Subject: Mitigation Plan

Hello,

Thank you for your plan to reduce nitrous oxides in the Texas environment.

I would like you first to include Austin in this plan. Since 1992 we've lived two blocks from IH 35, the official trade route between Mexico and Canada, and air quality has been a principal detriment to our health. My husband and I both have chronic respiratory issues and beg the state to do whatever it can to help Austin improve its air.

Second, I ask you to add funding for freight switchers, tugs, and tow vessels which offer highly cost effective means to the reduction of air pollution.

Thanks for your efforts to improve the health of all Texans, our most valuable resource.

Jane Chamberlain and Ben Smith
3904 Becker Avenue
Austin
