

Texas Commission on Environmental Quality

Instructions for the Texas Low Emission Diesel (TxLED) Producer and Importer Registration Form

The TxLED Producer and Importer Registration Form is to be used by diesel fuel producers and/or importers to register with the TCEQ in accordance with the TxLED regulations specified in [Title 30 Texas Administrative Code \(30 TAC\) 114.314](#) (relating to Registration of Diesel Producers and Importers).

For further assistance in completing the TxLED Producer and Importer Registration Form, refer to the rules governing the TxLED Program in [30 TAC 114.6](#) and [30 TAC 114.312 – 114.319](#) or call the TxLED Program at 512-239-1438.

Section 1. Registration

Identify the registration being submitted, i.e., check “Original” if your company has never registered with the TxLED program, or check “Update” if your company is already registered with the TxLED program, but needs to update the information submitted previously.

Identify the type of registration, i.e., check “Producer” if your company will be producing TxLED, or check “Importer” if your company will only be importing TxLED into the state that produced by another registered TxLED producer.

Note: Companies that import diesel fuel from out of state that does not comply with the TxLED requirements must “further process” the diesel fuel into TxLED **before** it may be sold or supplied for use as fuel in any of the 110 central and eastern Texas counties affected by the TxLED regulations and as such, these companies would be considered “Producers” and must register accordingly.

List your company’s TCEQ-assigned TxLED registration number only if you are updating your previous registration submittal. Leave this response blank if this is an original registration submittal and the TCEQ will assign a TxLED registration number to your company upon receipt of your registration submittal.

Section 2. Producer / Importer Information

List the company name of the TxLED producer/importer as registered with the TxLED Program.

List the TxLED registration number assigned by the TCEQ to the TxLED producer/importer when registered in the TxLED Program, e.g., P200 or I201.

List the TxLED producer/importer’s TCEQ-assigned Customer Number (CN), e.g., CN123456789.

Note: The CN and Regulated Entity Number (RN) assigned to the TxLED producer/importer by the TCEQ’s Central Registry may be searched online at:

<http://www12.tceq.state.tx.us/crpub/index.cfm?fuseaction=home.welcome>. If the TxLED producer/importer has not been assigned a CN, the instructions on how to obtain one are available at: http://www.tceq.texas.gov/permitting/central_registry/guidance.html. A RN will be assigned to the producer’s production facilities and/or the importer’s import facilities when applying for a CN.

Section 3. Designated Company Contact

List the contact name, salutation, title, mailing address, telephone number, fax number, and email address for the person whom the TCEQ may contact regarding questions concerning the data provided in the TxLED quarterly report.

Section 4. TxLED Production or Import Facilities

List the facility name of each TxLED production or import facility used by your company to produce or import TxLED for sale or supply for use as fuel in any of the 110 central and eastern Texas counties affected by the TxLED regulations, e.g., Houston Terminal.

List the RN assigned by the TCEQ to each named TxLED production or import facility, e.g., RN123456789

Identify the facility type of each named TxLED production or import facility, i.e., enter “P” for production or enter “I” for import. TCEQ-approved Alternative Diesel Fuel Formulation used to produce TxLED at the production facility being reported and list the total volume of TxLED produced at the production facility during the reported quarterly using this formulation.

Section 5. TxLED Composition

Identify the type(s) of TxLED that your company will produce or import:

- a. Check “TxLED by specification” if the TxLED is produced in compliance with the aromatic hydrocarbon and cetane standards specified in 30 TAC 114.312(a);
- b. Check “California diesel by specification or CARB-certified Alternative Diesel Formulation” if the TxLED is produced in compliance with the California diesel fuel standards referenced in 30 TAC 114.312(c);
- c. Check “TxLED by TCEQ-approved Alternative Diesel Formulation” if the TxLED is produced in compliance with an alternative diesel fuel formulation approved by the TCEQ as provided in 30 TAC 114.312(d);
- d. Check “TxLED by designated alternative limits” if the TxLED is produced in compliance with all of the fuel property standards specified in 30 TAC 114.313; and
- e. Check “TxLED by TCEQ-approved Alternative Emission Reduction Plan” if the TxLED is produced in compliance with the alternative emission reduction plan (AERP) requirements specified in 30 TAC 114.318.

If applicable, list the TCEQ-assigned identification number of all TCEQ-approved alternative diesel fuel formulations that will be used by your company to produce TxLED in compliance with 30 TAC 114.312(d) as indicated under Question 1 of this section, e.g., TXLED-A-00006.

Note: The TCEQ-assigned identification numbers for all TCEQ-approved alternative diesel fuel formulations are listed on the TxLED Program Web site at <http://www.tceq.texas.gov/airquality/mobilesource/txled/approved-alternative-diesel-fuel-formulations>.

If applicable, list the CARB Executive Order number of the CARB-certified Alternative Diesel Formulation that will be used by your company to produce TxLED in compliance with 30 TAC 114.312(c) as indicated under Question 1 of this section, e.g., EO G-714-031A.

Indicate whether your company has submitted an AERP to the TCEQ for approval, i.e., check “Yes” or “No” as applicable. If “Yes” is checked, indicate whether the TCEQ has approved the submitted AERP, i.e., check “Yes” or “No” as applicable.

List the estimated total number of barrels of TxLED that your company plans to produce or import from all of the TxLED production or import facilities listed under Section 4 of this registration form in the 12 months following the date of this registration submittal that will be provided for sale or supply for use as fuel in any of the 110 central and eastern Texas counties affected by the TxLED regulations, e.g., 23,809 barrels.

Note: One barrel equates to 42 U.S. gallons.

Section 6. TxLED Distribution

Identify all of the counties affected by the TxLED regulations where your company plans to distribute the TxLED produced or imported by your company, i.e., check “All Counties” if your company will distribute TxLED to all affected counties, or otherwise check each of the counties in your company’s planned TxLED distribution area as appropriate.

Section 7. Certification Statement

The business owner, an officer of the corporation, or a person delegated with the authority in writing by the business owner or an officer of the corporation must sign the certification statement on the TxLED Producer and Importer Registration Form. This person should be knowledgeable of the TxLED requirements specified in 30 TAC 114.312–114.319 and hold a position of authority within the company.

List the name, salutation, title, telephone number, and email address for the person signing the TxLED Producer and Importer Registration Form.

The certification statement must be signed and dated prior the submittal of the TxLED Producer and Importer Registration Form.
