The Air Quality Committee is chaired by Mr. Bill Hennings. Staff support is provided by Mr. Ron Barnard, City of Corpus Christi. The Committee is a volunteer organization acting as a "committee of the whole." Due to the way the Committee was initially organized and developed over the past ten years, that structure has served its function well. The project functions of the Committee are performed by Texas A&M Universities at Corpus Christi and Kingsville under contract to the City of Corpus Christi. Funding for that project work is provided by appropriation from the Texas Legislature administered through the TCEQ. The Committee serves as an advisory board to oversee the actual project work.
