Subject: VW Funding for Grants

Dear TECQ Team,

Port Freeport is interested in replacing our current drayage trucks with new LPG / CNG trucks to do local deliveries in and around Freeport. We believe the Grant Program that is currently being considered would be an excellent way for us to get this done quickly and help us move away from diesel and or gasoline trucks which shuttle containers. We respectfully request that you approve HGAC to offer grants for this type of emissions and particulate reduction plan as part of the VW settlement package offered here in Texas. As a local government entity Port Freeport is very interested in any opportunity to be greener so please help us by giving us and HGAC this tool.

Thanks in advance for your time and consideration regarding this opportunity.

Regards,

Mike Wilson
Director of Economic Development
