I am submitting comments for the TX Volkswagen Env Mitigation Program.

Funds should be used for:

- 1) provide grants to municipalities located in non-attainment areas to: electrify city fleets and refuse trucks, to install geothermal and solar units on city owned buildings
- 2) provide incentives to companies located in non-attainments areas to install EV charging stations
- 3) provide grants to ports in non-attainment areas to electrify port equipment like cranes, fleets and equipment
- 4) provide grants to airports in non-attainment areas to electrify ground support equipment and airport fleets, gate electrification including pre-conditioned air units (PCAs) and ground power converter units (GPCs), & geothermal systems
- 5) provide grants to school districts to electrify fleets and buses, install solar and geothermal units at schools and other ISD buildings
