How about [Texas State Parks](#) providing electric/hybrid vehicle hookups with funds from the VW settlement?

The [National Park Service announced](#) that it will install up to 100 electric car chargers in parks across the nation in 2017 and 2018. Watch how a [couple slept in their electric car](#) at Silverthorne, Colorado, [Heaton Bay Campground](#) in the White River National Forest.

Offer Electric/hybrid auto hookups with overnight camping in Texas state parks. Not just for RV's.

[New Mexico for example](#), offers Overnight Camping (per vehicle, per night) on a developed site with electric hookup for \$14. OR Electric hookup with annual camping permit for \$4. Annual Camping Permit fee is extra. A [Texas State Parks Pass](#) costs \$70.

Not all automakers require a electric car charger. [Tesla](#) for example.

Consider the harmful gases produced by an Internal Combustion Engine, like carbon monoxide, that affects wildlife and human health.
