Subject: H2 Electric Cars

To whom it may concern,

In regards to the different categories that the VW settlement will be allotted to, please make note that the hydrogen fuel cell vehicles such as the Mirai that is now being released buy Toyota are 100% electrical vehicles. They are not internal combustion engines.

Yes although some people are not aware of this fact it still remains a fact that the hydrogen fuel cell vehicles are indeed electric vehicles and hydrogen serves the same function as a battery.

Thanks,
Michael Henning
