AIR QUALITY DIVISION - EMISSIONS ASSESSMENT SECTION

AIR EMISSIONS/INSPECTION FEE BASIS FORM FOR Fiscal Year (FY) 2019 (9/1/2018 - 8/31/2019)

Per 30 Texas Administrative Code (TAC) §101.24(b) and 101.27(b), this form is **due June 1, 2018**.

Please check one of the following:

- Account will be active for any portion of this FY
- Account will be idle for all of this FY
- Account has been permanently shutdown. Please provide shutdown date: _____
- Account has been merged into RN _____ Please provide merger date: _____
- Account does not qualify (DNQ) for either inspection or emissions fees.
***If DNQ, please provide explanation in the Comment box below.**
- Account under construction and will not be operating during this FY
- Account has been sold. Please provide date of sale*: _____

***If sold, please provide new owner information in the Regulated Entity Information box below.**

REGULATED ENTITY INFORMATION

To update items below, strike through existing data and provide new information.

TCEQ Air Account No: _____ Regulated Entity No: _____

Customer No: _____

Mailing Address: _____

City, State, Zip Code: _____

Fees Contact Name: _____

Fees Contact Email: _____

Fees Contact Phone No: _____

Fees Contact Fax No: _____

Site Name: _____

County: _____

SIC Code: _____

Comments/Additional Information: _____

INSPECTION FEE BASIS INFORMATION:

The inspection fee applies to each account (site) that contains one or more of the types of plants, facilities, and/or processes described in 30 TAC §101.24(f), including permitted and non-permitted facilities. If more than one Standard Industrial Classification (SIC) category can apply to a site, provide the SIC category that has the highest FY 2003 base inspection fee.

If the SIC category has an applicable tier letter associated with the SIC code (i.e., A, B, or C), provide the tier letter that is applicable for the plant, facility, and/or processes. Tier letters are assigned to assist in identifying the different levels of SIC categories. For a complete listing of the SIC codes, tiers with associated capacity/throughput, and the current fee rate for inspection fees, visit our fees website <http://www.tceq.texas.gov/airquality/point-source-ei/air-fees.html>

If a site does not meet one of the applicable SIC categories or its associating tier description, the SIC code/tier letter should be provided as **NOT APPLICABLE** and an explanation should be provided in the comments box above.

SIC Code/Tier Letter: _____

EMISSIONS FEE BASIS INFORMATION:

The following information is required to determine if an owner or operator of an account (site) is subject to being assessed an emissions fee per 30 TAC §101.27(a).

Is the site required to obtain/possess a Title V permit?..... YES or NO

- 1) If you answered "No" to the question above, leave the emissions table below blank and go to step 4.
- 2) If you answered "Yes" to the question above, follow steps 3-4 below and report the site-level annual emissions for each regulated pollutant or group of pollutants in the table below to establish the emissions fee basis.
 - a) **Allowable emissions rates:** limits specified in an enforceable document such as a permit, certified registration of emissions, or Commission Order (hereafter referred to as enforceable emissions limits) that are in effect during the fiscal year that a fee is due. This is also referred to as the site's potential-to-emit emissions.
 - b) **Routine:** Calendar year (CY) 2017 emissions associated with planned activities, including routine operations, and authorized maintenance, startup, and shutdown activities.
 - c) **Scheduled Maintenance, Startup, and Shutdown (SMSS):** CY 2017 emissions from all SMSS that are not authorized by a permit as defined in 30 TAC §101.1(91).
 - d) **Emissions Events (EE):** CY 2017 emissions from all releases due to emissions events as defined in 30 TAC §101.1(28).
- 3) Enter emissions for each regulated pollutant per the guidance below. Under no circumstances may the fee basis be less than the actual emissions at the site.
 - a) If a complete and verifiable emissions inventory (EI) for the applicable CY 2017 has been submitted to the TCEQ, then the site's routine, SMSS, and EE emissions during CY 2017 should be reported in the table below.
 - b) If the site has enforceable emissions limits establishing allowable levels for regulated pollutants, and the site did **not** submit an EI to the TCEQ, then report the site's allowable emissions rates in the table below. Also report any SMSS and EE emissions experienced at the site during CY 2017 in the table below. Provide a copy of the Maximum Allowable Emissions Rate Table for all active permits and/or any authorized certified emissions limits for the site.
 - c) If the site does not have enforceable emissions limits establishing allowable levels for regulated pollutants **and** the site was not required to submit an EI, then the site's routine, SMSS, and EE emissions emitted during CY 2017 must be used to calculate the fee basis and should be reported in the table below. Submit actual production, throughput, or measurement records along with the complete documentation of the calculation methods.

	Actual Emissions			
Regulated Pollutants (Includes all regulated pollutants on site)	Allowable Emissions Rates (Tons per Year)	Routine (Tons per Year)	SMSS (Tons per Year)	EE (Tons per Year)
Sulfur dioxide (SO ₂)				
Nitrogen oxides (NO _x)				
Carbon monoxide (CO)				
Volatile organic compounds (VOC)				
Particulate matter (PM) total				
Other:
