Subject: \$210 million Volkswagon settlement

Growing up in Corpus Christi I have experienced the change from modest air pollution by the Port industries and refineries to today's "seriously polluted" state. Although resulting from industry rather than automobiles, the dangerous health and environmental effects of that pollution are similar. Texas residents deserve clean air for quality of life. This settlement presents a once-in-a-lifetime opportunity for Texas to create, fund, incentivize transportation policy and programs that diminish and or eliminate air pollution. Please maximize fund allocation on zero-emission vehicles and infrastructure and communities most impacted by air pollution. Give Texas the opportunity to "shine the way forward" for other states.

Thank-you,

Patricia Jones
