---

As an EV owner, I would like to see the following investments for the VW Settlement Funds:

1. Incentives to build utility-scale solar and wind projects to replace carbon-based electrical generation, plus an expanded transmission infrastructure necessary to move that generation to end users.
2. Incentives to implement local utility-scale electrical storage solutions (i.e. battery packs) in order to improve the efficiency and reliability of the grid.
3. Incentives to expanded EV charging (level 2 or higher) throughout the state, through contribution toward construction costs as well as subsidies for the electricity provided.

Thank you for your consideration.
