor and Legislature on or before December 1st of each even-numbered years. The TCEQ uses the Committee to seek advice and recommendations regarding the DCRP. If the Committee were abolished, the TCEQ would lose valuable input from the regulated community and the public.

Agency Code: **582**      Agency: **Commission on Environmental Quality**

**Description and Justification for Continuation/Consequences of Abolishing**

Established by House Bills 3206 and 3544 of the 81st Legislature, the purpose of the committee is to provide advice to the Texas Commission on Environmental Quality on the implementation of Section 11.31 of the Texas Tax Code. Abolishing the advisory committee would place agency in violation of 11.31(n) of the Texas Tax Code which required the establishment of a permanent advisory committee.

**Description and Justification for Continuation/Consequences of Abolishing**

The MSWRRAC consists of 18 members appointed by the Commission in accordance with THSC Title 5, Section 363.041. The advisory council shall:

- (1) review and evaluate the effect of state policies and programs on municipal solid waste management;
- (2) make recommendations to the executive director and the commission on matters relating to municipal solid waste management;
- (3) recommend legislation to the commission to encourage the efficient management of municipal solid waste;
- (4) recommend policies to the commission for the use, allocation, or distribution of the planning fund that include:
  - (A) identification of statewide priorities for use of funds;
  - (B) the manner and form of application for financial assistance; and
  - (C) criteria, in addition to those prescribed by Section 363.093(d), to be evaluated in establishing priorities for providing financial assistance to applicants; and
- (5) recommend to the executive director special studies and projects to further the effectiveness of municipal solid waste management and resource recovery.

**Description and Justification for Continuation/Consequences of Abolishing**

Required by 1990 Federal Clean Air Act Amendments, Section 507; the State Implementation Plan; and Texas Water Code, Section 5.135. The CAP is a seven-member panel with appointments from the governor, the lieutenant governor, the speaker of the Texas House of Representatives, and the TCEQ chairman. The CAP generally meets once a year and interacts via e-mail at other times. Meetings can also be called throughout the year as needed. The CAP has the following goals: 1) To ensure the interests of small businesses are represented during TCEQ policy and rule development. 2) To evaluate the effectiveness of TNRCC's technical assistance to small businesses regarding air, water and waste requirements. 3) To ensure that materials distributed to small businesses are clear, concise, and understandable.

**USE OF HOMELAND SECURITY FUNDS**

These funds expended under Strategy 010101 are utilized for the continued operation and maintenance of a statewide air monitoring network established to protect public health and safety through the early detection of a terrorist attack utilizing biological agents released into the air. The costs associated with this program include: personnel (2 FTEs), city contracts, supplies including replacement parts for equipment, electricity and cellular phone service, shipping of supplies, travel to meetings and conferences, training and site improvements.

**USE OF HOMELAND SECURITY FUNDS**

Natural/Manmade Disasters are contained within Strategies 010101, 010102, 010303, 010202, 010301, 020101, 030101 and 030102. Funds are used for the planning, development, coordination, and implementation of initiatives to promote the governor’s homeland–security strategy, and to detect, deter, respond to, and recover from disasters, whether caused by nature or people. These initiatives include notifying and coordinating with those responsible for much of the state’s critical infrastructure, including producers and purchasers of drinking water for the public, high-risk dams, refineries, petrochemical facilities, and wastewater-treatment facilities. Costs associated with homeland security include personnel (48.11 FTEs), Emergency Response contracts (Severe Weather Events), Light Detection and Ranging (LIDAR) Contract for Dam inundation mapping, a Probable Maximum Precipitation study on weather across the state and Peer Review contracts associated with this study, database contract for our Tier II Chemical reporting facilities, travel to meetings, conferences, and for dam and ammonium nitrate facility inspections, training, office supplies and equipment and software license purchases.

Homeland Security Funds are also used for activities associated with the oversight and protection of critical water sector infrastructure. To aide in the response and recovery efforts during incidents that interrupt water and wastewater service, contact information and key assets are inventoried and emergency preparedness plans are reviewed and approved. The funds pay for training staff in the processes and protocols utilized during response and recovery activities. Finally, the funds pay for the Texas Water and Wastewater Response Agency Network (TXWARN), a statewide mutual aid program dedicated providing a forum for water and wastewater system to share resources during water security incidents.

**1 Data Center Services**

**Category:** Programs - Service Reductions (Contracted)

**Item Comment:** Under the Tier I, the areas impacted by a reduction to Data Center Services are 1.) Completing the move from an older database environment to Exadata in FY18 would require a priority on agency developer time, in the business areas supporting their own development. Currently, the old and new environments run in parallel while application moves are prioritized with other agency application needs. During the move, all applications need to be reviewed and modified; tested by the business areas; and released through the development, test, production cycle. Committing to this schedule will impact business application priorities by limiting and/or eliminating application enhancements for FY18. 2.) Server reduction at the data centers would be required, and all development environments would be decommissioned. This would impact the agency's ability to make changes to applications, or develop new applications in a shared and organized manner, and would add significant time to the business area application support. Projects such as the Self Audit Module would not be possible without shared development environments for each affected application. 3.) Reducing the amount of time agency data backups are kept from 60 days to 30 days would result in data loss, in some cases. The length of time between the discovery of the need to restore files or databases, submitting the request to data center services, and the actual restore completion can take longer than 30 days. This impact is likely during a virus incident when large amounts of data are affected, and must be analyzed, identified and restored.

Agency code: **582** Agency name: **Commission on Environmental Quality**

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET																								
	2018	2019	Biennial Total	2018	2019	Biennial Total																									
<p><b>Item Comment:</b> Tier I Reductions: The funding for the Texas Emissions Reduction Plan (TERP) is allocated among administrative costs and the different TERP grant programs according to allocation percentages outlined in Texas Health and Safety Code, §386.252. The TERP-related performance measures are based on the primary TERP grant program, the Diesel Emissions Reduction Incentive (DERI) program. The reduction in funding would impact the performance measure targets for the TERP Output Measure 1.1.1 OP6, Tons of NOx reduced through TERP. This measure shows the amount of NOx emissions projected to be reduced through projects funded under the DERI program each year. Based on a projected average cost per ton of NOx reduced of \$8,500, the baseline targets for this measure are 9,590 tons in FY 2018 and 10,208 tons in FY 2019, for a total of 19,798 tons of NOx projected to be reduced from projects funded over the biennium. A reduction in funding for the DERI program would reduce the projected amounts by approximately 2,000 tons per fiscal year. The revised targets for this measure would be 7,647 tons of NOx in FY 2018 and 8,149 tons of NOx in FY 2019, for a biennial total of 15,796 tons of NOx. Based on an average grant of between \$30,000 and \$70,000 per funded activity, the reduced funding could result in between 1,000 and 500 fewer vehicles and pieces of equipment being replaced or upgraded under the DERI program. The funding reductions would also impact other TERP grant programs. The Texas Clean School Bus Program would be able to fund approximately 155 fewer bus upgrades. The New Technology Implementation Grants Program could potentially fund one to two fewer new technology and energy storage projects. The Alternative Fueling Facilities program could also potentially fund one to two fewer alternative fueling stations. Finally, the reduction in funding for the Drayage Truck Incentive Program could result in 13 fewer drayage vehicles being replaced or upgraded.</p> <p>Strategy: 1-1-1 Air Quality Assessment and Planning</p> <p><u>Gr Dedicated</u></p> <table border="1"> <tr> <td>5071 Texas Emissions Reduction Plan</td> <td>\$0</td> <td>\$0</td> <td>\$0</td> <td>\$19,483,321</td> <td>\$19,483,321</td> <td>\$38,966,642</td> <td></td> </tr> <tr> <td><b>Gr Dedicated Total</b></td> <td><b>\$0</b></td> <td><b>\$0</b></td> <td><b>\$0</b></td> <td><b>\$19,483,321</b></td> <td><b>\$19,483,321</b></td> <td><b>\$38,966,642</b></td> <td></td> </tr> <tr> <td><b>Item Total</b></td> <td><b>\$0</b></td> <td><b>\$0</b></td> <td><b>\$0</b></td> <td><b>\$19,483,321</b></td> <td><b>\$19,483,321</b></td> <td><b>\$38,966,642</b></td> <td></td> </tr> </table>								5071 Texas Emissions Reduction Plan	\$0	\$0	\$0	\$19,483,321	\$19,483,321	\$38,966,642		<b>Gr Dedicated Total</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$19,483,321</b>	<b>\$19,483,321</b>	<b>\$38,966,642</b>		<b>Item Total</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$19,483,321</b>	<b>\$19,483,321</b>	<b>\$38,966,642</b>

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2018	2019	Biennial Total	2018	2019	Biennial Total	
<p><b>Item Comment:</b> Under the Tier II reductions, the reduced funding for the Diesel Emissions Reduction Incentive (DERI) program would be approx. \$48 million in FY 2018 and approx. \$52 million in FY 2019, for a total of approx. \$100 million. This is a reduction of approx. \$68 million for that program. Reduction in funding would impact the performance measure targets for the Texas Emissions Reduction Plan (TERP) Output Measure 1.1.1 OP6, Tons of NOx reduced through the TERP. This measure shows the amount of NOx emissions projected to be reduced through projects funded under the DERI program each year. Based on a projected average cost per ton of NOx reduced of \$8,500, the baseline targets for this measure are 9,590 tons in FY 2018 and 10,208 tons in FY 2019, for a total of 19,798 tons of NOx projected to be reduced from projects funded over the biennium. A reduction in funding for the DERI program of \$68,393,776 would reduce the projected amounts by approximately 4,000 tons per fiscal year. The revised targets for this measure would be 5,681 tons of NOx in FY 2018 and 6,069 tons of NOx in FY 2019, for a biennial total of 11,750 tons of NOx. Based on an average grant of between \$30,000 and \$70,000 per funded activity, the reduced funding could result in between 2,300 and 1,000 fewer vehicles and pieces of equipment being replaced or upgraded under the DERI program. The funding reductions would also impact other TERP grant programs. The Texas Clean School Bus Program would be able to fund approximately 310 fewer bus upgrades. The New Technology Implementation Grants Program could potentially fund two to three fewer new technology and energy storage projects. The Alternative Fueling Facilities program could also potentially fund two to three fewer alternative fueling stations. Finally, the reduction in funding for the Drayage Truck Incentive Program could result in 26 fewer drayage vehicles being replaced or upgraded.</p> <p>Strategy: 1-1-1 Air Quality Assessment and Planning</p>

**Method of Allocation**

The allocation of administrative costs is based on salary expense as a percentage of total agency program salaries. This method of allocation is used because over half of the agency's appropriations are passed through to units of government in the form of grants.
