**Subject:** Comment for zero emissions vehicles

Dear Valued State Workers and Elected Officials,

Your efforts to protect the Texas environment are greatly appreciated. Thank you for accepting comments on this very important decision regarding how to spend the Volkswagen settlement dollars.

I love living in San Antonio, but the air quality is less than wonderful. There are days when the particulate is quite noticeable in my eyes, nose, and even on my lips.

Please spend the money on zero emissions vehicles for the state fleet. It would also be good to give some money to school districts so they could buy zero-emissions buses. The San Antonio transit system is doing an excellent job of replacing its vehicles with cleaner fuel sources. If you can assist other cities with buying zero emissions transit, that would help us all.

I would like to buy a zero emissions vehicle for myself, but need to travel around the state. Could you please use some of the money to put recharging stations at all of the interstate highway rest stops?

Thank you very much for all you do. Of course I hope that you spend this money wisely. Our environment is so important. Please safeguard our air for the next generations. I want my grandsons to live in Texas and breathe freely.

Sincerely,  
Corliss Jean Crabtree
