Subject: VW settlement

My comments are as follows:

At a minimum we need an EV charger in Brownsville, one between Corpus and Brownsville, and one between Corpus and San Antonio. Otherwise there is no way to travel out of your own city.

Corpus Christi needs at least one electric city bus. The Port of Corpus needs to buy electric tugs as well as electric trucks.

The vehicle emissions testing program in Corpus needs continued funding and well as funding is needed for at least one more PM 2.5 monitor.

Please don't forget about us down here. I still see poluting VWs on the road around town.

Thank you,
John Weber
