Dear TCEQ,

Given the growth of Texas, school districts and fleets are expanding.

That means they are needing new buses and vehicles but they may have useful life of older vehicles.

I believe there needs to be a provision that priority is given to destroying older buses...but if funds in a category are remaining and a fleet wants to acquire a new alternative fuel vehicle(example: an ISD that is expanding their fleet)...give them opportunity to expand into alternative cleaner fuel without destroying a bus that has a useful life.
