**Subject:** VW Settlement

I dont support the current state formula on the distribution of funds, the honest and fair way for the state to distribute these funds, is too appropriate according

to where the VW owners purchased the vehicles.

As my grandfather would always state: Figures don't lie but liars figure, your current formula fits this on the nose.

I demand that these funds which where generated by the owners of VW's go back to the areas that these vehicles where purchased, these are the areas that where effected

by the additional vehicle pollution in these areas.

Cant you folks, ever do the right thing !!!!

Your the reason most law abiding, tax paying citizens despise elected officials and bureaucrats.
