

APPENDIX D

Bibliography of Technical Support Information Reviewed and Considered December 13, 2002

Alapaty K. et al., 2002. Simulation of the Transport and Chemical Evolution of VOC Upset Emissions Using a Variable Grid-Resolution Air Quality Model. Prepared for BCCA Appeal Group, January 2002.

Angevine, W. et al., 2002. Mixing depth variability in the Houston area during TexAQS 2000. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Apel E., et al., 2002. NMHC intercomparison during the TexAQS 2000 field campaign. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Atlas, E. et al., 2002. Trace gas observations from whole air samples collected aboard aircraft during TexAQS 2000. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Banta, R., et al., 2002. 3-D distribution of ozone during the major pollution event of 30 August 2000 during TexAQS 2000. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Baumann K., et al., 2002. Measurement of trace gases and PM_{2.5} mass and composition near the ground and at 254 m above ground level during TexAQS 2000. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Berkowitz, C. et al., 2002. Ozone production efficiency at the Williams Tower. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Blanchard C. et al, 1994, Application of Smog Production Algorithms to the Coastal Oxidant Assessment for Southeast Texas (COAST) Data. Sonoma Technology Final Report for EPA Contract 68D30020, December 1994.

Blanchard, C. 2001, Statistical Characterization of Transient High Ozone Events, Interim Report, BCCA, December 21, 2001.

Buhr, M. et al., 2002. Contribution of NOX from various sources to ozone production observed with the Baylor University aircraft during TexAQS 2000. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Buhr, M. et al., 2002. Description and uncertainty analysis of the Baylor University aircraft trace gas observations collected during TexAQS 2000. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Carter, W.P., 2000. "Excel Tabulation of May 8, 2000 MIR VOC Reactivity Data (r99tab1.xls)". 8 May, 2000. <<ftp://ftp.cert.ucr.edu/pub/carter/SAPRC99/r99tab.xls>>

Chang J. et al., 2002, Spatial and Temporal Impacts of Chlorine Chemistry on Ozone Formation in Southeastern Texas, January 2002, Center for Energy and Environmental Resources, University of Texas, Austin, Prepared for TNRCC (Contract 9880077600-18).

Darby, L. et al., 2002. Relationship between mean wind direction and daily ozone trends at La Porte, Texas. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Daum, P., 2002. Results from TexAQS 2000, NARSTO Executive Assembly Meeting, Washington, D.C., 29-30 April 2002

Daum, P. et al., 2002. Ozone precursors, source regions, and ozone formation during the TexAQS 2000 study. *Proceedings of the Fourth Conference on Atmospheric Chemistry: Urban, Regional, and Global-Scale Impacts of Air Pollutants*, American Meteorological Society Annual Meeting, Orlando, Florida, 13-17 January 2002.

Daum, P. et al. 2001, Update on TexAQS 2000 Analysis, Texas 2000 Air Quality Study Workshop, Houston, Texas 13 December 2001.

Daum P. et al., 2000. Analysis of O₃ formation during a stagnation episode in central Tennessee in summer 1995. *J. Geophys. Res.* 105(D7): 9107-9119.

Environmental Protection Agency, 1984. Evaluation of the Efficiency of Industrial Flares: Test Results, EPA report number 600/2-84-095, May 1984.

Environmental Protection Agency, 1985. Evaluation of the Efficiency of Industrial Flares: Flare head Design and Gas Composition, EPA Report Number 600/2-85/106, September 1985.

ERRI, 2001. The Episodic Release Reduction Initiative, Joint Report of EPA, TNRCC, LDEQ and

the petroleum/chemical industry. July 5, 2001.
