Subject: VW Meeting Comment/Question

Hi,

I was wondering how to keep up to date with future meetings or public comment opportunities for the VW funds. I checked the website, and it made no mention of the meeting on January 17th, however a colleague forwarded an e-mail to me referencing this meeting and agenda.

Finally here is a formal question/comment I am submitting:

Due to the fact that no all electric freight switcher locomotive exists, please make an amendment to allow for the formal inclusion of all-electric rail car movers to be included under the freight switcher category. Please refer to the NASEO document VW Toolkit where an all-electric rail car mover was provided as the example for this category. The states must individually decide on this, as previously advised by EPA but I do want to know how to get these considered for inclusion.

Thanks very much,

Allison Wurtz
