Good Day!

My name is Sara Enochs and I'm the daughter of Roy McAlister, an American inventor, who has spent most of his thoughts, energy, and time figuring out how to save the planet from local pollution and global warming. I'll save you another narrative of the dire outcome of global warming because we are going to fix it!

A unique opportunity has been presented to the United States of America through the 2.7 Billion Remediation VW Settlement to improve the quality of the air. With this VW Settlement fund each state could work together to create sustainable economic development with Hydrogen and Carbon-reinforced equipment. By driving with net-hydrogen liquid fuel we can convert cars to become "vacuum cleaners" to clean up the existing air pollution in our cities. Instead of burning the carbon in gasoline, diesel and jet fuel, we can use carbon to produce many more jobs profitably making durable goods. Please watch the following video for an overview: <http://youtu.be/qOL2fEzeuyc>. If the link does not work, please go to YouTube and look up the Metrol Movie produced by David Vasquez. It's important and it does matter! The video explains everything.

By converting to net hydrogen liquid fuel, called Metrol, we will cleanly energize our current infrastructure and companies, by creating new jobs that will **coexist** with our current jobs. **No one needs to go out of business!** The US can lead the world to ultimately convert the current 1.3 billion engines in transportation, electricity generation, farming and mining applications to overcome local pollution and reverse global warming.

The United States truly has been given the VW Settlement funding to make this happen, but each state needs to help expand the economy and overcome pollution of the air, water, and soil. What I am asking for today is that we put our differences aside and come together to help our planet and provide a better future for generations to come. We would like to apply to VW fund and have corporate partners in Texas ready to produce Metrol and the smart plugs when the funds are assigned. Roy's phone number is 602-931-2867.

Roy's email address is [REDACTED]. For more information and the

white paper on Metrol, please visit Metrol-hydrogen-fuel.com.

My email address is [REDACTED] and I live in Austin, Texas. If there's more for me to do to help Roy McAlister be considered eligible to apply, please let me know.

Thank you for your consideration,
Sara Enochs
